SUBJECT: Notice of Intent (NOI) for the Remediation General Permit
Massachusetts Water Resources Authority Contract #7021
Section 97A Water Main Extension Revere and East Boston, MA

Dear Mr. Alvarez,

On behalf of the Massachusetts Water Resources Authority and our client, P. Caliacco Corp., Environmental Management Professionals, Inc. is providing you with the attached Notice of Intent (NOI) for coverage under the Remediation General Permit (RGP) during the requisite dewatering activities associated with the subject project.

The project will consist of the installation of new water mains along Bennington Street in Revere and East Boston. The average depth of the utility trench is approximately six feet; several feet above the ground water levels. However, the contract specification requires that the contractor install a valve structure between project stations 0+00 to 0+50 at a depth of twelve feet, which is approximately two feet into groundwater. Consequently, the contractor may be required to handle residual water in the trench. Coverage under the RGP is being sought as an option to manage excess water.

Please review the attached NOI including a Site Locus, Discharge Location Map and DEP Priority Resource Map, Process Flow Diagram and Laboratory Analysis and contact me at 781-834-3822 if you should have any questions.

Sincerely

Ted Patch

3. Contaminant information. In order to complete this section, the applicant will need to take a minimum of one sample of the untreated water and have it analyzed for **all** of the parameters listed in Appendix III. Historical data, (i.e., data taken no more than 2 years prior to the effective date of the permit) may be used if obtained pursuant to: i. Massachusetts' regulations 310 CMR 40.0000, the Massachusetts Contingency Plan ("Chapter 21E"); ii. New Hampshire's Title 50 RSA 485-A: Water Pollution and Waste Disposal or Title 50 RSA 485-C: Groundwater Protection Act; or iii. an EPA permit exclusion letter issued pursuant to 40 CFR 122.3, provided the data was analyzed with test methods that meet the requirements of this permit. Otherwise, a new sample shall be taken and analyzed.

a) Based on the analysis of the sample(s) of the untreated influent, the applicant must check the box of the sub-categories that the potential discharge falls within.
