Project Matching: Facilitating New Renewable Energy Projects
Project Proposal Submittal Form

Project Summary

Project name: Rock Falls
Developer name: EDF Renewable Energy
Developer contact name | phone | email: Jacob Susman | 1.646.898.3694 | Jacob.Susman@edf-re.com
Renewable energy type: Wind
Project city/state: Caldwell, OK
Project geographic coordinates (To find, use: www.latlong.net/):
Latitude 36°53'10.55"N
Longitude 97°28'50.89"W
Grid system operator (ISO, RTO) that the project will interconnect to: SPP
Total planned megawatt (MW DC) size: 154
Are there phases? If so, how many and in what size traunches? Yes. There are three phases planned - each one for 150MW - for a total of 450MW.
What is the expected annual output of the completed project (MWh)? ~688,000
Expected date of construction commencement: Q1 2017
Expected date of commercial operation: 10/5/2017
What is the largest development hurdle and how is it anticipated to be overcome?
Heavy Oil & Gas Usage in the area requiring Crossing agreements; addressed by timely finalization of layout
Can you provide examples of similar projects you have developed?
The 225MW Great Western Wind Project, owned by EDF RE will commence construction in Spring 2016. The Rock Falls project leveraged established local relationships and a history of delivering a project into operations. EDF-RE also developed a similar site across the Kansas border called Slate Creek which went operation in 2015. EDF Renewable Energy has developed 7.8GW of renewable energy capacity including both wind and solar projects. Our full project list can be viewed on our corporate website: http://www.edf-re.com/projects/project_list/
Site Readiness

Has the project received all necessary federal, state, and local permits to proceed with construction and operation? If not, please outline the key permits required to proceed with project construction/operation and describe the steps you have taken in order to evaluate and address permitting risk for this project.

Received FAA DNH. Construction related permits will be obtained prior to construction.

Have you secured long-term site control? If so, please describe the nature of the agreement (lease, ownership, etc.)?

Site control secured under long term lease agreements

Have land leases been filed with the county? Yes

Does the project require either an Environmental Impact Statement or Environmental Assessment? If so, what is the status?

Tier 3 wildlife surveys pursuant to the USFWS Wind Energy Guidelines are underway in consultation with regulatory agencies. Early results indicate that NEPA analysis will not be required.

Interconnection

What is the status of interconnection, and have system impact and facility studies been completed? (Distribution or transmission level projects are both eligible)

Initiated the Facility Study and anticipate receipt from SPP in coming days. Expect to execute interconnection agreement in early 2016. Interconnection point known.

When do you expect the interconnection study process will be complete? Q2 2016

Does the transmission owner (TO) or independent system operator (ISO) have a process to study the project's impact on the local or regional grid and the subsequent cost to interconnect? Yes

Operation & Financing

What is the long- and short-term plan for operating and maintaining the project?

EDF RE and its affiliates will retain the O&M, administration and management roles for the Project.

Briefly describe why this site is a good candidate for renewable energy development and the process you used to reach this conclusion (e.g., meteorological tower data collection).

Robust wind resource (ongoing onsite data collection) and land predominantly used for agricultural purposes.
Provide a short summary of how you view project finance and structure/ownership taking shape for this project:

EDF RE and its parent company, EDF EN, have extensive experience with wind and solar project financing. Because of EDF RE’s strong financial position, construction of the project will be financed on balance sheet, and these projects will not be exposed to the risks of market changes and the availability of construction financing. EDF RE will, however, monetize the tax incentives via a standard tax equity financing partnership. Depending upon the economics of the project and other factors, EDF RE may, from time-to-time, opt to sell down part or all of the ‘cash’ equity to a third party financial investor, after the project is constructed. In these instances, EDF RE would retain responsibility for O&M on the project.

Partners

In what ways can organizations participate in the project? (Check all that Apply)

- Power purchase agreement for bundled power and RECs
- Financial hedge or contract for differences
- Long term REC offtake
- REC arbitrage / REC swap (e.g., Partner would not own the RECs associated with the project)
- Financial investment / ownership stake
- Other, please specify: ____________________________

Is the project’s ability to secure financing or enter the development phase contingent on finding a partner as detailed in previous question?

No. EDF RE has constructed all of its projects (several thousand MW) over the past five years on balance sheet, and would expect to construct this project on balance sheet as well, without the need for third party construction financing.

What are some of the characteristics of your ideal power purchaser, investor, or other partner?

EDF Renewable Energy works with numerous utilities and corporate purchaser offtakers as well as many vendors. Our ideal partners are interested in a long-term relationship with us and share our values in addition to exhibiting the credit worthiness and the functional capabilities necessary to fulfill their commitments. Offtakers must have investment grade ratings, or have LOC or parent guaranty from an investment grade rated entity to confirm financeability.

What marketing opportunities exist at the project for the partnering entity? Examples might include, naming rights, press support, ribbon cutting ceremonies etc.

EDF Renewable Energy is open to a variety of marketing efforts with our offtakers. These are handled on a case-by-case and project specific basis and are informed by whether an offtaker has contracted for our full project capacity.
