ND = Pollutant Not Detected  
 — = Sample not taken or invalid

The sample screening level is a level of pollution in the air that is below what we expect to cause health problems from short-term exposures

(Results are for metals in air samples of particulate matter 10 micrograms in diameter and smaller (PM10) collected over a 24-hour period to obtain an average concentration during that day.)

[\\*\\* EPA has replaced some data that previously were incorrectly reported. See the changes here.](#)
