

**July 8, 2003, Correction Notice for Transportation Conformity Rule Amendments:  
Response to Court Decision and Additional Rule Changes, NPRM**

**Incorrect Section Citations in NPRM Preamble  
Describing EPA's Adequacy Process**

It has been brought to EPA's attention that several preamble section references contained in section IV. ("Using Motor Vehicle Emissions Budgets from Submitted SIPs for Transportation Conformity Determinations") of the June 30, 2003, transportation conformity NPRM are incorrect. Specifically, all references to sections III.D, III.F., and III.G., in sections IV.B. and IV.D.2. (pages 38979 and 38981, respectively) of the proposed preamble were erroneously cited. The correct references for these sections should be IV.D., IV.F. and IV.G., respectively. Section IV.D. includes a description of EPA's proposed adequacy process and sections IV.F. and IV.G. describe the types of SIPs that EPA will review for adequacy.
