June 24, 2015

Project Description

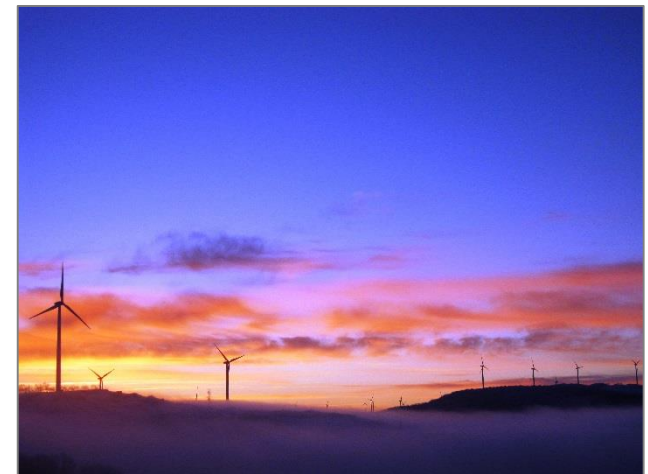

- Greenbrier County, WV
- 37 MW with General Electric turbines
- Phase II of Invenergy’s existing 100.5 MW Beech Ridge I project
- Annual generation: about 129,000 MWh
- Start construction: Q4 2015
- COD: Q3 2016

Project Readiness Status

- PJM Interconnection agreement signed
- Full site control
- State permitting completed – siting certificate issued, SWPPP approved
- No significant environmental issues identified
- Met data collected from 3 met towers (one tower from 2005-2008; two towers – since 2011)

Future Partnership and Marketing Opportunities

Contract Structures

- Traditional PPA
- PPA with Green-e certifiable RECs
- Financial hedge (contracts for difference) at West Hub or AD Hub
- Long-term PJM REC off-take

Customer Types

- We work with utilities, coops, municipal utilities, financial institutions, commercial and industrial customers, and universities

Marketing Opportunities

- Collaborate with the Buyer to create market buzz within the industry and in the Corporate Sector
- Provide external PR support to the Buyer
- Consider granting naming rights
