

Notice of Willingness to Participate in Funding Opportunities of Other Federal Agencies

Opportunity to Participate: Researchers within the Homeland Security Research Program (HSRP) may be willing and available to participate with an eligible institution to prepare a joint assistance application in response to a Request for Application (RFA) issued by another federal agency. Depending upon the circumstances, EPA may request some of the assistance funding or may be willing to participate as an unfunded collaborator.

Limitations:

- 1) If EPA is seeking some of the assistance funding and the awarding agency is unwilling to make separate awards to EPA and its partner, then EPA must assume the role of the lead applicant if its partner is a non-federal entity. If the partner is another federal agency, then either agency may assume the role of the lead applicant. If EPA is the lead applicant, the funding agency must be willing to transfer the awarded funding to EPA by means of an Interagency Agreement. EPA is unable to accept funding by means of a grant or cooperative agreement.
- 2) The funding opportunity must relate to the Office of Research and Development's strategic goals and complement HSRP's research. More information on the research focus of the HSRP can be found on this website.
- 3) ORD employees may not participate in preparation of an application to be submitted in response to an RFA issued by EPA.

Eligibility Requirements: Institutions eligible to participate are other federal agencies, U.S. non-profit public and private institutions of higher education, and their directly associated non-profit research entities, or other entities such as state and local governments, Federally Recognized Indian Tribal Governments, and U.S. territories or their possessions. Profit-making organizations are ineligible.

Criteria for Participation: The participating institution must be able to demonstrate the availability of research staff with appropriate scientific credential, a history of successfully conducting research in the subject area of the RFA, the availability of facilities and related resources necessary to complete the research. For federal employees to participate, they must be participating in their official capacity and be free of any actual or apparent conflict of interest, as well as any loss of impartiality as defined by the Standards of Ethical Conduct.

Contact Us: If you are interested in participating with HSRP researchers in preparing a funding application in response to another federal agency's RFA, submit a written request to Brian Kleinman, 26 Martin Luther King Dr. W, Cincinnati, OH 45268, Kleinman.brian@epa.gov.

The request should identify the sponsoring federal agency, the RFA identifier, indicate in general terms the research project that is anticipated and how HSRP researchers would be expected to collaborate, and date by which EPA should reply. Provide the scientific qualifications required of HSRP researchers; specific individuals may be identified.

Decision to Participate: If the proposed project appears to be complementary of HSRP's research, you may be contacted for more information related to the planned project, the qualification of your team, and the availability of facilities and other resources. All requests from eligible institutions will be given

fair and equal consideration. The HSRP reserves the right to choose to participate with more than one eligible partner in preparing an application in response to a particular RFA. The decision to allow an EPA researcher to participate with a particular eligible institution in the preparation of an application will be made by ORD management and is not subject to dispute.

Further Information: For further information, contact Brian Kleinman, 26 Martin Luther King Dr. W, Cincinnati, OH 45268, Kleinman.brian@epa.gov.
