

Jan 15, 2015

Dear Administrator,
 I, ^{(b) (6)} [REDACTED] join Louisiana Workers and Families to ask for a safer alternative to burning of hazardous wastes at Camp Minden.

We oppose the plan by the EPA to open burn 15 million pounds of MG propellants at Camp Minden. There must be some safer way to dispose of this toxic mess.

Open burning is not the way to dispose of military waste. Let every Congressman or woman take some home for safe keeping... Bury it when no-one is watching anything, but uncontrolled burning this will pollute the air and water that people breathe and drink. You are killing us!

Sincerely,

^{(b) (6)} [REDACTED]

Bowler, WI 54416
