Log of XML Schema Changes Made for Non-Road Spark Ignition Release 22.0 – 10/14/2016

Purpose

This document identifies XML schema modifications to the Engines and Vehicles Compliance Information System (EV-CIS) Non-Road Spark Ignition family of schemas.

Modified XML Files

EN_VER_NRSI_SparkIgnitionDataElements_v0.95.xsd

EN_VER_NR_SharedDataElements_v0.95.xsd

EN_VER_NRSI_SparkIgnitionDataElements_v0.95.xsd

- The complex data type EvaporativeFamilyDetails was changed as follows:
 - Data element UpdateCorrectionCommentText [1000 character (NRSI-EV-82)] was added with cardinality (0).
 - Data element ManufacturerEvaporativeFamilyCommentText [500 character (NRSI-EV-77)] was added with cardinality (0).
- The complex data type TestInformationDetails was changed as follows:
 - Data element ManufacturerEvaporativeFamilyCommentText [500 character (NRSI-EV-77)] was removed.

XML Shared Data Element and Data Type File Modifications

The annotation following the data element name references the corresponding data element identifiers in the data requirements (DR) spreadsheet. Note that some data elements may be used in more locations in the schemas than defined in the DR spreadsheet.

EN_VER_NR_SharedDataElements_v0.95.xsd

The following data element updates were implemented:

- The annotation for Data element UpdateCorrectionCommentText was changed to “1 to 1000 characters (NRSI-EF129,NRSI-EV82)”
