

## 100% Green Power Users (as of October 24, 2016)

The 100% Green Power Users list represents the Partners that are using green power to meet 100 percent of their U.S. organization-wide electricity use. The combined green power use of these 784 organizations amounts to nearly 16.5 billion kilowatt-hours of green power annually, which is equivalent to the electricity use of more than 1.5 million average American households each year.
