

Top 30 Tech & Telecom (as of January 25, 2016)

The Top 30 Tech & Telecom list represents the largest green power users among technology and telecommunications partners within the Green Power Partnership. The combined green power use of these organizations amounts to more than 10.2 billion kilowatt-hours annually, which is equivalent to the electricity use of more than 935,000 average American homes annually.

Annual Green Power Usage (kWh)	GP % of Total Electricity Use*	Green Power Resources	Providers (listed in descending order by kWh supplied to Partner)
1. Intel Corporation			
3,107,050,000	100%	Solar, Wind	3Degrees°, Renewable Choice Energy°, On-site Generation, PNM

*Reflects the amount of green power as a percentage of total electricity use. Partners choosing to purchase green power in an amount exceeding 100 percent of their U.S. organization-wide electricity use are listed as such.

°Indicates Provider is selling Partner a third-party certified green power product. For more information on third-party certification, visit <http://www.epa.gov/greenpower/buygp/certified.htm>.
