RE: National Historic Preservation Act Section 106 Consultation Opportunity; New Mexico Gas Company at Pueblo of Laguna; EPA Permit Number: R6NSR-NM-003

Dear President Begaye:

The Environmental Protection Agency (EPA), Region 6 is proposing a draft Synthetic Minor New Source Review (MNSR) permit for the New Mexico Gas Company (NMGC) Redonda Compressor Station on the Pueblo of Laguna, Valencia County, New Mexico. This is an existing operational facility, and the purpose of the draft MNSR permit is to establish operating parameters for this facility under applicable federal air permitting regulations pursuant to 40 CFR § 49.151-49.159.

The EPA has determined that this project is a federal undertaking under the National Historic Preservation Act (NHPA), and therefore, is subject to the review process set forth in Section 106 of the NHPA. The EPA considered factors associated with the continued operation of this facility and information provided by NMGC. Prior to construction of the existing facility, an archaeological survey was prepared in 1990 by Chambers Group Inc. for this area. The construction of the facility occurred following the completion of this archaeological survey, thus any artifacts that may have been undiscovered by the archaeological survey, are likely now gone or disturbed by the previous construction of the facility. Since there are no new construction activities and therefore no new ground disturbances associated with the permitting of this facility, the EPA concludes that continued operation of this facility will have no effect on potential archeological sites. Although we have reached this conclusion based on the history of this facility, we understand that your Tribe may have had a historical interest in New Mexico and possibly in Valencia County.

We are writing to inquire if you are interested in participating in the Section 106 Consultation process on this proposed permit. At this time, the EPA does not anticipate consultations with the SHPO because of the lack of cultural resources in the project area, but we understand that you may want to provide additional information or discuss your interests in the area or project site. To provide you with background on this project, the permit application and the archaeological survey mentioned above can be found on the EPA Region 6 website at: http://www2.epa.gov/caa-permitting/tribal-nsr-permits-epa-south-central-region.

1 The Archaeological Survey Of 5.4 Acres For A Proposed Compressor Station On Pueblo Of Laguna Lands, Valencia County, New Mexico is available at: https://www.epa.gov/sites/production/files/2015-12/documents/redonda-laguna-assessment.pdf
If you are interested in Section 106 consultation with EPA regarding this project, or if you have any questions regarding this request, please contact me at (214) 665-6435 or Tina Arnold at (214) 665-2709. We respectfully request your response within thirty (30) days of this letter. We look forward to working with you on this matter.

Sincerely,

Jeff Robinson

RE: National Historic Preservation Act Section 106 Consultation Opportunity; New Mexico Gas Company at Pueblo of Laguna; EPA Permit Number: R6NSR-NM-003

Dear Chairman Honanie:

The Environmental Protection Agency (EPA), Region 6 is proposing a draft Synthetic Minor New Source Review (MNSR) permit for the New Mexico Gas Company (NMGC) Redonda Compressor Station on the Pueblo of Laguna, Valencia County, New Mexico. This is an existing operational facility, and the purpose of the draft MNSR permit is to establish operating parameters for this facility under applicable federal air permitting regulations pursuant to 40 CFR § 49.151-49.159.

The EPA has determined that this project is a federal undertaking under the National Historic Preservation Act (NHPA), and therefore, is subject to the review process set forth in Section 106 of the NHPA. The EPA considered factors associated with the continued operation of this facility and information provided by NMGC. Prior to construction of the existing facility, an archaeological survey was prepared in 1990 by Chambers Group Inc. for this area. The construction of the facility occurred following the completion of this archaeological survey, thus any artifacts that may have been undiscovered by the archaeological survey, are likely now gone or disturbed by the previous construction of the facility. Since there are no new construction activities and therefore no new ground disturbances associated with the permitting of this facility, the EPA concludes that continued operation of this facility will have no effect on potential archaeological sites. Although we have reached this conclusion, based on the history of this facility, we understand that your Tribe may have had a historical interest in New Mexico and possibly in Valencia County.

We are writing to inquire if you are interested in participating in the Section 106 Consultation process on this proposed permit. At this time, the EPA does not anticipate consultations with the SHPO because of the lack of cultural resources in the project area, but we understand that you may want to provide additional information or discuss your interests in the area or project site. To provide you with background on this project, the permit application and the archeological survey mentioned above can be found on the EPA Region 6 website at: http://www2.epa.gov/CAA-permitting/tribal-nsr-permits-epa-south-central-region.

If you are interested in Section 106 consultation with the EPA regarding this project, or if you have any questions regarding this request, please contact me at (214) 665-6435 or Tina Arnold at (214) 665-2709. We respectfully request your response within thirty (30) days of this letter. We look forward to working with you on this matter.
