

## Emission Inventory System – Nonroad Inventory

May 29, 2012

### Questions and Answers

1. When you run NMIM, will you use 2011 met. Data, 20 yr averages, or something else? For a State, will you have county specific met. Data? **2011 NCD defaults will use surrogates where 2011 data is not yet available. When we post the NCD submittal instructions at <http://www.epa.gov/ttn/chief/net/2011inventory.html>, we'll describe what's used. Temp and humidity data will like reflect what's used in the MOVES CDB files, which is from base year 2009.**
2. When will 2011 inputs be available? **Beginning of August, 2012, if not earlier.**
3. Is a separate submittal needed for NCD and the External files? **No. The files are packaged in a particular order as shown on slide 16 in the NONROAD training. This will also be described in the NCD submittal instructions when posted to CHIEF.**
4. Will you be sending notices in e-mail when the 2011 NCD files are ready for downloading? **Yes**
5. If we have MOVES inputs, is EPA requiring NMIM formatted MOBILE62 inputs? This is a lot of work, so I want to confirm what I thought I heard. I want to provide NONROAD inputs only via NMIM. **NONROAD inputs are submitted as NMIM NCD, MOVES inputs are submitted as MOVES CDB. No MOBILE6 inputs or emissions should be submitted.**
6. Will you be covering locomotives and CMV in this training? **No. This is covered under nonpoint. See the posted Nonpoint training at <http://www.epa.gov/ttn/chief/eidocs/training.html#eis>**
