Mile And A Half High Mushroom Cloud Near Camp Minden Louisiana Dixie Underground “Bunker Explosion”

Wednesday, October 17, 2012 8:09

11

[\(Before It's News\)](#)

Some sort of an explosion or something sent a plume of smoke 7000 feet into the air. This happened in Louisiana near Camp Minden on Monday night around [11:30pm](#). Multiple witnesses apparently reported that they saw something falling down from the sky towards the earth before the mushroom cloud was created.

According to the [Shreveport Times](#), “ the source was traced to a more earthly cause — a bunker loaded with explosives and leased by [Explo Systems Inc.](#) exploded in the L-1 area toward the central eastern part of Camp Minden.

The [Shreveport Times](#) also reports in an update that “state police hazardous materials unit has completed its on-site investigation and the findings have been turned over to headquarters in Baton Rouge for further review. Troop G spokesman Matt Harris is uncertain when the results will be released publicly.”

The outcome of the investigation will dictate any enforcement action. “We won’t know what violations, if any, until it’s all completed,” Harris said. The Bureau of Alcohol, Tobacco, Firearms and Explosives also is involved in the probe. Meanwhile, the blast site has been turned over to Camp Minden officials for cleanup, which is under way.”

See a [Shreveport Times](#) video from seconds after the blast from Security camera footage provided by Nash Security of Springhill <http://www.shreveporttimes.com/videonetwork/1904571294001/Minden-explosion>

The facility, formerly the Louisiana Army Ammunition Plant, consists has bunkers scattered throughout its predominantly wooded 15,000 acres.” Get the latest [Shreveport Times report here](#)
