Re: Princeton Street Bridge over the Asnebumskit Brook

Dear Sir/Madam:

Please find attached the EPA Notice of Intent application for a NPDES Dewatering General Permit, as well as the MassDEP Transmittal form and a topographic map of the area. There was extensive scouring under the above referenced bridge abutment during March 2010 forcing the closure of the bridge. Repairs are to be performed as soon as possible, which requires the dewatering behind a cofferdam. The bridge closure drastically increases the response time of emergency services to a large section of the Town.

If you have any questions or comments, please feel free to call me at (508) 829-0246.

Regards,

Daniel Hazen
DPW Engineer
