## INSTRUCTIONS

### GENERAL

**This form must be completed by all applicants who check "yes" to Item II-B in Form 1.** Not all animal feeding operations or fish farms are required to obtain NPDES permits. Exclusions are based on size. See the description of these statutory and regulatory exclusions in the General Instructions that accompany Form 1.

For aquatic animal production facilities, the size cutoffs are based on whether the species are warm water or cold water, on the production weight per year in harvestable pounds, and on the amount of feeding in pounds of food (*for cold water species*). Also, facilities which discharge less than 30 days per year, or only during periods of excess runoff (*for warm water fish*) are not required to have a permit.

Refer to the Form 1 instructions to determine where to file this form.

#### Item I-A

See the note above and the General Instructions which accompany Form 1 to be sure that your facility is a "concentrated animal feeding operation" (CAFO).

#### Item I-B

Use this space to give owner/operator contact information.

#### Item I-C

Check "proposed" if your facility is not now in operation or is expanding to meet the definition of a CAFO in accordance with the information found in the General Instructions that accompany Form 1.

#### Item I-D

Use this space to give a complete legal description of your facility's location including name, address, and latitude/longitude. Also, the if a contract grower, the name and address of the integrator.

#### Item II

Supply all information in item II if you checked (1) in item I-A.

#### Item II-A

Give the maximum number of each type of animal in open confinement or housed under roof (either partially or totally) which are held at your facility for a total of 45 days or more in any 12 month period. Provide the total number of animals confined at the facility.

#### Item II-B

Provide the total amount of manure, litter and wastewater generated annually by the facility. Identify if manure, litter and wastewater generated by the facility is to be land applied and the number of acres, under the control of the CAFO operator, suitable for land application. If the answer to question 3 is yes, provide the estimated annual quantity of manure, litter and wastewater that the applicant plans to transfer off-site.

#### Item II-C

Check this box if you have submitted a topographic map of the geographic area in which the CAFO is located showing the specific location of the production area.

#### Item II-D

1. Provide information on the type of containment and the capacity of the containment structure (s).

2. The number of acres that are drained and collected in the containment structure (s).

3. Identify the type of storage for the manure, litter and/or wastewater. Give the capacity of this storage in days and gallons or tons.

#### Item II-E

Provide information concerning the status of the development and implementation of a nutrient management plan for the facility. In those cases where the nutrient management plan has not been completed, provide an estimated date of development and implementation. If not land applying, describe the alternative uses of the manure, litter and wastewater (e.g., composting, pelletizing, energy generation, etc.).

#### Item II-F

Check any of the identified conservation practices that are being implemented at the facility to control runoff and protect water quality.

#### Item III

Supply all information in Item III if you checked (2) in Item I-A.

#### Item III-A

Outfalls should be numbered to correspond with the map submitted in Item XI of Form 1. Values given for flow should be representative of your normal operation. The maximum daily flow is the maximum measured flow occurring over a calendar day. The maximum 30-day flow is the average of measured daily flow over the calendar month of highest flow. The long-term average flow is the average of measure daily flows over a calendar year.

#### Item III-B

Give the total number of discrete ponds or raceways in your facility.

Under "other," give a descriptive name of any structure which is not a pond or a raceway but which results in discharge to waters of the United States.

#### Item III-C

Use names for receiving water and source of water which correspond to the map submitted in Item XI of Form 1.

#### Item III-D

The names of fish species should be proper, common, or scientific names as given in special Publication No. 6 of the American Fisheries Society. "A List of Common and Scientific Names of Fishes from the United States and Canada." The values given for total weight produced by your facility per year and the maximum weight present at any one time should be representative of your normal operation.

#### Item III-E

The value given for maximum monthly pounds of food should be representative of your normal operation.

#### Item IV

The Clean Water Act provides for severe penalties for submitting false information on this application form.

Section 309(C)(2) of the Clean Water Act provides that "Any person who knowingly makes any false statement, representation, or certification in any application...shall upon conviction, be punished by a fine of no more than \$10,000 or by imprisonment for not more than six months, or both."

### Federal regulations require the certification to be signed as follows:

- For corporation, by a principal executive officer of at least the level of vice president.
- For a partnership or sole proprietorship, by a general partner or the proprietor, respectively; or
- For a municipality, State, Federal, or other public facility, by either a principal executive officer or ranking elected official.
