¹ EPA has approved these entities to conduct laboratory testing of residential wood heater models. These entities are accredited under ISO/IEC 17025 as a test laboratory and for the operation of a laboratory quality management system.

² EPA has approved these entities to conduct third-party certification of laboratory testing of residential wood heater models. These entities are accredited under ISO/IEC 17020 and ISO/IEC 17065 for third-party product certification.

³ EPA approved this lab prior to May 15, 2015, and it was re-approved on November 12, 2015 until March 16, 2018. If it wants to continue to be an EPA-approved lab, it must receive ISO/IEC 17025 test lab accreditation by March 16, 2018.
