Fiscal Year 2015

# National Water Program Guidance Addendum

**Office of Water April 2014** 850-K-14-003

## **Table of Contents**

A.	Introduction	. 2
B.	Key Changes for FY 2015	. 3
Is	ssue Area: II. National Water Program Areas of Focus Guidance	. 3
Is	ssue Area: III. National Water Program (Subobjective) Specific Guidance	. 5
Is	ssue Area: National Water Program Measures (Appendix A)	. 7

### Appendices

- A. FY 2015 National Water Program Measures
- B. Key Contacts
- C. Additional Guidance for CWA Section 106 State, Interstate, and Tribal Grant Recipients
- D. Potential State Agency Clean Water and Drinking Water Climate Change Adaptation Actions

# A. Introduction

This National Water Program Guidance (NWPG) for fiscal year (FY) 2015 is an addendum to the FY 2014 NWPG<sup>1</sup>, highlighting changes in programs, activities, and measures. The NWPG describes how the Environmental Protection Agency (EPA), states, territories, and tribal governments will work together to ensure safe drinking water and protect and improve the quality of the Nation's waters. In the drafting of this *NWPG Addendum*, the Office of Water (OW) continues to recognize that the federal budget is shrinking and that states, tribes, territories, and municipalities may be experiencing budget shortfalls due to a recovering economy. OW is committed to working with its partners to focus resources on the highest priorities and find the most efficient path towards achieving clean and safe water goals.

The FY 2015 *NWPG Addendum* references the body of the FY 2014 NWPG, pages 3-70. The body of the FY 2014 NWPG has three main sections: I) *Introduction*; II) *National Water Program Areas of Focus Guidance*; and III) *National Water Program (Subobjective) Specific Guidance*. Updated appendices will be provided with the FY 2015 NWPG Addendum.

The water priorities in Section II have not changed substantially. Similarly, the program-specific guidance for each subobjective in Section III has not changed significantly. Key updates to both sections are included in this addendum with page references to the FY 2014 NWPG.

Appendix A includes a comprehensive list of performance measures that support the subobjective strategies and are used to manage water programs. More detailed measure information, including definition and methodology, will be available online<sup>2</sup> as supplemental information to this *NWPG* Addendum.

The process for managing water program strategies includes three parts:

- Part 1 is the development of this *NWPG Addendum*, starting with a review of measures in December 2013, a draft *NWPG Addendum* in March 2014, and the final *NWPG Addendum* in April 2014.
- Part 2 involves consultation and planning among EPA regions, states, and tribes, to be conducted during the Spring/Summer 2014, to convert the "targets" in this NWPG Addendum into regional "commitments" that are supported by Performance Partnership Agreements and other grant workplans with states and tribes. This process allocates available resources to those program activities that are likely to result in the best progress toward accomplishing water quality and public health goals given the circumstances and needs in the state/region.
- Part 3 involves work to be done during FY 2015 to report results and assess progress in program implementation and improve program performance.

OW will continue to promote effective grants management to improve program performance. The Agency has issued directives, policies, and guidance to help improve grants management. OW's policy is that all grants comply with applicable grants requirements regardless of whether the program-specific guidance document addresses the requirement.

<sup>&</sup>lt;sup>1</sup> Please see the FY 2014 NWPG at <u>http://water.epa.gov/resource\_performance/planning/FY-2014-National-Water-Program-Guidance.cfm</u>.

<sup>&</sup>lt;sup>2</sup> Supplemental information to the *Guidance* is at <u>http://water.epa.gov/resource\_performance/planning/FY-2015-</u> <u>National-Water-Program-Guidance.cfm</u>.

Key contacts for this NWPG Addendum are:

- Mike Shapiro, Deputy Assistant Administrator for the Office of Water.
- Tim Fontaine, Senior Budget Officer and Director of Resource Management Staff.
- Vinh T. T. Nguyen, Program Planning Team Leader.

Key contacts by subobjective are listed in *Appendix B* and posted with other related documents at <u>http://water.epa.gov/resource\_performance/planning/FY-2015-National-Water-Program-Guidance.cfm</u>.

## B. Key Changes for FY 2015

Page	Issue Area, Key Change, and Activities
8	Issue Area: II. National Water Program Areas of Focus Guidance
	Key Change for B. Improving the Integrity of the Nation's Drinking Water and Clean Water Quality: Updating text with NDWAC workgroup recommendations on the lead and copper rule activities.
8-9	Completing the review of the Lead and Copper Rule in accordance with the EPA's Final Plan for Periodic Retrospective Review of Existing Regulations. The Retrospective Review sought ways to simplify and clarify requirements imposed on drinking water systems to maintain safe levels of lead and copper in drinking water. As part of this process, EPA solicited input from a working group of stakeholders, who will inform recommendations from the National Drinking Water Advisory Council. The EPA will propose revisions to the Lead and Copper Rule in FY 2015. The final revisions will be promulgated within 18 months of publication of the proposal.
8-9	<ul> <li>Key Change for B. Improving the Integrity of the Nation's Drinking Water and Clean Water Quality: Updating text on NPDES Program Reviews.</li> <li>After piloting Permit Quality Review And State Review Framework (PQR-SRF) integrated reviews in FY 2012 and FY 2013, EPA determined that the efficiency and benefits of integrated reviews vary across EPA regions and states. Therefore, beginning in FY 2014, EPA regions are conducting PQR and SRF reviews either separately or integrated, at their discretion.</li> <li>Given the Agency goal of completing NPDES reviews for all states (including states not yet authorized to implement the NPDES program) on a five-year cycle, EPA expects to conduct approximately 10 reviews in FY 2015. The system tracking PQR action items will no longer be updated to include SRF review action items but EPA will maintain and update its commitment and tracking system to reflect implementation of action items identified in PQRs.</li> </ul>
	Key Change for C. Providing Safe and Sustainable Water Resources and Infrastructure: Updating text on the new Green Infrastructure Strategic Agenda.
10 & 13	EPA released a new Green Infrastructure Strategic Agenda <sup>3</sup> in October 2013 and has now provided more than \$1.4 million in on-the-ground technical assistance to 25 communities to help with green infrastructure implementation.

<sup>&</sup>lt;sup>3</sup> The Green Infrastructure Strategic Agenda is at <u>http://water.epa.gov/infrastructure/greeninfrastructure/upload/2013 GI FINAL Agenda 101713.pdf</u>.

Page	Issue Area, Key Change, and Activities
	Key Change for C. Providing Safe and Sustainable Water Resources and Infrastructure: The
	Agency Priority Goal on small drinking water system is updated for FY 2014-2015.
	A new small drinking water system priority goal is proposed in the FY2014-2018 Strategic Plan
10 9 12	that focuses on the next phase of the 2012-2013 priority goal – to have additional states and
10 & 13	tribes improve system capacity:
	• By September 30, 2015, EPA will engage with an additional ten states (for a total of 30
	states) and three tribes to improve small drinking water system capability to provide safe
	drinking water, an invaluable resource. <sup>4</sup>
	Key Change for C. Providing Safe and Sustainable Water Resources and Infrastructure: Updating
12	Capacity Development activities.
12	Add a new bullet under Activities:
	<ul> <li>Working with EPA and other partners to build small system resiliency.</li> </ul>
	Key Change for D. Controlling Nutrient Pollution: Updating text on the Agency Priority Goal on
	the CWA Section 319 Grant Program for FY 2014-2015.
	A new Section 319 Priority Goal is proposed in the FY2014-2018 Strategic Plan that focuses on the
	next phase of the 2012-2013 nonpoint source priority goal – to have all state nonpoint source
	management plans updated consistent with the new Section 319 grant guidelines:
13-15	By September 30, 2015, 100 percent of the states will have updated nonpoint source
	management programs that comport with the new Section 319 grant guidelines that will
	result in better targeting of resources through prioritization and increased coordination
	with USDA. <sup>5</sup>
	• The Section 319 grant guidelines articulate an expectation that all state programs
	will be updated by September 2014. EPA is working with state partners to meet this 2014 deadline.
	Key Change for E. Assuring High Quality and Accessible Water Information: Updating text on
	Enhancing Access to Drinking Water System Compliance Information.
	Replace last sentence of paragraph with the following:
15-16	The Office of Ground Water and Drinking Water (OGWDW) is working with states to identify data
10 10	for sharing between EPA and states, and is developing a Compliance Monitoring Data Portal to
	facilitate the electronic transmission of data between public water systems, laboratories and
	primacy agencies. Obtaining monitoring data electronically from public water systems will
	facilitate more efficient sharing of data between EPA and states and the public.
	Key Change for E. Assuring High Quality and Accessible Water Information: Updating text on the
	current progress with the new approach using the National Hydrography Dataset Plus (NHDPlus)
	to calculate watershed area for priority areas.
16	Most impaired waters take years to recover fully, and incremental improvements are currently
	not well represented. EPA is developing a new approach to track water quality progress using the
	National Hydrography Dataset Plus (NHD <i>Plus</i> ) to calculate watershed area for priority areas using the NHD <i>Plus</i> 'catchments' to describe previously impaired waters that are now attaining their
	water quality standards. This approach also allows for the inclusion of watershed areas targeted
	water quarty standards. This approach also allows for the inclusion of watershed areas targeted

 <sup>&</sup>lt;sup>4</sup> Read more about the Agency Priority Goals at <u>http://goals.performance.gov/agency/epa</u>.
 <sup>5</sup> Read more about the Agency Priority Goals at <u>http://goals.performance.gov/agency/epa</u>.

Page	Issue Area, Key Change, and Activities
	for protection (i.e., high quality waters). It provides a consistent method for measuring progress at the local scale, while allowing for tighter integration with data and assessments at the state and national scale.
18	Issue Area: III. National Water Program (Subobjective) Specific Guidance
21-22	Key Change for Climate change: Updating efforts to implement priority actions from the National Water Program Climate Change Adaptation Plan.In FY 2015, the National Water Program will expand efforts to assure that core clean water and safe drinking water programs are adapted to a changing climate. National program offices at EPA Headquarters and Regional water programs will continue implementing priority actions identified in the National Water Program Climate Change Adaptation Plan to be finalized based on input from States, Tribes, and stakeholders in early 2014. EPA will also work with States to identify and implement adjustments to the national clean water and drinking water programs implemented by 
	conditions as a result of climate change (see Appendix D - list of priority State program adaptations).  Key Change for Water Safe to Drink: Updating activities under Water System Security.
30-31	Activities: EPA will work with DHS, as well as the Water Sector Coordinating Council and Water Government Coordinating Council, to encourage water and wastewater utilities to use the Cybersecurity Framework and participate in the DHS Voluntary Program for Framework implementation.
	Key Change for Water Safe for Swimming: Updating progress on CSO program goals.
36-37	In a significant step toward achieving CSO program goals, the New Jersey Department of Environmental Protection (NJDEP) started issuing individual CSO NPDES Permits instead of General Permits.
	Key Change for Section 106 Grant Guidance to States and Interstate Agencies: General Information
39	Updating the title of the sections to include tribes: "Section 106 Grant Guidance to States, interstate Agencies, and Tribes". Similar edits were made to Appendix C – Additional Guidance for CWA Section 106 State, Interstate, and Tribal Grant Recipient.
	Updating the text to indicate that the guidance for the use of associated program support cost authority by the Section 106 Program was finalized and posted at <a href="http://water.epa.gov/grants_funding/cwf/upload/Section-106-APSC-Guidance-Final.pdf">http://water.epa.gov/grants_funding/cwf/upload/Section-106-APSC-Guidance-Final.pdf</a> .
	<b>Key Change for Improve Water Quality Monitoring and Assessment:</b> Updating text on protection of high quality watersheds and new MOU with the Association of Clean Water Agencies (ACWA) and the Nature Conservancy on healthy watersheds.
41-42	There is increased emphasis on protection of high-quality watersheds and how they support all other Clean Water Act efforts and help mitigate the effects of Climate Change by moderating flow and keeping habitat corridors intact.
	EPA will be proposing a new MOU with ACWA and The Nature Conservancy which will help highlight protection of healthy watersheds and showcase pilot efforts to integrate these protection efforts into Clean Water Act programs.

<ul> <li>43-44</li> <li>Key Change for Implement TMDL and Other Watershed Related Plans: Discussing the new measures to reflect the 10-year vision for the Program.</li> <li>Development and implementation of Total Maximum Daily Loads (TMDLs) for CWA Section 303(d) listed impaired waterbodies is a critical tool for meeting water quality restoration goals. The CWA 303(d) listing and TMDL program is implementing a new 10-year vision for the program to more effectively achieve the water quality goals of each state. TMDLs will continue to be a primary feature of the CWA 303(d) program, and states are expected to continue to develop them where needed. However, to best reflect the new vision, the EPA proposes to replace the TMDL count measures (WQ-8a and b) with the following new measures (also see section on measure changes):</li> <li>WQ-27: Extent of priority areas identified by each state that are addressed by EPA-approved TMDLs or alternative restoration approaches for impaired waters that will achieve water quality standards. These areas may also include protection approaches for unimpaired waters to maintain water quality standards.</li> <li>In addition, the EPA proposes to add a complementary indicator measure (WQ-28) to measure incremental progress toward development of TMDLs or alternative approaches state-wide, including outside and inside of priority areas.</li> <li>Key Change for Strengthen the NPDES Permit Program: Updating activities for "NPDES Work Planning and Oversight"; "Permit Quality Reviews (PQR) and Integrated PQR and State Review Framework (PQR-SRF)"; and "Program Integrity" sections.</li> <li>After piloting PQR-SRF integrated reviews in FY 2012 and FY 2013, EPA determined efficiency and benefits of integrated reviews vary across EPA regions and states. Therefore, beginning in FY 2014, EPA regions are conducting PQR and SRF reviews either separately or integrated, at their discretion. MOAs are still being reviewed for all authorized state NPDES programs.</li> <li>K</li></ul>	Page	Issue Area, Key Change, and Activities
<ul> <li>43-44</li> <li>43-44</li> <li>44-45</li> <li>Acycle Change for Strengthen the NPDES Permit Program: Updating activities for "NPDES Work Planning and Oversight"; "Permit Quality Reviews (PQR) and Integrated PQR and SRF reviews either separately or integrated, at their discretion. MOAs are still being reviewed for all authorized state NPDES programs.</li> <li>Key Change for Strengthen the NPDES Permit Program: Updating text for the "Green Infrastructure" section related to the new Green Infrastructure Strategic Agenda.</li> </ul>		
<ul> <li>43-44</li> <li>43-44</li> <li>Iisted impaired waterbodies is a critical tool for meeting water quality restoration goals. The CWA 303(d) listing and TMDL program is implementing a new 10-year vision for the program to more effectively achieve the water quality goals of each state. TMDLs will continue to be a primary feature of the CWA 303(d) program, and states are expected to continue to develop them where needed. However, to best reflect the new vision, the EPA proposes to replace the TMDL count measures (WQ-8a and b) with the following new measures (also see section on measure changes):</li> <li>WQ-27: Extent of priority areas identified by each state that are addressed by EPA-approved TMDLs or alternative restoration approaches for impaired waters that will achieve water quality standards. These areas may also include protection approaches for unimpaired waters to maintain water quality standards.</li> <li>In addition, the EPA proposes to add a complementary indicator measure (WQ-28) to measure incremental progress toward development of TMDLs or alternative approaches state-wide, including outside and inside of priority areas.</li> <li>Key Change for Strengthen the NPDES Permit Program: Updating activities for "NPDES Work Planning and Oversight"; "Permit Quality Reviews (PQR) and Integrated PQR and State Review Framework (PQR-SRF)"; and "Program Integrity" sections.</li> <li>After piloting PQR-SRF integrated reviews in FY 2012 and FY 2013, EPA determined efficiency and benefits of integrated reviews vary across EPA regions and states. Key Change for Strengthen the NPDES Permit Program: Updating text for the "Green         Infrastructure" section related to the new Green Infrastructure Strategic Agenda.	44-45	
2014, EPA regions are conducting PQR and SRF reviews either separately or integrated, at their discretion. MOAs are still being reviewed for all authorized state NPDES programs.         Key Change for Strengthen the NPDES Permit Program: Updating text for the "Green Infrastructure" section related to the new Green Infrastructure Strategic Agenda.		
Key Change for Strengthen the NPDES Permit Program: Updating text for the "Green Infrastructure" section related to the new Green Infrastructure Strategic Agenda.		
Infrastructure" section related to the new Green Infrastructure Strategic Agenda.		discretion. MOAs are still being reviewed for all authorized state NPDES programs.
<b>45</b> EPA released a new Green Infrastructure Strategic Agenda <sup>6</sup> in October 2013. The new version		
	45	
expands capacity building efforts and includes a new emphasis on aligning federal support for green infrastructure.		
Key Change for Strengthen the NPDES Permit Program: Updating activities for the "Vessels"		
section.		
In December 2013, EPA issued the second Vessel General Permit (VGP) which provides coverage		
for commercial vessels in U.S. waters. <sup>7</sup>		
Among other things, the 2013 Final VGP contains numeric ballast water discharge limits		
46 for most vessels which will reduce the threat posed by the transport of invasive species to	46	
U.S. waters. Ballast water discharges have resulted in the introduction of numerous		-
aquatic invasive species, resulting in severe degradation of many ecosystems and billions of dollars of economic damages. Also, this permit contains more stringent effluent limits		
for oil-to-sea interfaces and exhaust gas scrubber washwater, which will help prevent		
adverse environmental impacts due to the chronic discharge of oils and grease into U.S.		
waters.		

 <sup>&</sup>lt;sup>6</sup> See <u>http://water.epa.gov/infrastructure/greeninfrastructure/upload/2013\_GI\_FINAL\_Agenda\_101713.pdf</u>.

Page	Issue Area, Key Change, and Activities
	Key Change for Strengthen the NPDES Permit Program: Updating text for the "Stormwater"
46	section. Remove the statement: "A key action item that EPA is undertaking is to revise the national stormwater program via a rulemaking to improve the overall efficiency and effectiveness of the program".
	Key Change for Strengthen the NPDES Permit Program: Updating text for the "IntegratedWastewater and Stormwater Planning" section.On January 13, 2013, EPA issued a memorandum "Assessing Financial Capability for Municipal
47	<i>Clean Water Act Requirements</i> <sup>78</sup> that identifies issues the Agency is working closely with local governments to clarify. EPA is committed to providing additional clarification on the approaches and flexibility in assessing a permittee's financial capability and how that assessment can impact schedules for CWA implementation.
48	<b>Key Change for Strengthen the NPDES Permit Program:</b> Updating text for the "Section 106 Grant Guidance to States and Interstate Agencies: Permits, Enforcement, and Compliance" section.
	The reference to OECA CWA-09 no longer exists and is removed.
	<b>Key Change for Define Waterbody/Watershed Standards Attainment Goals and Strategies (page 50-51):</b> Updating progress on a new approach for measuring local improvements in water quality, using the National Hydrography Dataset Plus (NHDPlus).
50-51	EPA is evaluating a new approach for measuring local improvements in water quality. This new approach would use the National Hydrography Dataset Plus (NHDPlus) to calculate watershed area for priority areas where previously impaired waters are now attaining water quality standards. Through this effort, the EPA is also working with its partners to develop new replacement strategic measures for water quality standards attainment and for improved water quality conditions in impaired waterbodies. This new approach to track local improvements for priority waters is complemented by the indicator measure introduced in FY 2014 to measure progress statewide using states' statistical survey results.
	<b>Key Change for The Great Lakes (page 56-58):</b> Updating progress under discussion as part of a Great Lakes Restoration Initiative Action Plan proposed for FY 2015-2019.
56-58	Priorities and commitments for FY 2015 are under discussion as part of a Great Lakes Restoration Initiative Action Plan proposed for FY 2015-2019. The Great Lakes Advisory Board has provided input to the Action Plan. Comments from stakeholders will be requested when a draft is published in FY2014.
	Issue Area: National Water Program Measures (Appendix A)
	Key Change for Subobjective 2.1.1 Water Safe to Drink: Add tribal "person months" measure for
Appendix A P. 1	progress discussions with the Deputy Administrator. The new measure is proposed for FY 2015 to provide greater consistency in measuring progress for tribal community water systems with the full universe of community water systems (i.e., SDW- SP2).
	<ul> <li>New Measure SDW-20: Percent of 'person months' (i.e. all persons served by community water systems times 12 months) during which community water systems in Indian</li> </ul>

<sup>&</sup>lt;sup>8</sup>Read it at <u>http://www.epa.gov/npdes/pubs/sw\_regionalmemo.pdf</u>.

Page	Issue Area, Key Change, and Activities
	country provide drinking water that meets all applicable health-based drinking water standards.
	Key Change for Subobjective 2.1.1 Water Safe to Drink: Add a drinking water security measure per OIG recommendations.
Appendix A	Per the OIG recommendation, the measure will track the number of utilities and governmental officials.
P. 4	<ul> <li>New Measure SDW-21: Number of drinking water and wastewater utilities and local, state, and federal officials receiving training and technical assistance to enhance emergency preparedness and resiliency to reduce risk from all hazards including those attributed to climate change impacts.</li> </ul>
	Key Change for Subobjective 2.2.1 Improve Water Quality on a Watershed Basis: Revising WQ-
	SP13.N11 to report results on the Lakes Survey (NLA).
Appendix	The Lakes Survey will be reporting on change in condition in FY 2015.
A P. 13	Revised <b>WQ-SP13.N11</b> : Ensure that the condition of the Nation's lakes does not degrade (i.e.,
	there is no statistically significant increase in the percent of lakes rated "poor" and no statistically
	significant decrease in the lakes rated "good").
	Key Change for Subobjective 2.2.1 Improve Water Quality on a Watershed Basis: Changing WQ-
	04a to an indicator. No change to measure text.
Appendix	When this measure was originally developed, it was designed to encourage EPA to work early
A	with states to help them submit approvable water quality standards. The regions have been doing
P. 8	this. However, having the regions develop submission approval commitments has become
	counter-productive. As an indicator, the measure would still provide information on how well
	regions are working with their states, but without the effort needed to develop commitments. <b>Key Change for Subobjective 2.2.1 Improve Water Quality on a Watershed Basis:</b> Modifying WQ-
Appendix	13a to delete the reference to "national percent".
A	The measure is modified to track the number of MS4s. The national percent is no longer reported.
P. 10	• Revised <b>WQ-13a</b> : Number of MS4s covered under either an individual or general permit.
	Key Change for Subobjective 2.2.1 Improve Water Quality on a Watershed Basis: Deleting WQ-
No	15a.
longer in	OECA tracks this data. Measure is also deleted from the budget.
Appendix A	• Existing measure <b>WQ-15a</b> to be deleted: Percent of major dischargers in Significant
	Noncompliance (SNC) at any time during the fiscal year.
	Key Change for Subobjective 2.2.1 Improve Water Quality on a Watershed Basis: Deleting WQ-
No	16.
longer in	OECA tracks this data. Measure is also deleted from the budget.
Appendix A	• Existing measure <b>WQ-16</b> to be deleted: Number, and national percent, of all major
	publicly-owned treatment works (POTWs) that comply with their permitted wastewater discharge standards. (i.e. POTWs that are not in significant non-compliance)
Appendix	Key Change for Subobjective 2.2.1 Improve Water Quality on a Watershed Basis: Adding back a
A	measure to track Urban Water projects completed.

Page	Issue Area, Key Change, and Activities
P. 12	This measure will be in the budget with annual targets.
	• <b>WQ-25b:</b> Number of urban water projects completed addressing water quality issues in the community. (cumulative)
	<b>Key Change for Subobjective 2.2.1 Improve Water Quality on a Watershed Basis:</b> Replace WQ-8a & b with new TMDL measures.
	WQ-27 will be a budget measures with annual targets. WQ-28 will be an indicator measure.
Appendix A P. 12 &	<ul> <li>WQ-27: Extent of priority areas identified by each state that are addressed by EPA- approved TMDLs or alternative restoration approaches for impaired waters that will achieve water quality standards. These areas may also include protection approaches for unimpaired waters to maintain water quality standards.</li> </ul>
13	<ul> <li>This measure will track the percent of priority areas. States may use NHDplus catchment, HUC12s, or a similar state hydrologically meaningful watershed unit to measure results.</li> </ul>
	<ul> <li>WQ-28: State-wide extent of activities leading to completed TMDLs or alternative restoration approaches for impaired waters, or protection approaches for unimpaired waters.</li> </ul>
	<ul> <li>The measure will track the percent of progress towards the goal of 100%.</li> </ul>
	<b>Key Change for Subobjective 2.2.3 Increase Wetlands:</b> Modifying measure text per IG recommendation.
Appendix	Per the IG's suggestion, a clarification is added at the end of the measure text to clarify the term "no net loss".
A P. 14	<ul> <li>Revised WT-SP22: In partnership with the U.S. Army Corps of Engineers, states and tribes, achieve 'no net loss' of wetlands each year under the Clean Water Act Section 404 regulatory program. ("No net loss" of wetlands is based on requirements for mitigation in CWA 404 permits and not the actual mitigation attained.)</li> </ul>
	Key Change for Subobjective 2.2.3 Increase Wetlands: Modifying measure text for clarification.
Appendix	The measure is updated with current text.
A P. 15	<ul> <li>Revised WT-03: Percent of Clean Water Act Section 404 standard permits, upon which EPA coordinated with the permitting authority (i.e., Corps or State), where a final permit decision in the current fiscal year documents requirements for greater environmental protection than originally proposed.</li> </ul>
	Key Change for Subobjective 2.2.4 The Great Lakes: Modifying GL-06 for clarity.
Appendix A	The modification is being made to clarify that the measure is tracking the rate of aquatic nonnative species.
P. 16	<ul> <li>Revised GL-06: Rate of aquatic nonnative species newly detected in the Great Lakes ecosystem.</li> </ul>
Appendix	Key Change for Subobjective 2.2.4 The Great Lakes: Modifying GL-16 for clarity.
A P. 17	The modification is being made to clarify that the measure is tracking the percent increase in acreage.

Page	Issue Area, Key Change, and Activities
	<ul> <li>Revised GL-16: Percent increase in acreage in Great Lakes watershed with USDA conservation practices implemented to reduce erosion, nutrients, and/or pesticide loading.</li> </ul>
	Key Change for Subobjective 2.2.5 The Chesapeake Bay: Replacing long term strategic measure.
	The new measure is an index incorporating indicators that track attainment of Bay water quality standards for dissolved oxygen, water clarity/underwater grasses, and chlorophyll a in Chesapeake Bay and tidal tributaries. The new strategic measure is also used to track the Presidential Executive Order 13508 Strategy's Water Quality Outcome.
Appendix A P. 18	<ul> <li>Existing measures to be deleted and replaced with new measure:         <ul> <li>CB-SP33.N11 - Percent of Submerged Aquatic Vegetation goal of 185,000 acres achieved, based on annual monitoring from prior year.</li> <li>CB-SP34 - Percent of Dissolved Oxygen goal of 100% standards attainment achieved, based on annual monitoring from the previous calendar year and the preceding 2 years.</li> </ul> </li> </ul>
	<ul> <li>New measure CB-05.N14: Percent attainment of water quality standards for dissolved oxygen, water clarity/underwater grasses, and chlorophyll a in Chesapeake Bay and tidal tributaries.</li> </ul>
	<b>Key Change for Subobjective 2.2.11 The South Florida Ecosystem:</b> Replacing a measure to better track incremental progress.
	EPA proposes to delete budget measure SFL-SP48 to better track incremental progress of Everglades Stormwater Treatment Areas using the new budget measure SFL-2.
Appendix A P. 23	<ul> <li>Existing measure SFL-SP48 to be deleted: Improve the water quality of the Everglades ecosystem as measured by total phosphorus, including meeting the 10 parts per billion (ppb) total phosphorus criterion throughout the Everglades Protection Area marsh and the effluent limits for discharges from stormwater treatment areas.</li> <li>New Measure SFL-2: The number of Everglades Stormwater Treatment Areas (STAs) with the annual total phosphorus (TP) outflow less than or the same as the five-year annual average TP outflow, working towards the long-term goal of meeting the 10 parts per billion annual geometric mean.</li> </ul>

# Appendix C – Additional Guidance for CWA Section 106 State, Interstate, and Tribal Grant Recipients

This appendix, along with the specific text found in Section III.C.1.a<sup>1</sup>, provide guidance for state, interstate, and tribal grant recipients when implementing water pollution control programs under Section 106 of the Clean Water Act (CWA). Together, Section III.C.1, and Appendix C make up the CWA Section 106 grant guidance.

**Associated Program Support:** Since FY 1999, Congress has included language in the State and Tribal Assistance Grant (STAG) account for "multi-media and single media pollution prevention, control and abatement, and related activities", authorizing EPA to use a portion of the funds available for those programs to fund activities that benefit all or a portion of the state and tribal grant recipients – the associated program support costs authority. See Public Law 105-276.

EPA has finalized guidance for use of associated program support costs authority by the Section 106 Program (http://water.epa.gov/grants\_funding/cwf/upload/Section-106-APSC-Guidance-Final.pdf). Generally, the associated program support costs authority is used to support activities that promote the common goals of the requesting state(s) and tribe(s) and/or promote administrative efficiency and cost savings to the recipients. For EPA to use STAG resources as associated program support, the activity must: (a) be the inherent responsibility of a state, tribal, territory, or interstate water pollution control agency and (b) be of primary benefit to these agencies and not EPA. EPA must get the prior approval of these agencies before such funding can be reserved for associated program support activities. Associated program support can be provided by EPA through a grant, contract, or interagency agreement.

**FY 2015 Nutrient Management Activities:** In FY 2015, EPA will allocate additional funds to states and tribes to support their nutrient reduction efforts consistent with EPA Office of Water guidance issued in March 2011<sup>2</sup>. These Section 106 nutrient reduction activities will work in conjunction with those being carried out by states and tribes using Section 319 and U.S. Department of Agriculture funding and focus on key principles that have guided the agency technical assistance and collaboration with the states. EPA will work with states and tribes as they develop work plans to ensure these additional funds are used for tasks consistent with the Framework and support the implementation of nutrient reduction activities.

WQ-SP10.N11	WQ-SP13	WQ-3a	WQ-12a	WQ-19a
WQ-SP11	WQ-1a	WQ-27	WQ-13a, b, c, d	SS-1
WQ-SP12.N11	WQ-26	WQ-10	WQ-14a	

**Base Program Measures:** CWA Section 106 funding supports many of the strategic targets and goals outlined in the *National Water Program Guidance*. These measures include:

Measures specific to tribal programs are found in Section III.A.1. of this *National Water Program Guidance*.

<sup>&</sup>lt;sup>1</sup> Section references are for the final FY 2014 National Water Program Guidance narrative, found at <u>http://water.epa.gov/resource\_performance/planning/FY-2014-National-Water-Program-Guidance.cfm</u>.

<sup>&</sup>lt;sup>2</sup> The eight key principles are identified in the March 16, 2011, memorandum "Working in Partnership with States to Address Phosphorus and Nitrogen Pollution through the Use of a Framework for State Nutrient Reductions (Framework)"

# Appendix C – Additional Guidance for CWA Section 106 State, Interstate, and Tribal Grant Recipients

**Guidance for Core Programs:** Guidance for core programs funded through grants for water pollution control programs under CWA Section 106 is provided in specific text in Section III.C.1., Improve Water Quality on a Watershed Basis.

**Other programs in the NWPG that can utilize CWA Section 106 Funds:** State, interstate, and tribal agencies can use CWA Section 106 grants to carry out a wide range of water quality planning and management activities. Agencies have the flexibility to allocate funds toward priority activities. Other activities that may be funded with CWA Section 106 funds include:

Source Water (Surface Water and Ground Water): EPA regions, states, and tribes are reminded that CWA Section 106 grant funds are an essential funding source for source water protection activities. The Agency recommends that states and tribes continue to direct a portion of their CWA Section 106 funding for source water protection and wellhead protection actions that protect both ground water and surface water used for drinking water. EPA regions, states, and tribes that administer EPA-approved WQS programs should ensure that there are protective water quality standards in place, and being attained, for each waterbody being used as a public water supply. Also, EPA encourages states and tribes to allocate a reasonable share of water quality monitoring resources to assess attainment of the public water supply use, and consider using water quality or compliance monitoring data collected by public water systems in assessing water quality and determining impairment. EPA regions, states, and tribes should consider placing a high priority on (a) waterbodies where state, tribal, or local source water assessments have identified highly threatening sources of contamination that are subject to CWA and (b) the development and implementation of TMDLs to address impairments of the public water supply use. In particular, EPA regions and states should consider the relationship between point source dischargers and drinking water intakes in setting permit requirements and inspection and enforcement priorities. EPA also encourages state programs to consider using their allocation to leverage the resources of Source Water Collaborative members and allies, found on: http://www.sourcewatercollaborative.org/. In addition, EPA encourages states and tribes to integrate source water into updates of watershed assessments and plans, including incorporating ground water and the ground water / surface water interchange, and in the course of doing so consider the effects of climate change on fresh water resources. See Section II.B. for additional discussion on the Source Water and Ground Water. Tribes should refer to the Final Guidance on Awards of Grants to Indian Tribes under Section 106 of the Clean Water Act, in particular the Understanding Source Water Protection and Conducting a Source Water Assessment sections.

**Non-point Source:** States, territories, and tribes may use CWA Section 106 funds to develop watershed-based plans and to conduct monitoring on a watershed basis. States' and where appropriate, tribes' integrated monitoring designs should use a combination of statistical surveys and targeted monitoring to cost-effectively evaluate the health of watersheds and the effectiveness of protection and restoration actions, such as nonpoint source implementation projects. In addition, EPA encourages, consistent with the scope of CWA Section 106, broader efforts to protect and maintain healthy watersheds, so that costly implementation measures are not required to restore water quality and aquatic habitat.

**Protecting Wetlands:** Some states and tribes have utilized CWA Section 106 funds for program implementation, including wetlands monitoring and protection projects.

**Fish and Shellfish Safe to Eat:** See the grant program guidance at: <u>http://www.epa.gov/water/waterplan</u>.

- Tribal water pollution control programs. See <u>http://epa.gov/owm/cwfinance/106tgg07.htm</u>.
- State and interstate use of Monitoring Initiative funds. See <u>http://epa.gov/owm/cwfinance/106-guidelines-monitor.htm</u>.
- Office of Compliance and Enforcement Assurance National Program Manage Guidance. In October, 2009, EPA issued the Clean Water Act Action Plan ("the Action Plan"). The Action Plan identifies steps EPA will take to improve enforcement efforts aimed at addressing water quality impairment. The Office of Water continues to work with the Office of Enforcement and Compliance Assurance (OECA), EPA regions, and states to implement the Action Plan. For more information on specific enforcement actions for 2015, please see the 2015 OECA National Program guidance at <u>http://www2.epa.gov/planandbudget/nationalprogram-manager-guidances</u>.

## Appendix D: Potential State Agency Clean Water and Drinking Water Climate Change Adaptation Actions April 2014

	April 2014	<u></u>	0
#	Actions for Climate Change Adaptation	State Water Quality Agency	State Drinking Water Agency
1	<b>Promote Water and Climate Change Adaptation Training for Water Program Staff:</b> Encourage State staff implementing water programs to take online training addressing the challenges that a changing climate poses for meeting clean water and drinking water goals.	*	*
2	<b>Be a WaterSense Partner:</b> Promote water use efficiency by wastewater treatment plants and drinking water systems in the State by joining the WaterSense program as a partner and participating in a State water conservation program.	*	*
3	Promote Use of Climate Resilience Evaluation and Awareness Tool (CREAT) by Local Water Utilities: Support wastewater treatment plants and drinking water systems in use of the CREAT tool to assess the vulnerability of plants to a changing climate and identify response actions.	*	*
4	Adapt State Revolving Loan Funds (SRFs) to Climate Change: Adopt climate change considerations in management of SRF drinking water and clean water SRF programs.	*	*
5	<b>Consider Climate Change Impacts in Triennial Review of State Water Quality</b> <b>Standards:</b> Work collaboratively with Regions to consider if there is the need to begin to address climate change impacts in water quality standards.	*	
6	<b>Report Climate Change Related Impacts on Waters of the State in Integrated Reports</b> <b>Under Clean Water Act Section 303(d) and 305(b):</b> Discuss and identify the possibility of States' abilities or inabilities to include in integrated reports under Sections 303(d) and 305(b) assessment of trends in water conditions related to a changing climate, including water temperature, in-stream flow, and ph, and the likely impact of future climate change on waters, including attainment of water quality standards generally.	*	
7	Update State Water Quality Management (WQM) Plans to Address a Changing Climate: Consider the need to revise and update State Water Quality Management Plans developed under 40 CFR 130.6 to describe how core clean water program components addressed in the plans could be adapted to recognize the anticipated long-term changes in water conditions in the State as a result of a changing climate.	*	
8	Update Clean Water Act Section 401 Certification Processes to Address Climate Change: Review existing certification procedures under section 401 of the Clean Water Act to identify how climate change impacts on waters, including expected changes in stream flow and water temperature, could be considered in reviews of Federal permits or licenses for under section 401, including reviews of major construction projects such as dams.	*	
9	Implement Updated NPDES Permit Tools and Training Related to Changes in Precipitation and Water Temperature: Where available, apply updated models and practices for assessing vulnerability of water quality to increasing variability of precipitation, in-stream flows (high and low) and warming water temperature; apply updated models and practices in fit-for-use green infrastructure approaches.	*	
10	Address Climate Change in Community Water System Sanitary Surveys: Identify elements of the sanitary surveys for community water systems that address the risks to drinking water systems posed by climate change and address these risks as part of sanitary surveys on a 3/5 year basis.		*
