Introduction and Currently Offered File Structures with Data Dictionary

* NOTE: There will be a few modifications made to the file formats beginning with the July 7, 2003 PPIS data download files. The PPIS master file data which previously resided on a mainframe computer at Research Triangle Park, NC was integrated with several other systems into a new Oracle based system within the Office of Pesticide Programs.

FILES BEING DROPPED:	NAMETYPE
	PRODSP (Possibly)
FILE FORMATS MODIFIED:	CHEMNAME
TABLE VALUES MODIFIED:	CTREASON
	PRODMGR
	PRODTYPE

The Pesticide Product Information System (PPIS) contains information concerning all pesticide products registered in the United States. It includes registrant name and address, chemical ingredients, toxicity category, product names, distributor brand names, site/pest uses, pesticidal type, formulation code, and registration status.

The PPIS master file currently resides on an Oracle server located in Crystal City, Virginia. The files located in this download area are extracts of the Oracle files, and are presented in ascii to enable interested parties to access them using a variety of database and spreadsheet software.

These files are being made available to the public to enable interested parties to download all or any part of the pesticide product information, and develop customized queries and reports. Organizations often request that the Office of Pesticide Programs provide copies of these files in slightly different formats, requiring OPP staff to perform time consuming special retrievals. By presenting these files in a standard format, OPP is providing the same information in the same format to all interested parties.

When you click on one of the file names, the file will immediately begin downloading to your computer.

The following contains file structures, arranged alphabetically by file name. Note that each data element is described in the data dictionary immediately following the File Structures Section.

```
********************************************************************
FIFRA section 3 pesticide registration data files and vocabularies
********************************************************************
```

File Name: AGENT.TXT

Description: Registrant's Designated Agent Name and Address File
                Contains the registrant's designated agent name and
                address information. (NOTE: Only contains agents
                for registrants of registered FIFRA section 3
                or section 24(c) pesticide products.)

File Structure:

```
Field Name  Type        Width  Dec  Start  End
==========  ====        =====  ===  =====  ===
CO_NR       Numeric         6          1     6
CO_NAME     Character      60          7    66
CO_NAME2    Character      60         67   126

CO_CITY     Character      50        177   226
CO_STATE    Character       2        227   228
CO_ZIP      Character       5        229   233
CO_CONTACT  Character      40        234   273
CO_PHONE    Character      10        274   283
```

```
****************************************************************
```

File Name: CHEMCAS.TXT

Description: Chemical Abstract Service File
                Provides a crosswalk between the OPP PC_CODE and
                the Chemical Abstract Service (CAS Number)

File Structure:

```
Field Name  Type        Width  Dec  Start  End
==========  ====        =====  ===  =====  ===
PC_CODE     Numeric         6          1     6
CAS_NR      Numeric        10          7    16
```

```
****************************************************************
```

File Name: CHEMNAME.TXT   (OLD FORMAT)

Description: Chemical Vocabulary File
                Contains a list of chemical names along with their
                associated OPP PC_CODE. Includes common names,
                synonymns, scientific, and preferred names for
                chemicals which are or were regulated by OPP.

File Structure:

```
Field Name  Type        Width  Dec  Start  End
==========  ====        =====  ===  =====  ===
PC_CODE     Numeric         6          1     6
CNAME_TYPE  Character       1          7     7
SEQ_NR      Numeric         3          8    10
PC_PREFIX   Character      15         11    25
PC_NAME     Character     253         26   278
```

File Name: CHEMNAME.TXT   (NEW FORMAT AS OF JULY 7, 2003)

Description: Chemical Vocabulary File
                Contains a list of chemical names along with their
                associated OPP PC_CODE. Includes common names,
                synonymns, scientific, and preferred names for
                chemicals which are or were regulated by OPP.
                **The SEQ_NR field has been dropped, the 'R' records
                have been dropped (values appear on the chemcas.txt
                file), the CNAME_TYPE field is now 20-characters in
                length, and the PC-PREFIX field is included in the**

File Structure:

Field Name	Type	Width	Dec	Start	End
===========	======	=======	=====	=======	=====
PC_CODE	Numeric	6		1	6
CNAME_TYPE	Character	20		7	26
PC_NAME	Character	253		27	278

CNAME_TYPE values appearing in the new file are:

```
ANSI
ISO
BSI
IUPAC
WASSA

Combined PPIS FIFRA section 3 & 24(c) Data Dictionary

The following contains brief data element descriptions.

*****************************************************************

                                              Description Link

Field Name  Type          Width  Dec  Files      In Vocabulary
==========  ====          =====  ===  =====      ================
APPL_DATE   Date              8         DIST
          The application date associated with a distributor
          product registration request.  The APPL_DATE is
          provided in the format CCYYMMDD.

APPR_DATE   Date              8         PRODUCT
          The pesticide product registration approval date.  The
          APPR_DATE is provided in the format CCYYMMDD.

CAN_DATE    Date              8         PRODUCT
          The cancellation or transfer date of a pesticide
          product registration.  The CAN_DATE is provided in the
          format CCYYMMDD.

CAS_NR      Numeric          10         CHEMCAS       CHEMNAME
          The Chemical Abstract Service Registry Number
          associated with each of the EPA designated chemical
          codes (PC_CODE).  A single 'CAS_NR' may have multiple
          associated 'PC_CODE' and a single 'PC_CODE' may have
          multiple associated 'CAS_NR'.  The 10-digit field
          should be displayed in the format ZZZZZZ9-99-9.

CNAME_DESC
          *****   (WILL BE DROPPED AS OF JULY 7, 2003)  *****

CNAME_TYPE  Character         1         CHEMNAME
          *****   (CHANGING AS OF JULY 7, 2003 - SEE BELOW)  *****

CNAME_TYPE  Character        20         CHEMNAME
          *****   (CHANGING AS OF JULY 7, 2003)   *****
              Previously the chemical name type field indicated
          whether the chemical name record was a 'C' common name,
          'S' synonym, 'T' trade name, 'R' Chemical Abstract Service
          record, or 'blank' designated print name record (usually
          the scientific name).
              The single character chemical name type is being
          replaced with a more detailed chemical name type.  The 'R'
          records formerly found on this file now appear in the CHEMCAS
          file.
          The new CNAME_TYPE values are listed below:
              ANSI
              ISO
```

CO_CITY   Character   50   AGENT
                                       COMPANY
        City address of pesticide registrant, agent or
        distributor.

CO_CONTACT   Character   40   AGENT
                                       COMPANY
        Company contact person.
        (The Agency makes every effort to ensure that this
        information is accurate. However, because companies
        are not required to provide this information, it may
        in some cases be missing or out of date.)

CO_NAME   Character   60   AGENT
                                       COMPANY
        First line of registrant, agent, or distributor name.

CO_NAME2   Character   60   AGENT
                                       COMPANY
        Second line of registrant, agent, or distributor name.
        (NOTE: A COMPANY record of an agent is reflected when
        the CO_NAME2 begins with the words AGENT FOR:.)

CO_NR   Numeric   6   PRODUCT   AGENT
                                       PROD24C   COMPANY
        EPA assigned number for each registrant or distributor.
        (NOTE: The first 6 digits of every pesticide product
        registration number is the 'CO_NR'. Link to the
        COMPANY file using CO_NR to obtain the associated name
        and address information.)

CO_PHONE   Character   10   AGENT
                                       COMPANY
        Company phone number.
        (The Agency makes every effort to ensure that this
        information is accurate. However, because companies
        are not required to provide this information, it may
        in some cases be missing or out of date.)

CO_STATE   Character   2   AGENT
                                       COMPANY

```
                State code of registrant, agent or distributor.

CO_STREET    Character         50        AGENT
                                         COMPANY
             Street address of registrant, agent or distributor.

CO_ZIP       Character          5        AGENT
                                         COMPANY
             5-digit zip code of registrant, agent or distributor.

COND_FLAG    Character          1        PRODUCT
             Identifies if the product was conditionally registered
             under FIFRA 3(c)(7) or unconditionally registered under
             FIFRA 3(c)(5).
             The field values are 'T' for true (conditionally registered)
             and 'F' for false (unconditionally registered).
             (ADDED 05/31/2002)

CT_CODE      Character          2        PRODUCT        CTREASON
                                         PRODXFER
             Cancellation or transfer reason code. (NOTE: Link to
             the CTREASON file using 'CT_CODE' to obtain the
             associated description in 'CT_DESC'.)

CT_DESC      Character         78        CTREASON
             Cancellation or transfer description associated with
             each 'CT_CODE'.

DIST_NR      Numeric            6        DIST           AGENT
                                                        COMPANY
             EPA assigned number for each distributor.  (NOTE: The
             'DIST_NR' would appear on a distributor product label
             following the second hyphen in the product registration
             number.  An example would be 111111-22222-333333 where
             111111 is the EPA registrant number, 111111-22222 the
             EPA pesticide product registration number,
             111111-22222-333333 the distributor product number, and
             333333 the EPA assigned distributor number 'DIST_NR'.
             Link to the COMPANY file using DIST_NR/CO_NR to obtain
             the associated name and address information.)

FORM_CODE    Character          2        PRODUCT        FORMNAME
                                         PROD24C
             The pesticide product form reflected as a 2-digit code.
             (NOTE: Link to the FORMNAME file using 'FORM_CODE' to
             obtain the associated description in 'FORM_DESC'.)

FORM_DESC    Character         78        FORMNAME
             The descriptive name associated with a pesticide
             product physical form (i.e. granular, dust, liquid).

M24C_SLN     Character          8        FORM24C
                                         PEST24C
                                         PROD24C
                                         SITE24C
                                         TYPE24C
             A special local need FIFRA section 24(c) registration.
             The first two characters of the 24(c) represent the
             state code, the next two digits represent the year the
             24(c) registration was issued, and the remaining four
```

```
                digits represent the registration sequence number.
                The 24(c) may be displayed as AL-98-0001 but is more
                often left as AL980001.

PC_CODE       Numeric          6        FORMULA      CHEMNAME
                                        FORM24C
                EPA assigned pesticide chemical code also commonly
                referred to as active ingredient code, Shaughnessy code,
                chemical code.  (NOTE: Link to the CHEMNAME file using
                'PC_CODE' to obtain the associated chemical names in
                field 'PC_NAME'.)

PC_PCT        Numeric        7  4       FORMULA
                                        FORM24C
                The 'PC_CODE' percentage appearing in the pesticide
                product formulation.

PC_PREFIX    Character        15        CHEMNAME
                Chemical name prefix.
                ***** AS OF JULY 7, 2003 THIS FIELD HAS BEEN *****
                ***** ROLLED INTO THE PC_NAME field.        *****

PC_NAME      Character        253       CHEMNAME
                Chemical name associated with each 'PC_CODE'.
                ***** AS OF JULY 7, 2003 THIS FIELD NOW *****
                ***** INCLUDES THE PC_PREFIX field.     *****

PEST_CODE     Character        9        PRODPEST     PESTNAME
                                        PEST24C
                EPA assigned code for each pest associated with a
                pesticide product.  (NOTE: Link to the PESTNAME file
                using 'PEST_CODE' to obtain the associated descriptive
                pest name in field 'PEST_DESC'.)

PEST_DESC     Character        100      PESTNAME
                The pest name description associated with each
                'PEST_CODE'.

PM_NAME       Character        30                   PRODMGR
                The product manager (PM) name.

PM_PHONE      Character        13                   PRODMGR
                The product manager (PM) telephone number.

PM_TEAM       Character        2        PRODUCT      PRODMGR
                                        PROD24C
                The assigned code for each product manager (PM).  A PM
                is primarily responsible for: processing applications for
                new and amended product registration, petitions for
                tolerances, experimental-use permits, and special local
                need applications.  (NOTE: Link to the PRODMGR file
                using 'PM_TEAM' to obtain the associated descriptive
                product manager name in field 'PM_NAME' and telephone
                number in 'PM_PHONE'.)

PREVREG_NR  Numeric          11        PRODXFER     PRODUCT
                EPA assigned pesticide product registration number
                (identical to REG_NR except this field designates the
                former pesticide product registration number as part of
                a transfer action on the PRODXFER file).  When
```

displaying this number an edit mask of ZZZZ9-ZZZZ9 or
999999-99999 should be used. (NOTE: The first 6 digits
of every pesticide product registration number reflects
the EPA assigned registrant company number 'CO_NR'.)

PROD_NAME   Character   70   DIST
                                       PRODUCT
        The pesticide product name as identified to EPA by the
        registrant or distributor.

REG_NR   Numeric   11   DIST   PRODUCT
                                       PEST
                                       PRODTYPE
                                       PRODUCT
                                       PROD24C
                                       PRODXFER
                                       SITE
        EPA assigned pesticide product registration number.
        When displaying this number an edit mask of ZZZZ9-ZZZZ9
        or 999999-99999 should be used.
        (NOTE: The first 6 digits of every pesticide product
        registration number reflects the EPA assigned registrant
        company number 'CO_NR'.)

RUP_FLAG   Character   1   PRODUCT
                                       PROD24C
        Identifies if the product is a restricted use product.
        The field values are 'T' for true and 'F' for false.

SEQ_NR   Numeric   3   CHEMNAME
        Internal EPA chemical name sequencing number used to
        handle multiple occurences of chemical abstract service
        records, chemical synonyms and chemical trade names.
        ***** (WILL BE DROPPED AS OF JULY 7, 2003) *****

SITE_CODE   Character   9   PRODSITE   SITENAME
                                       SITE24C
        EPA assigned code for each site associated with a
        pesticide product. (NOTE: Link to the SITENAME file
        using 'SITE_CODE' to obtain the associated descriptive
        site name in field 'SITE_DESC'.)

SITE_DESC   Character   100   SITENAME
        The site name description associated with each
        'SITE_CODE'.

SLN_NAME   Character   45   PROD24C
        To be used as an append to the 70-character product name
        on special local need FIFRA section 24(c) registrations.
        The 45-characters contain use site information.

SLN_NEED   Character   1   PROD24C
        The nature of the special local need for the FIFRA section
        24(c) registration is represented by one of the following:
                                                         VALUES
                                                         ======
                                                          blank
        There is no pesticide product registered by EPA   A
        for such use.
        There is no EPA-registered pesticide product which,   B

```
             under the conditions of use within the State, would
             be as safe and/or as efficacious for such use within
             the terms and conditions of EPA registration.
             An appropriate EPA-registered pesticide product is    C
             not available.

    SLN_TYPE    Character       9        PROD24C
             The type of special local need FIFRA section 24(c) registration
             is represented as one or more of the following values:
             (NOTE: Up to 3 values are captured for each registration.)
                                                            VALUES
                                                            ======
                                                             blank
             To permit use of a new product.                   A
             To amend EPA registrations for one or more of the following
             purposes:
                  To permit use on additional crops or animals.   B1
                  To permit use at additional sites.              B2
                  To permit use against additional pests.         B3
                  To permit use of additional application
                       techniques or equipment.                  B4
                  To permit use at different application rates.   B5
                  Other.                                         B6 or C
             (NOTE: On older registrations there may appear the following:)
                  To prescribe special label directions for one or both
                       of the following purposes:
                  Preventing unreasonable adverse effects on man or the
                       environment under local use conditions.     B6A
                  Providing for local use conditions affecting pesticide
                       efficacy.                                  B6B

    SLN_USE     Character       1        PROD24C
             If this 24(c) special local need registration is an
             amendment to an EPA-registered product, is it for a
             "changed use pattern" as defined in 40 CFR 162.3(k)?
             The values for this field are blank, Y for Yes, or
             N for No.

    TOX_CODE    Numeric         1        PRODUCT        TOXNAME
                                         PROD24C
             Code associated with the toxicity (signal word) of each
             pesticide product.  (NOTE: Link to the TOXNAME file
             using 'TOX_CODE' to obtain the associated descriptive
             toxicity name in field 'TOX_DESC'.)

    TOX_DESC    Character       79       TOXNAME
             The (signal word) description associated with each
             'TOX_CODE'.

    TYPE_CODE   Character       2        PRODTYPE       TYPENAME
                                         TYPE24C
             The type of pesticide product expressed as a code (i.e.
             insecticide, fungicide, rodenticide).  (NOTE: Link to
             the TYPENAME file using 'TYPE_CODE' to obtain the
             associated descriptive type of product name in field
             'TYPE_DESC'.)

    TYPE_DESC   Character       78       TYPENAME
             The type of pesticide product description associated
```

```
          with each 'TYPE_CODE'.

XFER_DATE    Date              8         PRODXFER
          The effective date of a pesticide product registration
          transfer action.  The XFER_DATE is provided in the
          format CCYYMMDD.
```
