Table 2 - Description of Violation and Vehicles/Engines

The model "R100-III" generators containing non-road engines (Subject Engines) were inspected by the EPA on May 7, 2015 at the port of Chicago. The ECI label on the inspected engine indicates that it is certified under engine family FCRPS.0991GA. The EPA issued the COC for engine family FCRPS.0991GA to Chongqing Rato Power Manufacturing Corporation, with an effective date of September 17, 2014. During the inspection, the EPA inspectors obtained a catalyst sample from the inspected model Subject Engine, and sent it to an EPA laboratory for analysis. Physical and chemical examination of the muffler assembly for engine family FCRPS.0991GA has revealed that the design of the catalyst contained therein is materially different from the catalyst design specified in the application for the COC for this engine family. Because the catalyst does not conform to the precious metal specifications in the application for the COC for engine family FCRPS.0991GA, the EPA concludes that the Subject Engines are not covered by the COC for this engine family. The Subject Engines were therefore imported in violation of 40 C.F.R. § 1068.101(a)(1).
