Subject:

Please stop the theft of the most beautiful part of Cape Cod-- this Nantucket Sound area is for fish, birds, boating, and enjoyment by thousands of day trip people--this is not the place for a factory---who will clean up the oil leakage from 130 units---who will remove them when they break down, who will restore sacred ground of Native Americans ---not Cape Wind---they'll be long gone onto the next subsidized opportunity. Alternative locations are many but once installed in the Sound we'll all---like Gulf state people suffering from BPs shortcuts---wish the permitting had been more demanding
RJ Mahoney, resident
