Task Order Statement of Work
EPA Region 8 ERRS Contract No. EP-S8-13-02
Environmental Restoration, L.L.C.
6/26/2013

Name: Red and Bonita Mine
Task Order No. 10

On Scene Coordinator: (b) (6) (b) (6)

Site Name Red and Bonita Mine
Superfund Site ID (SSID) – 08UP
Federal Project Number (FPN) not applicable
City/County/State: Silverton, San Juan County, Colorado

Type: Removal Assessment
Funding Source: Removal Support
Anticipated Start Date: 07/08/2013
Anticipated End Date: 12/31/2013

The conditions at the Red and Bonita Mine Site present an endangerment to human health and the environment and meet the criteria for initiating a removal assessment action under 40 CFR section 300.415(b)(2). All activities directed by EPA's On Scene Coordinator must remain consistent with The National Oil and Hazardous Substances Pollution Contingency Plan (40 CFR 300).

Background

The Red and Bonita Mine is located approximately eight miles north of the town of Silverton, Colorado, in San Juan County. Continuous flow of approximately 250 to 300 gpm discharges from the mine adit and carries high levels of dissolved zinc and other metals. In coordination with the Colorado Department of Reclamation, Mining and Safety, an entry into the mine is planned for July 8, 2013.

The Red and Bonita Mine is located above 10,000 feet, therefore a warm weather action is imperative.

Objectives

The purpose of this work is to temporarily manage water during the mine entry process including a system to minimize the release of suspended solids in the adit drainage to Cement Creek. The water is slightly acidic and the adit floor contains metal precipitates and sediment up to approximately 3 feet deep. Controlling the release of the settled solids during the mine entry will require conveying the water from the portal to a containment area and/or tanks before it is released to the existing drainage. Solids collected during this operation may require disposal at the county landfill. It will be necessary to manage the water and containment areas to prevent erosion of surrounding soil and mine waste dump solids.

Data Requirements

Hazardous categorization of wastes? No.

All data collection and requirements will be managed by the START 4 contractor. The OSC will advise and direct the ERRS contractor based on the data collected by START 4. The ERRS 4 contractor will not be collecting or generating environmental data.

Activities Under Contract Statement-of-Work: The contractor shall accomplish the following tasks as required under the Contract:

I. Project Planning (SOW II.A.1)

- Provide a detailed work plan to accomplish the project in the most effective, efficient and safe manner based on existing information or preplanning site-walk conducted as part of Task Order 2. This work plan shall, at a minimum, define the types and quantities of cleanup personnel, equipment and materials that will be needed, the proposed project schedule by sub-task, and the estimated cost.
- Provide a detailed Health and Safety Plan to protect the workers on-site from the hazards with the contaminants and physical threats associated with the removal actions.

2. Containment, Countermeasures, Emergency and Removal Response (SOW II.A.2)

- Provide for Site Security, including equipment, in consultation with the On-Scene Coordinator.
- Provide for mitigation controls that address airborne dust and water run-on/off during Removal Assessment action, including silt fencing/berms during all operations.

3. Decontamination, Response Mitigation (SOW II.A.3)

- Provide for the capture of contaminated solids during the release of acid mine drainage. Such measures will require conveying the water from the portal to a containment area and/or tanks for settling and filtering before release to existing drainage.
- Provide for the management of water and containment areas to prevent erosion of surrounding soils and mine waste dump soils. All environmental data will be generated by the START 4 contractor, including the volume of contaminated solids. The On-Scene Coordinator will direct the ERRS contractor for disposal purposes based on environmental information generated by the START 4 contractor.

4. Treatment and Transportation and Disposal Operations (SOW II.A.4)

- Provide for disposal of collected solids listed in Item No. 3 above.

5. Restoration and Soil Stabilization (SOW II.A.5)

NA.

6. Analytical Services (SOW II.A.6)

NA.

7. Demolition Services (SOW II.A.7)

NA.

8. Construction and Support Facilities in Support of Removal Actions (SOW II.A.8)

- Provide for office trailer, including support equipment, communications, power, etc.

9. Marine Operations (SOW II.A.9)

NA.

10. Trans-boundary Response (SOW II.A.10)

NA.

11. Response Times (SOW II.A.11)

NA.

12. Regional Cross-Over (SOW II.A.12)

NA.

Deliverables

Detailed Work Plan	NLT the Date of Mobilization
Health and Safety Plan	NLT the Date of Mobilization
Construction & Implementation	July 8, 2013 to December 31, 2013
Daily Work Orders	Daily
Daily Cost Summary Reports (55s)	Daily
Removal Activities Report	NLT 30 days after Demobilization
Final Daily Cost Summary Report (55s)	NLT 90 days after Demobilization

Schedule

This work is expected to begin on 07/08/2013 and end on 12/31/2013.

Other Task Order Requirements

1. Provide for application of Service Contract Act Labor rates and David-Bacon Laqor rates in consultation with the R8 ERRS Contracting Officer.
2. Provide all site cost documentation within 90 days after demobilization date, with the exception of 'pending costs.' Use RCMS Windows Version 2.0 for Site cost accounting purposes.
