

Download instructions:

Right click on the icon representing your desired download method in the table below and choose "save file to disk."

(or)

You may connect to the NHDPlus FTP site (<ftp://ec2-54-227-241-43.compute-1.amazonaws.com>) with an FTP client. FTP clients are generally faster than file transfer through a browser.

Installation instructions:

NHDPlusV2 data is distributed in compressed files created by 7-Zip (compression software) with a ".7z" extension. While 7-Zip can create files in standard Zip format, the NHDPlusV2 data is stored in a special 7-Zip format which creates even smaller compressed files. This helps preserve disk space and shorten download times.

7-Zip, and other zipping utilities that support ".7z" files, may be used to uncompress the NHDPlusV2 data. 7-Zip is a free utility available at: <http://www.7zip.org/download.html>.
