

## Top 30 On-site Partner List (as of January 6, 2015)

The Top 30 On-site Generation list represents those partners generating and consuming the most green power on-site within the Green Power Partnership. The combined on-site green power consumption of these organizations amounts to nearly 858 million kilowatt-hours of green power annually, which is equivalent to avoiding the carbon dioxide emissions from the electricity use of more than 81,000 average American homes each year.

Annual On-site Green Power Usage (kWh)	On-site % of total Electricity Use*	On-site Resources	Purchased Green Power (kWh)
