New TRI-MEweb: Now Available

TRI-MEweb, the application facilities use to prepare and submit Toxics Release Inventory (TRI) reporting forms, has a new look! The modernized application streamlines and simplifies the process you use to prepare and certify forms.

Online Help
The new TRI-MEweb now has on-page guidance within form sections. You can search for regulatory or chemical specific topics by entering key words in the Online Help feature.

Accessing Information
You can now manage your facility, user profile, and view a snapshot of your form status, pending submissions and release trends, all from one location.

Simplified Navigation
Navigating the application is easier and more intuitive with a new combined questionnaire and form mode.
TRI Reporting Community

Checking for Errors
You can now check for facility and form errors without leaving the page. The on-page checks and alert messages are more precise, so you know exactly what needs to be fixed.

For Certifying Officials
Certifying officials can now opt in for a Short Message Service (SMS) verification as an alternative to answering security questions when electronically signing and sending submissions to EPA.

TRI Facilities Wizard
Whether you are creating a new TRI facility or adding an existing one, the process is easier than ever. TRI-MEweb now asks you simple questions to guide you through the process.

We hope you will enjoy the transformed **TRI-MEweb.**

A modernized TRI-MEweb is now available to TRI users. The new application offers enhanced user experience and streamlines the reporting process through intuitive design. The new application offers the following features:

Easily Accessible and Improved Online Help allows you to:
- Search on regulatory topics, TRI chemicals, or specific form sections from a centralized tool
- View context sensitive tips via instructional language, hover text and icons
- Use short tutorial segments to learn how to complete certain tasks in TRI-MEweb
- Launch a live chat from the software
- Access contact information for the CDX Help Desk and TRI Information Center

Simplified Navigation allows you to:
- Navigate 50% fewer pages to prepare and certify forms
- Use progress bars to navigate a form and to certify

Enhancements for Certifying Officials allow you to:
- Use a Short Message Service (SMS) verification to sign pending forms
- Enter comments when canceling form to relay information to preparers
- Easily sign your TRIFID signature agreement as part of the form certification process

Simplified Facility Management allows you to:
- Link a facility to TRI-MEweb accounts by answering simple questions
- Manage multi-establishments more easily
- Request a facility access key directly from TRI-MEweb rather than through the CDX Help Desk

Improved Error Checking allows you to:
- Validate facility and form data in a single step
- View relevant errors while preparing form sections
- Receive more detailed explanations for possible error alerts
- Correct facility critical errors using error navigation mode

Easy Access to Information allows you to:
- View the status of initiated forms
- View chemical release trends for each facility
- Get notifications about your reporting status and use links to navigate to applicable sections
- Update your CDX profile information

For more information visit us online or contact the CDX help desk.
