

Clay Nelson, Physical Scientist, in EPA's National Exposure Research Laboratory

Exposure Methods and Measurements Division

Mailing Address

nelson.clay@epa.gov

Area of Expertise: Clay's research supports the development and application of bioavailability tools for improved human health risk assessments for toxic metals in soil. This effort focuses on developing new or refining existing in vitro metal bioaccessibility assays that simulate the human gut, and determining the mechanisms that control metal bioavailability. Clay also specializes in trace metal analysis via ICP-MS, HPLC-ICP-MS, ICP-OES, and AA.

Education:

- M.E.M., Environmental Health and Toxicology, Duke University, 2008
- B.A., Biology, Dartmouth College, 2003

Professional Experience:

- Physical Scientist, USEPA, ORD, NERL-HEASD, RTP, NC 2011-present
- ORISE Research Fellow, USEPA, ORD, NERL-HEASD, RTP, NC 2010-2011
- Student Services Contractor, USEPA, ORD, NERL-HEASD, RTP, NC 2010-2011
- Research Coordinator, Laboratory of Molecular Aquatic Toxicology, Duke University, NC 2008-2009
- Research Assistant, Laboratory of Molecular Aquatic Toxicology, Duke University, NC 2007-2008
- Staff Scientist, MB Consulting Engineers, San Diego, CA 2003-2006
