

EPA's State Inventory Tool and MRR Data

State GHG InventoryTool:

- Based on National methods and sources
- Offers consistent, streamlined approach to state inventories
- Provides customizable default data in user-friendly framework
- Available free-of-charge
- Framework extends to 2020, default data through 2009

Incorporating Data from the MRR

- Currently provide spot for manual input of "all in" sources in Industrial Processes module starting with 2010 data
- Exploring options to:
 - build in default industrial processes data from MRR
 - enhance other modules of the tool with MRR data
- Looking for input on what would be most helpful

EPA's State Inventory Tool and MRR Data
