KPI 6: F-GHG emission tracking and reporting

How is your organization addressing the tracking and reporting of fluorinated greenhouse gas (F-GHG) emissions generated during the manufacturing of the major components in your products?

Additional Guidance

- A We do not have programs or initiatives to track and report F-GHG emissions within our supply chain.
- B We are working with our manufacturing facility partners to engage our component suppliers regarding opportunities to track and report F-GHG emissions, but do not require action.
- C We are working with our manufacturing facility partners to require our component suppliers to track and report F-GHG emissions.
- D In addition to (C), we publicly report our efforts to track and reduce F-GHG emissions from the operations of our manufacturing facility partners and our suppliers.
