

Manufacturer: Stora Enso
Model: PharmaPak SHR
ASTM Type: XIIIIF

Description:

This is a semi-rigid blister reclosable package. This package consists of a polymer coated fiberboard outer carton containing a sliding tray with an affixed blister card (Figure 1).

Figure 1

The front of the blister card covers each tablet with a clear semi-rigid plastic film (Figure 2A) and the back of the card is foil (Figure 2B).

Figure 2A

Figure 2B

The package is opened by first pushing the end of the sliding tray inwards, then squeezing the package through two circular holes on each of the package sides (indicated by the 2 black arrows in Figure 3). The inner tray is then pulled out using a tab attached to the sliding tray (indicated by the white arrow in Figure 3). Once the blister card is exposed, a tablet is pushed out through the foil backing.

Figure 3

The manufacturer's instructions on the front of the outer carton are a combination of written text and graphical illustrations. The instructions are (Figure 4):

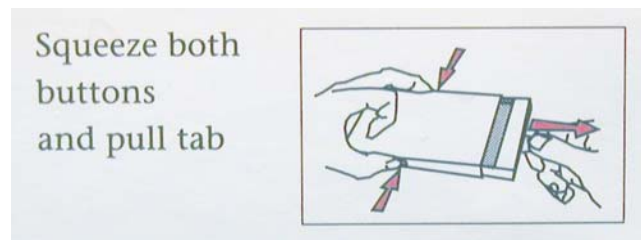

Figure 4

Squeeze both
Buttons
And pull tab

(One hand holding the package and the thumb and a finger of one hand are squeezing the package at the two circular openings; two arrows are used to indicate a squeezing motion. A second hand is pulling a tab; one arrow indicating a pulling motion on the tab.)
