| RPD  | - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |
| SRM  | - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.  |

### Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

### Terms

**Total:** With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

**Analytical Method:** Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

### Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

**Report Format:** Data Usability Report

**Project Name:** NEW BEDFORD HARBOR LTM VI  
**Project Number:** GTX-302366

**Lab Number:** L1423331  
**Report Date:** 10/23/14

#### Data Qualifiers

- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the reporting limit (RL) for the sample.

**Project Name:** NEW BEDFORD HARBOR LTM VI  
**Project Number:** GTX-302366

**Lab Number:** L1423331  
**Report Date:** 10/23/14

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

## Certification Information

Last revised April 15, 2014

---

### The following analytes are not included in our NELAP Scope of Accreditation:

#### Westborough Facility

**EPA 524.2:** Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

**EPA 8260C:** 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

**EPA 8330A/B:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.

**EPA 8270D:** 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

**EPA 625:** 4-Chloroaniline, 4-Methylphenol.

**SM4500:** Soil: Total Phosphorus, TKN, NO<sub>2</sub>, NO<sub>3</sub>.

**EPA 9071:** Total Petroleum Hydrocarbons, Oil & Grease.

#### Mansfield Facility

**EPA 8270D:** Biphenyl.

**EPA 2540D:** TSS

**EPA TO-15:** Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

---

### The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

#### Drinking Water

**EPA 200.8:** Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

**EPA 300.0:** Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

**EPA 332:** Perchlorate.

**Microbiology:** **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

#### Non-Potable Water

**EPA 200.8:** Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

**EPA 200.7:** Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

**EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1:** Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F,**

**EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4,**

**SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

**EPA 624:** Volatile Halocarbons & Aromatics,

**EPA 608:** Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

**EPA 625:** SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

**Microbiology:** **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

## WORK/QUALITY ASSURANCE PROJECT PLAN

### 1.0 GENERAL PROJECT INFORMATION

**Project Title:** USACE-NAE New Bedford Harbor LTM MDL Study  
**Project Number:** 100053747  
**Client:** USACE/NAE  
696 Virginia Road  
Concord, MA 01742  
USA  
**Client Contact Information:** Peter Hugh  
Engineering Technical Lead  
(978) 318-8452(V)  
NA  
NA  
**Effective Date of QAPP:** 10/9/2014  
**Version Number:** 100053747(S)-02  
**Project Manager:** Peven-McCarthy, Carole  
**Laboratory Task Manager:** Peven-McCarthy, Carole  
**Deliverable Due Date:** 11/3/2014

### 2.0 SCOPE OF WORK

**Overview:** A project-specific MDL study is required for this project.  
**Matrix:** Soil/Sediment

### 2.1 TECHNICAL APPROACH

#### 2.1.1 Sample Receipt, Storage, and Handling

The list of samples for this project plan are presented in Attachment 1.

**Storage Directions:** Store frozen.  
**Sub\_Sampling:** None  
**Procedures:** NA  
**Contact:** NA  
**Comment:** NA

## WORK/QUALITY ASSURANCE PROJECT PLAN

### 2.1.2 Sample Preparation

NA

| Samples Expected: | Samples Per Batch: | Batches Expected: |
|-------------------|--------------------|-------------------|
|                   | 20                 |                   |

Batch quality control samples are defined in Table 1.

Target samples are presented in Attachment 1.

**Table 1: Quality Control Samples**

| Type: | Description:                      | Count:      | Rgt: | Reference:                                    | Comment: |
|-------|-----------------------------------|-------------|------|---|----------|
| PB    | Laboratory control reagent blank. | 1 per batch | --   | NA  |          |
| LCS   | Laboratory Control Sample         | 1 per batch | No   | NA  |          |
| MDL   | Method Detection Limits           | 8 per batch | Yes  | 140304-02: Mud Dump Reference N4415 Lot:N4415 |          |

### 2.1.3 Extraction/Preparation

#### 2.1.3.1 Extraction

|                           |  |
|---------------------------|--|
| SOP No.-Rev:              | <b>5-192-14</b>  |
| SOP Title:                | <i>Soil/Sediment Extraction for Trace Level Semi-Volatile Organic Contaminant Analysis</i> |
| Sample Size:              | 10 g   |
| SIS and LCS/MS Compounds: | Defined in Table 2.  |
| Deviations:               | NA   |
| Comments:                 | NA   |

**Table 2: SIS and LCS/MS Spiking Level**

| Standard Type       | Standard Contents | Spike Amount (ng) | Volume (uL) | Comment     |
|---------------------|-------------------|-------------------|-------------|-------------|
| PCB Surrogate       | ID59 SIS          | ~ 100 ng          | 100 uL      | NA          |
| ECD LCS/MS Solution | HX10 LCS/MS       | ~ 38 - 150 ng     | 75 uL       | LCS         |
| PDL spike ECD       | ID73 LCS/MS       | ~ 7.5 - 30.0 ng   | 150 uL      | MDL samples |

#### 2.1.3.2 Cleanup

## WORK/QUALITY ASSURANCE PROJECT PLAN

- |    |              |   |
|----|--------------|---|
| 1) | SOP No.-Rev: | <b>5-328-04</b>   |
|    | SOP Title:   | <i>Removal (cleanup) of Sulfur from Environmental Sample Extracts</i> |
|    | Deviations:  | NA  |
|    | Comments:    | NA  |
| 2) | SOP No.-Rev: | <b>5-327-04</b>   |
|    | SOP Title:   | <i>Florisil Cleanup of Environmental Sample Extracts</i>              |
|    | Deviations:  | Elute with Hexane only  |
|    | Comments:    | NA  |

RIS spiking levels are presented in Table 3.

Extract PIV (uL): 1000

**Table 3: RIS Spiking Level**

| Standard Type | Standard Contents | Spike Amount (ng) | Volume (uL) | Comment |
|---------------|-------------------|-------------------|-------------|---------|
| PCB IS        | IE11 RIS          | ~ 100 ng          | 100 uL      | NA      |

### 2.1.4 Instrumental Analysis

The list of analytes along with data quality criteria are presented in Attachment 2.

- |    |             |   |
|----|-------------|---|
| 1) | SOP_No-Rev: | <b>5-128-13</b>   |
|    | SOP_Title:  | <i>Identification and Quantification of Polychlorinated Biphenyls (By Congener and Aroclor) and Chlorinated Pesticides by Gas Chromatography/Electron Capture Detection</i> |
|    | Deviations: | NA  |
|    | Comments:   | Report SIS corrected data   |

### 2.2. DELIVERABLES

|                          |           |
|--------------------------|-----------|
| <b>Deliverables Due:</b> | 11/3/2014 |
| <b>LIMS Reports:</b>     | Yes       |
| <b>Histograms:</b>       | No        |
| <b>Excel Tables:</b>     | Yes       |
| <b>EICs:</b>             | No        |
| <b>Chromatograms:</b>    | No        |

## WORK/QUALITY ASSURANCE PROJECT PLAN

**EDDs:** *Yes*

**Comments:**

Required 30 day TAT.

EDD required.

Full data package (pdf) required for external validation.

Detailed quant reports are not required.

### 3.0 QUALITY

The Method Quality Objectives are defined in Attachment 3.

### 4.0 ORGANIZATION AND COMMUNICATION

#### 4.1 ORGANIZATION

The project team is defined in Table 4. Supervisors may make substitutions with Project Manager concurrence.

**Table 4: Project Team and Roles**

| Staff Member             | Role                    | Comment |
|--------------------------|-------------------------|---------|
| Carole S. Peven-McCarthy | Project Manager         | NA      |
| Samuel A. Guimaraes      | Sample Preparation      | NA      |
| Richard P. Restucci Jr   | GC/ECD Analysis         | NA      |
| Matt D. Schumitz         | Sample Custody          | NA      |
| Carla R. Devine          | Quality Control Officer | NA      |

#### 4.2 COMMUNICATION

A kick-off meeting will be held to discuss project scope and goals.

### 5.0 SCHEDULE

The project schedule is presented in Table 5.

**Table 5. Schedule of Laboratory Activities**

| Activity:           | Start Date: | End Date:  | TAT (days): | Comment: |
|---------------------|-------------|------------|-------------|----------|
| Sample Receipt      | 10/03/2014  | NA         | 0           | NA       |
| Sample Preparation  | 10/06/2014  | 10/09/2014 | 3           | NA       |
| Instrument Analysis | 10/09/2014  | 10/24/2014 | 15          | NA       |

## WORK/QUALITY ASSURANCE PROJECT PLAN

| Activity:              | Start Date: | End Date:  | TAT<br>(days): | Comment: |
|------------------------|-------------|------------|----------------|----------|
| Quality Control Review | 10/27/2014  | 10/29/2014 | 2              | NA       |
| Final Data Reporting   | 10/29/2014  | 10/31/2014 | 2              | NA       |

### 6.0 BUDGET

The labor budget for the analytical task is presented in Table 6.

**Table 6. Labor Budget (Laboratory Analytical Task)**

| Labor Activity:        | Hours/<br>Batch: | Batches: | Total<br>Hours: | Comment: |
|------------------------|------------------|----------|-----------------|----------|
| Sample Receipt         | 1                | 1        | 1               | NA       |
| Sample Preparation     | 24               | 1        | 24              | NA       |
| <i>Extraction</i>      | 20               |          |                 |          |
| <i>glassware</i>       | 4                |          |                 |          |
| Instrument Analysis    | 16               | 1        | 16              | NA       |
| <i>GC/ECD</i>          | 16               |          |                 |          |
| Quality Control Review | 3                | 1        | 3               | NA       |
| Final Data Reporting   | 1                | 1        | 1               | NA       |

## WORK/QUALITY ASSURANCE PROJECT PLAN

### Attachment 3: Method Quality Objectives

| <b>MQO Application</b>                 |   | <b>USACE/NBH LTMP</b> |  |
|--|---|-----------------------|--|
| <b>MQO:</b>                            | <b>Acceptance Criteria</b>  | <b>Qual:</b>          | <b>Corrective Action:</b>  |
| Procedural Blank                       | Samples must be greater than five times the blank concentration (>5xPB).  | B                     | Review with Project Manager; re-analyze or justify results in project records.               |
| PB Measurement Quality Objective       | Organic results in the Procedural Blank are less than the ssRL (<ssRL)  | N                     |  |
| Laboratory Control Sample              | Recovery values 70-130%.  | N                     | Review with project manager; re-analyze or justify reporting the results in project records. |
| Matrix Spike Recovery                  | Organics 70-130%. Analyte concentration in MS must be >5 times reported background concentration.   | N                     | Review with Project Manager; re-analyze or justify reporting results in the project records. |
|  | Organics Results in the Target is less than 5 times the Original  | n                     |  |
| Matrix Spike/Spike Duplicate Precision | Organics results less than 30% Relative Percent Difference (RPD). Spike must be >5x background concentration.   | N                     | Review with Project Manager; re-analyze or justify reporting results in the project records. |
|  | Organics Results in the Target is less than 5 times the Original  | n                     |  |
| Standard Reference Material Accuracy   | Organics Percent Difference less than 30% from a range of certified values on average. Analyte concentration must be greater than five times the Method Detection Limit (>5xMDL). | N                     | Review with Project Manager; re-analyze or justify reporting results in the project records. |
|  | Organics Results in the Target is less than 5 times the MDL   | n                     |  |
| Analytical Duplicate Precision         | Organics results less than 30% Relative Percent Difference (RPD). Concentration must be >10X the MDL.   | N                     | Review with Project Manager; re-analyze or justify reporting results in the project records. |
|  | Organics Results in the Original is less than 10 times the MDL  | n                     |  |
| Analytical Triplicate Precision        | Organics results less than 30% Relative Standard Deviation (RSD). Concentration must be >10X the MDL.   | N                     | Review with Project Manager; re-analyze or justify reporting results in the project records. |
|  | Organics Results in the Original is less than 10 times the MDL  | n                     |  |

## WORK/QUALITY ASSURANCE PROJECT PLAN

### Attachment 3: Method Quality Objectives

| <b>MQO Application</b>                 |   | <b>USACE/NBH LTMP</b> |  |
|--|---|-----------------------|--|
| <b>MQO:</b>                            | <b>Acceptance Criteria</b>  | <b>Qual:</b>          | <b>Corrective Action:</b>  |
| Surrogate Compound Recovery            | Recovery results between 40% and 120%.  | N                     | Review with Project Manager; re-analyze or justify reporting results in the project records.   |
| Control Oil                            | RPD < 30% for at least 90% of analytes  | N                     | Results examined by project manager, task leader, or subcontractor lab manager. Reextraction, reanalysis, or justification documented. |
| Instrument Calibration                 | 5-128-13: R-squared greater than or equal to 0.995<br>Mean RSD less than or equal to 15%,<br>Individual RSD less than or equal to 25% | N                     | Results examined by project manager, task leader, or subcontractor lab manager. Reextraction, reanalysis, or justification documented. |
| Independent Calibration Check Solution | 5-128-13: Individual PD less than or equal to 20%.<br>Mean Percent Difference less than or equal to 20%.                              | N                     | Review with Project Manager; re-analyze or justify in project records.   |
| Continuing Calibration Verification    | 5-128-13: Individual PD less than or equal to 20%.<br>Mean Percent Difference less than or equal to 15%.                              | N                     |  |

## Sample Receipt Form

Approved:  Authorized:

Project Number: \_\_\_\_\_ Client: \_\_\_\_\_

Received by: Schumitz, Matt Date/Time Received: Friday, September 26, 2014 12:00 AM

No. of Shipping Containers: 1

### SHIPMENT

Method of Delivery: Hand Delivered Tracking Number: NA

COC Forms:  Shipped with samples  No Forms

### Cooler(s)/Box(es)

| Cntr   | Type   | Tracking No. | Seal | Seal Condition | Container Condition | Temp C | Smps |
|--------|--------|--------------|------|----------------|---------------------|--------|------|
| 1 of 1 | Cooler |              | None | Intact         | Intact              | 1.0    | 23   |

### Samples

Sample Labels:  Sample labels agree with COC forms  
 Discrepancies (see Sample Custody Corrective Action Form)

Container Seals:  Tape  Custody Seals  Other Seals (See sample Log)  
 Seals intact for each shipping container  
 Seals broken (See sample log for impacted samples)

Condition of Samples:  Sample containers intact  
 Sample containers broken/leaking (See Custody Corrective Action Form)

Temperature upon receipt (°C): 1 Temperature Blank used  Yes  No  
*(Note: If temperature upon receipt differs from required conditions, see sample log comment field)*

Samples Acidified:  Yes  No  Unknown

Initial pH 5-9?:  Yes  No  NA  
*If no, individual sample adjustments on the Auxiliary Sample Receipt Form*

Total Residual Chlorine Present?:  Yes  No  NA  
*If yes, individual sample adjustments on the Auxiliary Sample Receipt Form*

Head Space <1% in samples for water VOC analysis:  Yes  No  NA  
*Individual sample deviations noted on sample log*

Samples Containers:  
Samples returned in PC-grade jars:  Yes  No  Unknown /Lot No.: UnKnown

Storage Location: Custody: Freezer - F0117 (NA) BDO IDs Assigned: M8152 - M8174

# Sample Receipt Form

Approved:  Authorized

Project Number: 100043429 Client: USACE  
Received by: Schumitz, Matt Date/Time Received: Wednesday, October 01, 2014 12:00 AM  
No. of Shipping Containers: 1

## SHIPMENT

Method of Delivery: Hand Delivered Tracking Number: NA  
COC Forms:  Shipped with samples  No Forms

## Cooler(s)/Box(es)

| Cntr   | Type   | Tracking No. | Seal          | Seal Condition | Container Condition | Temp C | Smps |
|--------|--------|--------------|---------------|----------------|---------------------|--------|------|
| 1 of 1 | Cooler | NA           | Custody Seals | Intact         | Intact              | 1.2    | 60   |

## Samples

Sample Labels:  Sample labels agree with COC forms  
 Discrepancies (see Sample Custody Corrective Action Form)

Container Seals:  Tape  Custody Seals  Other Seals (See sample Log)  
 Seals intact for each shipping container  
 Seals broken (See sample log for impacted samples)

Condition of Samples:  Sample containers intact  
 Sample containers broken/leaking (See Custody Corrective Action Form)

Temperature upon receipt (°C): 1.2 Temperature Blank used  Yes  No  
*(Note: If temperature upon receipt differs from required conditions, see sample log comment field)*

Samples Acidified:  Yes  No  Unknown

Initial pH 5-9?:  Yes  No  NA  
*If no, individual sample adjustments on the Auxiliary Sample Receipt Form*

Total Residual Chlorine Present?:  Yes  No  NA  
*If yes, individual sample adjustments on the Auxiliary Sample Receipt Form*

Head Space <1% in samples for water VOC analysis:  Yes  No  NA  
*Individual sample deviations noted on sample log*

Samples Containers:  
Samples returned in PC-grade jars:  Yes  No  Unknown /Lot No.: UnKnown

Storage Location: Custody: Freezer - F0113 (NA) BDO IDs Assigned: M8347 - M8406

## Glossary of Data Qualifiers

**Flag: Application:**

---

- B Analyte concentration found in the sample at a concentration <5x the level found in the procedural blank.
- D Dilution Run. Initial run outside linear range of instrument.
- E Estimate, result is greater than the highest concentration level in the calibration.
- H Surrogate diluted out. Used when surrogate recovery is affected by excessive dilution of the sample extract.
- J Analyte detected below the sample-specific Reporting Limit (RL).
- m Confirmation column manually over-ridden by analyst, dual column quantitative analysis only.
- ME Significant Matrix Interference - Estimated value.
- MI Significant Matrix Interference - value could not be determined or estimated.
- n Quality Control (QC) value is outside the accuracy or precision Data Quality Objective (DQO), but meets the contingency criteria.
- N Quality Control (QC) value is outside the accuracy or precision Data Quality Objective (DQO)
- NA Not applicable
- p Dual column value exceeds RPD criteria, dual column quantitative analysis only.
- T Holding Time (HT) exceeded.
- U Analyte not detected at 3:1 signal:noise ratio.

|--------------------|---|
| Corrective Actions | NA  |
| Sample Storage     | The sediment samples were stored frozen until extraction. |
| Related samples    | NA  |

**METHOD SUMMARIES**

|                    |  |
|--------------------|--|
| Sample Preparation | <p>Prior to sediment extraction, an aliquot of approximately 30 g of wet sediment was placed on clean, labeled aluminum foil, covered and placed in a laboratory laminar flow hood to dry the sample to &lt;50% moisture. Aliquots of these dried samples were weighed into sample extraction vessels for sample extraction. Approximately 1 to 10 g sediment was weighed out for extraction (sample weight based on historical analysis results). The sediments were spiked with surrogates, extracted three times with methylene chloride, and the extracts combined, dried over anhydrous sodium sulfate, and concentrated. The concentrated extracts were processed through Florisil to isolate the PCBs, followed by activated copper treatment to remove sulfur. The cleaned extract was concentrated and fortified with internal standard (IS) compounds prior to analysis by GC/ECD.</p> |
| Prep Comments      | No comments.   |

|                   |   |
|-------------------|---|
| Analysis          | <p>PCBs were analyzed by gas chromatography electron capture detection (GC/ECD). An initial calibration consisting of target analytes was analyzed prior to sample analysis to demonstrate the linear range. Calibration verification was performed at the beginning and end of each 24-hr period in which samples were analyzed. Concentrations of target compounds were calculated versus internal standards using the average response factors (RF) generated from the initial calibration.</p>  |
| Analysis Comments | <ul style="list-style-type: none"> <li>Some congener concentrations were anomalous with surrounding analyte concentrations, or obvious chromatographic interferences were present, likely non-target congeners. In cases where an inflection point was detected in the affected peak, a vertical integration was performed inside the peak to better represent the detected congener. Specific peaks where these interferences present themselves are PCBs 96, 28, 66, and 101. As these interferences are not matrix derived, but stem from</li> </ul> |

**QA/QC Summary  
Batch 14-0493**

|  |   |
|--|---|
|  | <p>additional, non-target congeners, the analytes are not ME qualified. A graphical representation of PCB 66 in sample M8402-P-D(5) is located in the unused data section for reference.</p> <ul style="list-style-type: none"> <li>• In cases where a congener exhibits dilution level concentrations on one column, but not the other, both columns are reported from dilution for consistency.</li> <li>• In cases where p qualifiers are present, integrations and data were reviewed.</li> <li>• Method MM0417B is a 6pt quadratic method used to quant all samples. After this batch was quantified, the analyst noticed that PCB 101 was identified incorrectly on the secondary (confirmation) column. A new method was created for PCB 101 only, and the samples re-quantified with the correctly identified peak. Method MM0417F is a 6pt quadratic method used to quant all undiluted samples and relevant dilutions for PCB 101.</li> </ul> |
|--|---|

| Holding Times | Extraction Date(s) | Analysis Date(s)  |
|---------------|--------------------|---|
|               | 10/20/2014         | 10/26-27/2014; 10/29-30/2014;<br>10/31/2014; 11/15/2014 |

|                       |  |
|-----------------------|--|
| Procedural Blank (PB) | A PB was prepared with this analytical batch to ensure the sample extraction and analysis methods are free of contamination. |
| Blank value <5x ssMDL | No exceedences noted.  |
| Samples >5X PB        | No comments.   |

|                          |   |
|--------------------------|---|
| Laboratory Control Spike | A LCS was prepared with this analytical batch. The percent recoveries of target analytes were calculated to measure accuracy. |
| 70-130% recovery         | No exceedences noted.   |
|                          | No comments.  |

|  |   |
|--|---|
| Matrix Spike (MS)/Matrix Spike Duplicate (MSD) | A MS/MSD pair was prepared with this analytical batch. The percent recoveries of target analytes were calculated to measure accuracy. The relative percent difference (RPD) was calculated to measure data quality in terms of precision. |
| 70-130% recovery                               | No exceedences noted  |
| <30% RPD                                       | No comments.  |
| Spike must be >5x bkgd conc.                   |   |

Batch 14-0493**

|                        |   |
|------------------------|---|
| Sample Duplicate (DUP) | A laboratory duplicate of one sediment was prepared with the analytical batch. The relative percent difference (RPD) was calculated to measure data quality in terms of precision. <b>NOTE: This QC sample was inadvertently included in the sample batch instead of the requested SRM.</b> |
| <30% RPD               | No exceedences noted.   |
| Conc must be >10X MDL  | No comments.  |

|                    |  |
|--------------------|--|
| Surrogate Recovery | Surrogate compounds were added prior to extraction. The surrogate recoveries are calculated to measure extraction efficiency.  |
| 40-120% recovery   | Two exceedences noted.<br>Original, undiluted sample M8402-P(2) exhibits high levels of target analytes which interfere with SIS and IS. The primary dilution is used as the primary file for this sample, where the SIS are diluted out. SIS are appropriately H qualified. The data for this sample are not surrogate corrected. |

|                            |  |
|----------------------------|--|
| Initial Calibration (ICAL) | The GC/ECD was calibrated with six-level quadratic calibration curve for all compounds using an instrument response factor (RF). |
| $R^2 \geq 0.995$           | No exceedences noted.<br>No comments.  |

|  |   |
|--|---|
| Independent Calibration Check (ICC)        | The independent check was run after each initial calibration to verify the calibration. This standard is from a different source than the ICAL. |
| $\leq 20\%$ difference individual and mean | No exceedences noted.<br>No comments.   |

|  |   |
|--|---|
| Continuing Calibration Verification (CCV)                      | Continuing calibration standards were run every 24 hours to ensure that initial calibration is still valid. |
| $\leq 20\%$ difference individual; $\leq 15\%$ difference mean | No exceedences noted.<br>No comments.   |

## BATTELLE - DUXBURY OPERATIONS MISCELLANEOUS DOCUMENTATION FORM

**Project Title:** USACE/NAE - New Bedford Harbor LTM      **Data Set Number:** DP-14-0675  
**Project Number:** 100053747      **Prep Batch Number:** 14-0493  
**Entered By:** Richard Restucci Jr      **Entered On:** 11/18/2014  
**Test Code (Matrix Type):** Master\_128(S)

Integrations by Rich Restucci.  
RR 11/18/14

Method MM0417B is a 6pt quadratic method used to quant all samples. After this batch was quantified, the analyst noticed that PCB 101 was identified incorrectly on the secondary (confirmation) column. A new method was created for PCB 101 only, and the samples re-quantified with the correctly identified peak.

Method MM0417F is a 6pt quadratic method used to quant all undiluted samples and relevant dilutions for PCB 101.  
RR 11/18/14

Some congener concentrations were anomalous with surrounding analyte concentrations, or obvious chromatographic interferences were present, likely non-target congeners. In cases where an inflection point was detected in the affected peak, a vertical integration was performed inside the peak to better represent the detected congener. Specific peaks where these interferences present themselves are PCBs 96, 28, 66, and 101. As these interferences are not matrix derived, but stem from additional, non-target congeners, the analytes are not ME qualified. A graphical representation of PCB 66 in sample M8402-P-D(5) is located in the unused data section for reference.  
RR 11/18/14

In cases where a congener exhibits dilution level concentrations on one column, but not the other, both columns are reported from dilution for consistency.  
RR 11/18/14

In cases where p qualifiers are present, integrations and data were reviewed.  
RR 11/18/14

## Calibration Response Factor Report

**Batch:** 14-0493      **Project Test Code:** Master 128(S)      RFS validated CRD 12/9/2014  
**Data Set:** DP-14-0675      **SOP\_NO:** 5-128-13  
**Project Number:** 100053747      **Project Name:** USACE/NAE - New Bedford Harbor LTM Study

**File:** MM0417B.M      **Responses Via** Initial Calibration      **Last Updated** 10/28/2014 9:02:00 AM      **Title:** NBH  
**Instrument:** Inst. M      **Operator:** RR      **Path:** I:\M\DATA\MM0417B.M

## WORK/QUALITY ASSURANCE PROJECT PLAN

### 1.0 GENERAL PROJECT INFORMATION

**Project Title:** USACE-NAE New Bedford Harbor LTM MDL Study  
**Project Number:** 100053747  
**Client:** USACE/NAE  
696 Virginia Road  
Concord, MA 01742  
USA  
**Client Contact Information:** Peter Hugh  
Engineering Technical Lead  
(978) 318-8452(V)  
NA  
NA  
**Effective Date of QAPP:** 10/9/2014  
**Version Number:** 100053747(S)-02  
**Project Manager:** Peven-McCarthy, Carole  
**Laboratory Task Manager:** Peven-McCarthy, Carole  
**Deliverable Due Date:** 11/3/2014

### 2.0 SCOPE OF WORK

**Overview:** A project-specific MDL study is required for this project.  
**Matrix:** Soil/Sediment

### 2.1 TECHNICAL APPROACH

#### 2.1.1 Sample Receipt, Storage, and Handling

The list of samples for this project plan are presented in Attachment 1.

**Storage Directions:** Store frozen.  
**Sub\_Sampling:** None  
**Procedures:** NA  
**Contact:** NA  
**Comment:** NA  
**Archiving:** NA  
**Disposal:** NA

## WORK/QUALITY ASSURANCE PROJECT PLAN

### 2.1.2 Sample Preparation

NA

| Samples Expected: | Samples Per Batch: | Batches Expected: |
|-------------------|--------------------|-------------------|
|                   | 20                 |                   |

Batch quality control samples are defined in Table 1.

Target samples are presented in Attachment 1.

**Table 1: Quality Control Samples**

### 2.1.3 Extraction/Preparation

#### 2.1.3.1 Extraction

|                           |  |
|---------------------------|--|
| SOP No.-Rev:              | <b>5-192-14</b>  |
| SOP Title:                | <i>Soil/Sediment Extraction for Trace Level Semi-Volatile Organic Contaminant Analysis</i> |
| Sample Size:              | 10 g   |
| SIS and LCS/MS Compounds: | Defined in Table 2.  |
| Deviations:               | NA   |
| Comments:                 | NA   |

**Table 2: SIS and LCS/MS Spiking Level**

| Standard Type       | Standard Contents | Spike Amount (ng) | Volume (uL) | Comment     |
|---------------------|-------------------|-------------------|-------------|-------------|
| PCB Surrogate       | ID59 SIS          | ~ 100 ng          | 100 uL      | NA          |
| ECD LCS/MS Solution | HX10 LCS/MS       | ~ 38 - 150 ng     | 75 uL       | LCS         |
| PDL spike ECD       | ID73 LCS/MS       | ~ 7.5 - 30.0 ng   | 150 uL      | MDL samples |

#### 2.1.3.2 Cleanup

## WORK/QUALITY ASSURANCE PROJECT PLAN

- |    |              |   |
|----|--------------|---|
| 1) | SOP No.-Rev: | <b>5-328-04</b>   |
|    | SOP Title:   | <i>Removal (cleanup) of Sulfur from Environmental Sample Extracts</i> |
|    | Deviations:  | NA  |
|    | Comments:    | NA  |
| 2) | SOP No.-Rev: | <b>5-327-04</b>   |
|    | SOP Title:   | <i>Florisil Cleanup of Environmental Sample Extracts</i>              |
|    | Deviations:  | Elute with Hexane only  |
|    | Comments:    | NA  |

RIS spiking levels are presented in Table 3.

Extract PIV (uL): 1000

**Table 3: RIS Spiking Level**

| Standard Type | Standard Contents | Spike Amount (ng) | Volume (uL) | Comment |
|---------------|-------------------|-------------------|-------------|---------|
| PCB IS        | IE11 RIS          | ~ 100 ng          | 100 uL      | NA      |

### 2.1.4 Instrumental Analysis

The list of analytes along with data quality criteria are presented in Attachment 2.

- |    |             |   |
|----|-------------|---|
| 1) | SOP_No-Rev: | <b>5-128-13</b>   |
|    | SOP_Title:  | <i>Identification and Quantification of Polychlorinated Biphenyls (By Congener and Aroclor) and Chlorinated Pesticides by Gas Chromatography/Electron Capture Detection</i> |
|    | Deviations: | NA  |
|    | Comments:   | Report SIS corrected data   |

### 2.2. DELIVERABLES

|                          |            |
|--------------------------|------------|
| <b>Deliverables Due:</b> | 11/3/2014  |
| <b>LIMS Reports:</b>     | <i>Yes</i> |
| <b>Histograms:</b>       | <i>No</i>  |
| <b>Excel Tables:</b>     | <i>Yes</i> |
| <b>EICs:</b>             | <i>No</i>  |
| <b>Chromatograms:</b>    | <i>No</i>  |

## WORK/QUALITY ASSURANCE PROJECT PLAN

**EDDs:** *Yes*

**Comments:**

Required 30 day TAT.

EDD required.

Full data package (pdf) required for external validation.

Detailed quant reports are not required.

### 3.0 QUALITY

The Method Quality Objectives are defined in Attachment 3.

### 4.0 ORGANIZATION AND COMMUNICATION

#### 4.1 ORGANIZATION

The project team is defined in Table 4. Supervisors may make substitutions with Project Manager concurrence.

**Table 4: Project Team and Roles**

| Staff Member             | Role                    | Comment |
|--------------------------|-------------------------|---------|
| Carole S. Peven-McCarthy | Project Manager         | NA      |
| Samuel A. Guimaraes      | Sample Preparation      | NA      |
| Richard P. Restucci Jr   | GC/ECD Analysis         | NA      |
| Matt D. Schumitz         | Sample Custody          | NA      |
| Carla R. Devine          | Quality Control Officer | NA      |

#### 4.2 COMMUNICATION

A kick-off meeting will be held to discuss project scope and goals.

### 5.0 SCHEDULE

The project schedule is presented in Table 5.

**Table 5. Schedule of Laboratory Activities**

| Activity:           | Start Date: | End Date:  | TAT (days): | Comment: |
|---------------------|-------------|------------|-------------|----------|
| Sample Receipt      | 10/03/2014  | NA         | 0           | NA       |
| Sample Preparation  | 10/06/2014  | 10/09/2014 | 3           | NA       |
| Instrument Analysis | 10/09/2014  | 10/24/2014 | 15          | NA       |

## WORK/QUALITY ASSURANCE PROJECT PLAN

| Activity:              | Start Date: | End Date:  | TAT<br>(days): | Comment: |
|------------------------|-------------|------------|----------------|----------|
| Quality Control Review | 10/27/2014  | 10/29/2014 | 2              | NA       |
| Final Data Reporting   | 10/29/2014  | 10/31/2014 | 2              | NA       |

### 6.0 BUDGET

The labor budget for the analytical task is presented in Table 6.

**Table 6. Labor Budget (Laboratory Analytical Task)**

| Labor Activity:        | Hours/<br>Batch: | Batches: | Total<br>Hours: | Comment: |
|------------------------|------------------|----------|-----------------|----------|
| Sample Receipt         | 1                | 1        | 1               | NA       |
| Sample Preparation     | 24               | 1        | 24              | NA       |
| <i>Extraction</i>      | 20               |          |                 |          |
| <i>glassware</i>       | 4                |          |                 |          |
| Instrument Analysis    | 16               | 1        | 16              | NA       |
| <i>GC/ECD</i>          | 16               |          |                 |          |
| Quality Control Review | 3                | 1        | 3               | NA       |
| Final Data Reporting   | 1                | 1        | 1               | NA       |

## Sample Receipt Form

Approved:  Authorized

Project Number: \_\_\_\_\_ Client: \_\_\_\_\_

Received by: Schumitz, Matt Date/Time Received: Friday, September 26, 2014 12:00 AM

No. of Shipping Containers: 1

### SHIPMENT

Method of Delivery: Hand Delivered Tracking Number: NA

COC Forms:  Shipped with samples  No Forms

### Cooler(s)/Box(es)

| Cntr   | Type   | Tracking No. | Seal | Seal Condition | Container Condition | Temp C | Smps |
|--------|--------|--------------|------|----------------|---------------------|--------|------|
| 1 of 1 | Cooler |              | None | Intact         | Intact              | 1.0    | 23   |

### Samples

Sample Labels:  Sample labels agree with COC forms  
 Discrepancies (see Sample Custody Corrective Action Form)

Container Seals:  Tape  Custody Seals  Other Seals (See sample Log)  
 Seals intact for each shipping container  
 Seals broken (See sample log for impacted samples)

Condition of Samples:  Sample containers intact  
 Sample containers broken/leaking (See Custody Corrective Action Form)

Temperature upon receipt (°C): 1 Temperature Blank used  Yes  No  
*(Note: If temperature upon receipt differs from required conditions, see sample log comment field)*

Samples Acidified:  Yes  No  Unknown

Initial pH 5-9?:  Yes  No  NA  
*If no, individual sample adjustments on the Auxiliary Sample Receipt Form*

Total Residual Chlorine Present?:  Yes  No  NA  
*If yes, individual sample adjustments on the Auxiliary Sample Receipt Form*

Head Space <1% in samples for water VOC analysis:  Yes  No  NA  
*Individual sample deviations noted on sample log*

Samples Containers:  
Samples returned in PC-grade jars:  Yes  No  Unknown /Lot No.: UnKnown

Storage Location: Custody: Freezer - F0117 (NA) BDO IDs Assigned: M8152 - M8174

# Sample Receipt Form

Approved:  Authorized

Project Number: 100043429 Client: USACE  
Received by: Schumitz, Matt Date/Time Received: Wednesday, October 01, 2014 12:00 AM  
No. of Shipping Containers: 1

## SHIPMENT

Method of Delivery: Hand Delivered Tracking Number: NA  
COC Forms:  Shipped with samples  No Forms

## Cooler(s)/Box(es)

| Cntr   | Type   | Tracking No. | Seal          | Seal Condition | Container Condition | Temp C | Smps |
|--------|--------|--------------|---------------|----------------|---------------------|--------|------|
| 1 of 1 | Cooler | NA           | Custody Seals | Intact         | Intact              | 1.2    | 60   |

## Samples

Sample Labels:  Sample labels agree with COC forms  
 Discrepancies (see Sample Custody Corrective Action Form)

Container Seals:  Tape  Custody Seals  Other Seals (See sample Log)  
 Seals intact for each shipping container  
 Seals broken (See sample log for impacted samples)

Condition of Samples:  Sample containers intact  
 Sample containers broken/leaking (See Custody Corrective Action Form)

Temperature upon receipt (°C): 1.2 Temperature Blank used  Yes  No  
*(Note: If temperature upon receipt differs from required conditions, see sample log comment field)*

Samples Acidified:  Yes  No  Unknown

Initial pH 5-9?:  Yes  No  NA  
*If no, individual sample adjustments on the Auxiliary Sample Receipt Form*

Total Residual Chlorine Present?:  Yes  No  NA  
*If yes, individual sample adjustments on the Auxiliary Sample Receipt Form*

Head Space <1% in samples for water VOC analysis:  Yes  No  NA  
*Individual sample deviations noted on sample log*

Samples Containers:  
Samples returned in PC-grade jars:  Yes  No  Unknown /Lot No.: UnKnown

Storage Location: Custody: Freezer - F0113 (NA) BDO IDs Assigned: M8347 - M8406

## Glossary of Data Qualifiers

**Flag: Application:**

---

- B Analyte concentration found in the sample at a concentration <5x the level found in the procedural blank.
- D Dilution Run. Initial run outside linear range of instrument.
- E Estimate, result is greater than the highest concentration level in the calibration.
- H Surrogate diluted out. Used when surrogate recovery is affected by excessive dilution of the sample extract.
- J Analyte detected below the sample-specific Reporting Limit (RL).
- m Confirmation column manually over-ridden by analyst, dual column quantitative analysis only.
- ME Significant Matrix Interference - Estimated value.
- MI Significant Matrix Interference - value could not be determined or estimated.
- n Quality Control (QC) value is outside the accuracy or precision Data Quality Objective (DQO), but meets the contingency criteria.
- N Quality Control (QC) value is outside the accuracy or precision Data Quality Objective (DQO)
- NA Not applicable
- p Dual column value exceeds RPD criteria, dual column quantitative analysis only.
- T Holding Time (HT) exceeded.
- U Analyte not detected at 3:1 signal:noise ratio.

**QA/QC Summary

|                   |   |
|-------------------|---|
| Project:          | USACE/NAE – New Bedford Harbor Long Term Monitoring |
| Parameters:       | PCB Congeners (NOAA 18)                             |
| Laboratory:       | Battelle, Norwell, MA                               |
| Matrix:           | Sediment  |
| Data Set:         | DP-14-0676  |
| Analytical SOP:   | 5-128   |
| Method Reference: | EPA Method 8081 and 8082A (modified)                |

**Sample Custody**

| Collection Date | Receipt Date    | Temp (°C) |
|-----------------|-----------------|-----------|
| 9/22-30/2014    | 9/26, 10/1/2014 | 1.0, 1.2  |

|                    |   |
|--------------------|---|
| Corrective Actions | NA  |
| Sample Storage     | The sediment samples were stored frozen until extraction. |
| Related samples    | NA  |

**METHOD SUMMARIES**

|                    |  |
|--------------------|--|
| Sample Preparation | <p>Prior to sediment extraction, an aliquot of approximately 30 g of wet sediment was placed on clean, labeled aluminum foil, covered and placed in a laboratory laminar flow hood to dry the sample to &lt;50% moisture. Aliquots of these dried samples were weighed into sample extraction vessels for sample extraction. Approximately 1 to 10 g sediment was weighed out for extraction (sample weight based on historical analysis results). The sediments were spiked with surrogates, extracted three times with methylene chloride, and the extracts combined, dried over anhydrous sodium sulfate, and concentrated. The concentrated extracts were processed through Florisil to isolate the PCBs, followed by activated copper treatment to remove sulfur. The cleaned extract was concentrated and fortified with internal standard (IS) compounds prior to analysis by GC/ECD.</p> |
| Prep Comments      | No comments.   |

|                   |   |
|-------------------|---|
| Analysis          | <p>PCBs were analyzed by gas chromatography electron capture detection (GC/ECD). An initial calibration consisting of target analytes was analyzed prior to sample analysis to demonstrate the linear range. Calibration verification was performed at the beginning and end of each 24-hr period in which samples were analyzed. Concentrations of target compounds were calculated versus internal standards using the average response factors (RF) generated from the initial calibration.</p>  |
| Analysis Comments | <ul style="list-style-type: none"> <li>Some congener concentrations were anomalous with surrounding analyte concentrations, or obvious chromatographic interferences were present, likely non-target congeners. In cases where an inflection point was detected in the affected peak, a vertical integration was performed inside the peak to better represent the detected congener. Specific peaks where these interferences present themselves are PCBs 96, 28, 66, and 101. As these interferences are not matrix derived, but stem from</li> </ul> |

**QA/QC Summary  
Batch 14-0494**

|  |   |
|--|---|
|  | <p>additional, non-target congeners, the analytes are not ME qualified. A graphical representation of PCB 66 in sample M8402-P-D(5) is located in the unused data section for reference.</p> <ul style="list-style-type: none"> <li>• In cases where a congener exhibits dilution level concentrations on one column, but not the other, both columns are reported from dilution for consistency.</li> <li>• In cases where p qualifiers are present, integrations and data were reviewed.</li> <li>• The internal standard area for the secondary column PCB 96 is higher than the acceptable range in sample M8355-P(2). All target analytes quantified vs. PCB 96 except the SIS PCB 34 are reported from diution. As all surrogates pass in the affected sample, the sample is reported.</li> <li>• Method MM0417C is a 6pt quadratic method used to quant all samples. After this batch was quantified, the analyst noticed that PCB 101 was identified incorrectly on the secondary (confirmation) column. A new method was created for PCB 101 only, and the samples re-quantified with the correctly identified peak. Method MM0417F is a 6pt quadratic method used to quant all undiluted samples and relevant dilutions for PCB 101.</li> </ul> |
|--|---|

| Holding Times | Extraction Date(s) | Analysis Date(s)        |
|---------------|--------------------|-------------------------|
|               | 10/27/2014         | 10/31/2014, 11/1-2/2014 |

|                       |  |
|-----------------------|--|
| Procedural Blank (PB) | A PB was prepared with this analytical batch to ensure the sample extraction and analysis methods are free of contamination. |
| Blank value <5x ssMDL | No exceedences noted.  |
| Samples >5X PB        | No comments.   |

|                          |   |
|--------------------------|---|
| Laboratory Control Spike | A LCS was prepared with this analytical batch. The percent recoveries of target analytes were calculated to measure accuracy. |
| 70-130% recovery         | No exceedences noted.   |
| <30% RPD                 | No comments.  |

|  |   |
|--|---|
| Matrix Spike (MS)/Matrix Spike Duplicate (MSD) | A MS/MSD pair was prepared with this analytical batch. The percent recoveries of target analytes were calculated to measure accuracy. The relative percent difference (RPD) was calculated to measure data quality in terms of precision. |
| 70-130% recovery                               | No exceedences noted  |
| <30% RPD                                       | No comments.  |
| Spike must be >5x bkgd conc.                   |   |

**QA/QC Summary  
Batch 14-0494**

|                                   |   |
|-----------------------------------|---|
| Sample Duplicate (DUP)            | A laboratory duplicate of one sediment was prepared with the analytical batch. The relative percent difference (RPD) was calculated to measure data quality in terms of precision. <b>NOTE: This QC sample was inadvertently included in the sample batch instead of the requested SRM.</b> |
| <30% RPD<br>Conc must be >10X MDL | No exceedances noted.<br>No comments.   |

|                    |   |
|--------------------|---|
| Surrogate Recovery | Surrogate compounds were added prior to extraction. The surrogate recoveries are calculated to measure extraction efficiency. |
| 40-120% recovery   | No exceedances noted.<br>No comments.   |

|                            |  |
|----------------------------|--|
| Initial Calibration (ICAL) | The GC/ECD was calibrated with six-level quadratic calibration curve for all compounds using an instrument response factor (RF). |
| $R^2 \geq 0.995$           | No exceedances noted.<br>No comments.  |

|  |   |
|--|---|
| Independent Calibration Check (ICC)        | The independent check was run after each initial calibration to verify the calibration. This standard is from a different source than the ICAL. |
| $\leq 20\%$ difference individual and mean | No exceedances noted.<br>No comments.   |

|  |   |
|--|---|
| Continuing Calibration Verification (CCV)                      | Continuing calibration standards were run every 24 hours to ensure that initial calibration is still valid. |

## BATTELLE - DUXBURY OPERATIONS MISCELLANEOUS DOCUMENTATION FORM

**Project Title:** USACE/NAE - New Bedford Harbor LTM      **Data Set Number:** DP-14-0676  
**Project Number:** 100053747      **Prep Batch Number:** 14-0494  
**Entered By:** Richard Restucci Jr      **Entered On:** 11/20/2014  
**Test Code (Matrix Type):** Master\_128(S)

Integrations by Rich Restucci.  
RR 11/20/14

Method MM0417C is a 6pt quadratic method used to quant all samples. After this batch was quantified, the analyst noticed that PCB 101 was identified incorrectly on the secondary (confirmation) column. A new method was created for PCB 101 only, and the samples re-quantified with the correctly identified peak.

Method MM0417F is a 6pt quadratic method used to quant all undiluted samples and relevant dilutions for PCB 101.  
RR 12/8/14

Method MM0417C utilizes the quant sheets from MM0417B.  
RR 11/20/14

Some congener concentrations were anomalous with surrounding analyte concentrations, or obvious chromatographic interferences were present, likely non-target congeners. In cases where an inflection point was detected in the affected peak, a vertical integration was performed inside the peak to better represent the detected congener. Specific peaks where these interferences present themselves are PCBs 96, 28, 66, and 101. As these interferences are not matrix derived, but stem from additional, non-target congeners, the analytes are not ME qualified. A graphical representation of PCB 66 in sample M8402-P-D(5) is located in the unused data section for reference.  
RR 11/20/14

In cases where a congener exhibits dilution level concentrations on one column, but not the other, both columns are reported from dilution for consistency.  
RR 11/20/14

In cases where p qualifiers are present, integrations and data were reviewed.  
RR 11/20/14

The internal standard area for the secondary column PCB 96 is higher than the acceptable range in sample M8355-P(2). All target analytes quantified vs. PCB 96 except the SIS PCB 34 are reported from dilution. As all surrogates pass in the affected sample, the sample is reported.  
RR 11/20/14

**Task Leader Approval:**

## WORK/QUALITY ASSURANCE PROJECT PLAN

### 1.0 GENERAL PROJECT INFORMATION

**Project Title:** USACE-NAE New Bedford Harbor LTM MDL Study  
**Project Number:** 100053747  
**Client:** USACE/NAE  
696 Virginia Road  
Concord, MA 01742  
USA  
**Client Contact Information:** Peter Hugh  
Engineering Technical Lead  
(978) 318-8452(V)  
NA  
NA  
**Effective Date of QAPP:** 10/9/2014  
**Version Number:** 100053747(S)-02  
**Project Manager:** Peven-McCarthy, Carole  
**Laboratory Task Manager:** Peven-McCarthy, Carole  
**Deliverable Due Date:** 11/3/2014

### 2.0 SCOPE OF WORK

**Overview:** A project-specific MDL study is required for this project.  
**Matrix:** Soil/Sediment

### 2.1 TECHNICAL APPROACH

#### 2.1.1 Sample Receipt, Storage, and Handling

The list of samples for this project plan are presented in Attachment 1.

**Storage Directions:** Store frozen.  
**Sub\_Sampling:** None  
**Procedures:** NA  
**Contact:** NA  
**Comment:** NA  
**Archiving:** NA  
**Disposal:** NA

## WORK/QUALITY ASSURANCE PROJECT PLAN

### 2.1.2 Sample Preparation

NA

| Samples Expected: | Samples Per Batch: | Batches Expected: |
|-------------------|--------------------|-------------------|
|                   | 20                 |                   |

Batch quality control samples are defined in Table 1.

Target samples are presented in Attachment 1.

**Table 1: Quality Control Samples**

| Type: | Description:                      | Count:      | Rgt: | Reference:  | Comment: |
|-------|-----------------------------------|-------------|------|---|----------|
| PB    | Laboratory control reagent blank. | 1 per batch | --   | NA  |          |
| LCS   | Laboratory Control Sample         | 1 per batch | No   | NA  |          |
| MDL   | Method Detection Limits           | 8 per batch | Yes  | 140304-02: Mud Dump<br>Reference N4415<br>Lot:N4415 |          |

### 2.1.3 Extraction/Preparation

#### 2.1.3.1 Extraction

|                           |  |
|---------------------------|--|
| SOP No.-Rev:              | <b>5-192-14</b>  |
| SOP Title:                | <i>Soil/Sediment Extraction for Trace Level Semi-Volatile Organic Contaminant Analysis</i> |
| Sample Size:              | 10 g   |
| SIS and LCS/MS Compounds: | Defined in Table 2.  |
| Deviations:               | NA   |
| Comments:                 | NA   |

**Table 2: SIS and LCS/MS Spiking Level**

| Standard Type       | Standard Contents | Spike Amount (ng) | Volume (uL) | Comment     |
|---------------------|-------------------|-------------------|-------------|-------------|
| PCB Surrogate       | ID59 SIS          | ~ 100 ng          | 100 uL      | NA          |
| ECD LCS/MS Solution | HX10 LCS/MS       | ~ 38 - 150 ng     | 75 uL       | LCS         |
| PDL spike ECD       | ID73 LCS/MS       | ~ 7.5 - 30.0 ng   | 150 uL      | MDL samples |

#### 2.1.3.2 Cleanup

## WORK/QUALITY ASSURANCE PROJECT PLAN

- |    |              |   |
|----|--------------|---|
| 1) | SOP No.-Rev: | <b>5-328-04</b>   |
|    | SOP Title:   | <i>Removal (cleanup) of Sulfur from Environmental Sample Extracts</i> |
|    | Deviations:  | NA  |
|    | Comments:    | NA  |
| 2) | SOP No.-Rev: | <b>5-327-04</b>   |
|    | SOP Title:   | <i>Florisil Cleanup of Environmental Sample Extracts</i>              |
|    | Deviations:  | Elute with Hexane only  |
|    | Comments:    | NA  |

RIS spiking levels are presented in Table 3.

Extract PIV (uL): 1000

**Table 3: RIS Spiking Level**

| Standard Type | Standard Contents | Spike Amount (ng) | Volume (uL) | Comment |
|---------------|-------------------|-------------------|-------------|---------|
| PCB IS        | IE11 RIS          | ~ 100 ng          | 100 uL      | NA      |

### 2.1.4 Instrumental Analysis

The list of analytes along with data quality criteria are presented in Attachment 2.

- |    |             |   |
|----|-------------|---|
| 1) | SOP_No-Rev: | <b>5-128-13</b>   |
|    | SOP_Title:  | <i>Identification and Quantification of Polychlorinated Biphenyls (By Congener and Aroclor) and Chlorinated Pesticides by Gas Chromatography/Electron Capture Detection</i> |
|    | Deviations: | NA  |
|    | Comments:   | Report SIS corrected data   |

### 2.2. DELIVERABLES

|                          |            |
|--------------------------|------------|
| <b>Deliverables Due:</b> | 11/3/2014  |
| <b>LIMS Reports:</b>     | <i>Yes</i> |
| <b>Histograms:</b>       | <i>No</i>  |
| <b>Excel Tables:</b>     | <i>Yes</i> |
| <b>EICs:</b>             | <i>No</i>  |
| <b>Chromatograms:</b>    | <i>No</i>  |

## WORK/QUALITY ASSURANCE PROJECT PLAN

**EDDs:** *Yes*

**Comments:**

Required 30 day TAT.

EDD required.

Full data package (pdf) required for external validation.

Detailed quant reports are not required.

### 3.0 QUALITY

The Method Quality Objectives are defined in Attachment 3.

### 4.0 ORGANIZATION AND COMMUNICATION

#### 4.1 ORGANIZATION

The project team is defined in Table 4. Supervisors may make substitutions with Project Manager concurrence.

**Table 4: Project Team and Roles**

| Staff Member             | Role                    | Comment |
|--------------------------|-------------------------|---------|
| Carole S. Peven-McCarthy | Project Manager         | NA      |
| Samuel A. Guimaraes      | Sample Preparation      | NA      |
| Richard P. Restucci Jr   | GC/ECD Analysis         | NA      |
| Matt D. Schumitz         | Sample Custody          | NA      |
| Carla R. Devine          | Quality Control Officer | NA      |

#### 4.2 COMMUNICATION

A kick-off meeting will be held to discuss project scope and goals.

### 5.0 SCHEDULE

The project schedule is presented in Table 5.

**Table 5. Schedule of Laboratory Activities**

| Activity:           | Start Date: | End Date:  | TAT (days): | Comment: |
|---------------------|-------------|------------|-------------|----------|
| Sample Receipt      | 10/03/2014  | NA         | 0           | NA       |
| Sample Preparation  | 10/06/2014  | 10/09/2014 | 3           | NA       |
| Instrument Analysis | 10/09/2014  | 10/24/2014 | 15          | NA       |

## WORK/QUALITY ASSURANCE PROJECT PLAN

| Activity:              | Start Date: | End Date:  | TAT<br>(days): | Comment: |
|------------------------|-------------|------------|----------------|----------|
| Quality Control Review | 10/27/2014  | 10/29/2014 | 2              | NA       |
| Final Data Reporting   | 10/29/2014  | 10/31/2014 | 2              | NA       |

### 6.0 BUDGET

The labor budget for the analytical task is presented in Table 6.

**Table 6. Labor Budget (Laboratory Analytical Task)**

| Labor Activity:        | Hours/<br>Batch: | Batches: | Total<br>Hours: | Comment: |
|------------------------|------------------|----------|-----------------|----------|
| Sample Receipt         | 1                | 1        | 1               | NA       |
| Sample Preparation     | 24               | 1        | 24              | NA       |
| <i>Extraction</i>      | 20               |          |                 |          |
| <i>glassware</i>       | 4                |          |                 |          |
| Instrument Analysis    | 16               | 1        | 16              | NA       |
| <i>GC/ECD</i>          | 16               |          |                 |          |
| Quality Control Review | 3                | 1        | 3               | NA       |
| Final Data Reporting   | 1                | 1        | 1               | NA       |

## Sample Receipt Form

Approved:  Authorized: 

Project Number: \_\_\_\_\_ Client: \_\_\_\_\_  
 Received by: Schumitz, Matt Date/Time Received: Friday, September 26, 2014 12:00 AM  
 No. of Shipping Containers: 1

### SHIPMENT

Method of Delivery: Hand Delivered Tracking Number: NA  
 COC Forms:  Shipped with samples  No Forms

### Cooler(s)/Box(es)

| Cntr   | Type   | Tracking No. | Seal | Seal Condition | Container Condition | Temp C | Smps |
|--------|--------|--------------|------|----------------|---------------------|--------|------|
| 1 of 1 | Cooler |              | None | Intact         | Intact              | 1.0    | 23   |

### Samples

Sample Labels:  Sample labels agree with COC forms  
 Discrepancies (see Sample Custody Corrective Action Form)

Container Seals:  Tape  Custody Seals  Other Seals (See sample Log)  
 Seals intact for each shipping container  
 Seals broken (See sample log for impacted samples)

Condition of Samples:  Sample containers intact  
 Sample containers broken/leaking (See Custody Corrective Action Form)

Temperature upon receipt (°C): 1 Temperature Blank used  Yes  No  
*(Note: If temperature upon receipt differs from required conditions, see sample log comment field)*

Samples Acidified:  Yes  No  Unknown

Initial pH 5-9?:  Yes  No  NA  
*If no, individual sample adjustments on the Auxiliary Sample Receipt Form*

Total Residual Chlorine Present?:  Yes  No  NA  
*If yes, individual sample adjustments on the Auxiliary Sample Receipt Form*

Head Space <1% in samples for water VOC analysis:  Yes  No  NA  
*Individual sample deviations noted on sample log*

Samples Containers:  
 Samples returned in PC-grade jars:  Yes  No  Unknown /Lot No.: UnKnown

Storage Location: Custody: Freezer - F0117 (NA) BDO IDs Assigned: M8152 - M8174

# Sample Receipt Form

Approved:  Authorized

Project Number: 100043429 Client: USACE  
Received by: Schumitz, Matt Date/Time Received: Wednesday, October 01, 2014 12:00 AM  
No. of Shipping Containers: 1

## SHIPMENT

Method of Delivery: Hand Delivered Tracking Number: NA  
COC Forms:  Shipped with samples  No Forms

## Cooler(s)/Box(es)

| Cntr   | Type   | Tracking No. | Seal          | Seal Condition | Container Condition | Temp C | Smps |
|--------|--------|--------------|---------------|----------------|---------------------|--------|------|
| 1 of 1 | Cooler | NA           | Custody Seals | Intact         | Intact              | 1.2    | 60   |

## Samples

Sample Labels:  Sample labels agree with COC forms  
 Discrepancies (see Sample Custody Corrective Action Form)

Container Seals:  Tape  Custody Seals  Other Seals (See sample Log)  
 Seals intact for each shipping container  
 Seals broken (See sample log for impacted samples)

Condition of Samples:  Sample containers intact  
 Sample containers broken/leaking (See Custody Corrective Action Form)

Temperature upon receipt (°C): 1.2 Temperature Blank used  Yes  No  
*(Note: If temperature upon receipt differs from required conditions, see sample log comment field)*

Samples Acidified:  Yes  No  Unknown

Initial pH 5-9?:  Yes  No  NA  
*If no, individual sample adjustments on the Auxiliary Sample Receipt Form*

Total Residual Chlorine Present?:  Yes  No  NA  
*If yes, individual sample adjustments on the Auxiliary Sample Receipt Form*

Head Space <1% in samples for water VOC analysis:  Yes  No  NA  
*Individual sample deviations noted on sample log*

Samples Containers:  
Samples returned in PC-grade jars:  Yes  No  Unknown /Lot No.: UnKnown

Storage Location: Custody: Freezer - F0113 (NA) BDO IDs Assigned: M8347 - M8406

Samples logged in by: Schumitz, Matt Date/Time: 10/01/2014 12:00 AM

## Glossary of Data Qualifiers

**Flag: Application:**

---

- B Analyte concentration found in the sample at a concentration <5x the level found in the procedural blank.
- D Dilution Run. Initial run outside linear range of instrument.
- E Estimate, result is greater than the highest concentration level in the calibration.
- H Surrogate diluted out. Used when surrogate recovery is affected by excessive dilution of the sample extract.
- J Analyte detected below the sample-specific Reporting Limit (RL).
- m Confirmation column manually over-ridden by analyst, dual column quantitative analysis only.
- ME Significant Matrix Interference - Estimated value.
- MI Significant Matrix Interference - value could not be determined or estimated.
- n Quality Control (QC) value is outside the accuracy or precision Data Quality Objective (DQO), but meets the contingency criteria.
- N Quality Control (QC) value is outside the accuracy or precision Data Quality Objective (DQO)
- NA Not applicable
- p Dual column value exceeds RPD criteria, dual column quantitative analysis only.
- T Holding Time (HT) exceeded.
- U Analyte not detected at 3:1 signal:noise ratio.

**QA/QC Summary  
Batch 14-0495**

|                   |   |
|-------------------|---|
| Project:          | USACE/NAE – New Bedford Harbor Long Term Monitoring |
| Parameters:       | PCB Congeners (NOAA 18)                             |
| Laboratory:       | Battelle, Norwell, MA                               |
| Matrix:           | Sediment  |
| Data Set:         | DP-14-0677  |
| Analytical SOP:   | 5-128   |
| Method Reference: | EPA Method 8081B and 8082A (modified)               |

**Sample Custody**

| Collection Date | Receipt Date    | Temp (°C) |
|-----------------|-----------------|-----------|
| 9/22-30/2014    | 9/26, 10/1/2014 | 1.0, 1.2  |

|                    |   |
|--------------------|---|
| Corrective Actions | NA  |
| Sample Storage     | The sediment samples were stored frozen until extraction. |
| Related samples    | NA  |

**METHOD SUMMARIES**

|                    |  |
|--------------------|--|
| Sample Preparation | Prior to sediment extraction, an aliquot of approximately 30 g of wet sediment was placed on clean, labeled aluminum foil, covered and placed in a laboratory laminar flow hood to dry the sample to <50% moisture. Aliquots of these dried samples were weighed into sample extraction vessels for sample extraction. Approximately 2.5 to 10 g sediment was weighed out for extraction (sample weight based on historical analysis results). The sediments were spiked with surrogates, extracted three times with methylene chloride, and the extracts combined, dried over anhydrous sodium sulfate, and concentrated. The concentrated extracts were processed through Florisil to isolate the PCBs, followed by activated copper treatment to remove sulfur. The cleaned extract was concentrated and fortified with internal standard (IS) compounds prior to analysis by GC/ECD. |
| Prep Comments      | The following sample went to very low volume approximately >1 mL pre florisil columns: M8159, M8161, M8366, M8393. Samples were put onto columns and continued through prep.   |

|                   |   |
|-------------------|---|
| Analysis          | PCBs were analyzed by gas chromatography electron capture detection (GC/ECD). An initial calibration consisting of target analytes was analyzed prior to sample analysis to demonstrate the linear range. Calibration verification was performed at the beginning and end of each 24-hr period in which samples were analyzed. Concentrations of target compounds were calculated versus internal standards using the average response factors (RF) generated from the initial calibration. |
| Analysis Comments | <ul style="list-style-type: none"> <li>Some congener concentrations were anomalous with surrounding analyte concentrations, or obvious chromatographic interferences were present, likely non-target congeners. In cases where an inflection point was detected in the affected peak, a vertical integration was performed</li> </ul>   |

**QA/QC Summary  
Batch 14-0495**

|  |   |
|--|---|
|  | <p>inside the peak to better represent the detected congener. Specific peaks where these interferences present themselves are PCBs 96, 28, 66, and 101. As these interferences are not matrix derived, but stem from additional, non-target congeners, the analytes are not ME qualified. A graphical representation of PCB 66 in sample M8402-P-D(5) is located in the unused data section for reference.</p> <ul style="list-style-type: none"> <li>• In cases where a congener exhibits dilution level concentrations on one column, but not the other, both columns are reported from dilution for consistency.</li> <li>• In cases where p qualifiers are present, integrations and data were reviewed.</li> <li>• Method MM0417C is a 6pt quadratic method used to quant all samples. After this batch was quantified, the analyst noticed that PCB 101 was identified incorrectly on the secondary (confirmation) column. A new method was created for PCB 101 only, and the samples re-quantified with the correctly identified peak. Method MM0417F is a 6pt quadratic method used to quant all undiluted samples and relevant dilutions for PCB 101.</li> </ul> |
|--|---|

| Holding Times | Extraction Date(s) | Analysis Date(s)  |
|---------------|--------------------|-------------------|
|               | 10/28-29/2014      | 11/4-5,20-21/2014 |

|                       |  |
|-----------------------|--|
| Procedural Blank (PB) | A PB was prepared with this analytical batch to ensure the sample extraction and analysis methods are free of contamination. |
| Blank value <5x ssMDL | No exceedances noted.  |
| Samples >5X PB        | No comments.   |

|                          |   |
|--------------------------|---|
| Laboratory Control Spike | A LCS was prepared with this analytical batch. The percent recoveries of target analytes were calculated to measure accuracy. |
| 70-130% recovery         | No exceedances noted.   |
|                          | No comments.  |

|  |   |
|--|---|
| Matrix Spike (MS)/Matrix Spike Duplicate (MSD) | A MS/MSD pair was prepared with this analytical batch. The percent recoveries of target analytes were calculated to measure accuracy. The relative percent difference (RPD) was calculated to measure data quality in terms of precision. |
| 70-130% recovery                               | No exceedances noted  |
| <30% RPD                                       | No comments.  |
| Spike must be >5x bkgd conc.                   |   |

**QA/QC Summary  
Batch 14-0495**

|  |   |
|--|---|
| Sample Duplicate (DUP)   | A laboratory duplicate of one sediment was prepared with the analytical batch. The relative percent difference (RPD) was calculated to measure data quality in terms of precision. <b>NOTE: This QC sample was inadvertently included in the sample batch instead of the requested SRM.</b> |
| <30% RPD<br>Conc must be >10X MDL                              | No exceedances noted.<br>No comments.   |
| Surrogate Recovery   | Surrogate compounds were added prior to extraction. The surrogate recoveries are calculated to measure extraction efficiency.   |
| 40-120% recovery   | No exceedances noted.<br>No comments.   |
| Initial Calibration (ICAL)                                     | The GC/ECD was calibrated with six-level quadratic calibration curve for all compounds using an instrument response factor (RF).  |
| $R^2 \geq 0.995$   | No exceedances noted.<br>No comments.   |
| Independent Calibration Check (ICC)                            | The independent check was run after each initial calibration to verify the calibration. This standard is from a different source than the ICAL.   |
| $\leq 20\%$ difference individual and mean                     | No exceedances noted.<br>No comments.   |
| Continuing Calibration Verification (CCV)                      | Continuing calibration standards were run every 24 hours to ensure that initial calibration is still valid.   |
| $\leq 20\%$ difference individual; $\leq 15\%$ difference mean | Two exceedances noted.<br>PCBs 206 and 209 are higher than the acceptable criteria in CCV M7442. The LCS recoveries pass in the affected bracket, and PCBs 206 and 209 represent a negligible portion of the total PCB; therefore, the bracket was not re-run.                              |

## BATTELLE - DUXBURY OPERATIONS MISCELLANEOUS DOCUMENTATION FORM

**Project Title:** USACE/NAE - New Bedford Harbor LTM      **Data Set Number:** DP-14-0677  
**Project Number:** 100053747      **Prep Batch Number:** 14-0495  
**Entered By:** Richard Restucci Jr      **Entered On:** 11/21/2014  
**Test Code (Matrix Type):** Master\_128(S)

Integrations by Rich Restucci.  
RR 11/20/14

Method MM0417C is a 6pt quadratic method used to quant all samples. After this batch was quantified, the analyst noticed that PCB 101 was identified incorrectly on the secondary (confirmation) column. A new method was created for PCB 101 only, and the samples re-quantified with the correctly identified peak.

Method MM0417F is a 6pt quadratic method used to quant all undiluted samples and relevant dilutions for PCB 101.  
RR 12/8/14

Method MM0417C utilizes the quant sheets from MM0417B.  
RR 11/20/14

Some congener concentrations were anomalous with surrounding analyte concentrations, or obvious chromatographic interferences were present, likely non-target congeners. In cases where an inflection point was detected in the affected peak, a vertical integration was performed inside the peak to better represent the detected congener. Specific peaks where these interferences present themselves are PCBs 96,161, 28, 66, and 101. As these interferences are not matrix derived, but stem from additional, non-target congeners, the analytes are not ME qualified. A graphical representation of PCB 66 in sample M8402-P-D(5) is located in the unused data section for reference.  
RR 11/21/14

In cases where a congener exhibits dilution level concentrations on one column, but not the other, both columns are reported from dilution for consistency.  
RR 11/21/14

In cases where p qualifiers are present, integrations and data were reviewed.
