Attention: Remediation General Permit NOI Processing

Re: Re-Application for Coverage under the 2010 Remediation General Permit
ExxonMobil Everett Terminal
52 Beacham Street, Everett, MA
NPDES Permit No. MAG910464

Dear Sir or Madam:

On behalf of Exxon Mobil Corporation (ExxonMobil), Roux Associates Inc. (Roux Associates) respectfully submits this National Pollution Discharge Elimination System (NPDES) Remediation General Permit (RGP) Notice of Intent (NOI) for proposed dewatering measures associated with remedial actions at three areas of the ExxonMobil Everett Terminal located at 52 Beacham Street in Everett, Massachusetts (hereafter referred to as the Site or Terminal, Figure 1). A Site Plan showing the location of the three areas is provided as Plate 1. The Terminal is a listed Massachusetts Department of Environmental Protection (MassDEP) disposal site (MassDEP Site #3-0310). Remedial actions conducted at the Terminal are being performed in accordance with the Massachusetts Contingency Plan (MCP).

Groundwater is anticipated to be encountered during the excavation in the three aforementioned areas and as a result, it is likely that dewatering measures will be necessary to complete the proposed excavation activities. Based on data and information obtained from environmental investigations conducted at the Terminal, it is expected that the groundwater in the excavations will be impacted with petroleum constituents. The impacted groundwater will be treated before being discharged to the Terminal's stormwater collection system. The treatment system will generally consist of bag filters, granulated activated carbon, and cartridge filters as shown on the attached System Schematic (Figure 2). The Terminal's stormwater collection system ultimately discharges to the Island End River under general NPDES Permit #MA0000833. Excavation dewatering measures have not yet been performed and are scheduled to occur during 2011 and 2012.

Discharge from the proposed dewatering measures was previously authorized by the United States Environmental Protection Agency (USEPA) on August 13, 2010 for coverage by the 2005 RGP under NPDES Permit #MAG910464. However as discussed above, dewatering measures have not yet been performed and the 2005 RGP expired on September 9, 2010. As a result, Roux Associates is submitting this NOI to maintain coverage under the 2010 RGP. The following information is attached in support of this NOI:

1. Suggested Form for Notice of Intent (NOI) for the Remediation General Permit;
2. Site Location Map (with discharge location);
3. System Schematic;
4. Site Plan;
5. NOI Sampling Summary Table; and
6. Laboratory Reports.

Note that representative samples for characterizing groundwater in these three areas of the Terminal were collected for the 2005 RGP in April 2010. Since the data was obtained within two years of this re-application, it has been used in support continued coverage under the 2010 RGP.

If you have any questions or comments regarding the attached NOI, please do not hesitate to contact the undersigned at (781) 270-6600.

Sincerely,

ROUX ASSOCIATES, INC.

Jeffrey R. LaCroix, PG

Remediation General Permit
Appendix V

Notice of Intent (NOI)
Suggested Forms & Instructions

I. Notice of Intent (NOI) Suggested Form and Instructions

In order to be covered by the remediation general permit (RGP), applicants must submit a completed Notice of Intent (NOI) to EPA Region I and the appropriate state agency. The owner or operator, as defined by 40 CFR § 122.2, means the owner or operator of any "facility or activity" subject to regulation under the NPDES program.

The following are three general "**operator"** scenarios (variations on any of these three are possible, especially as the number of owners and contractors increases):

▸ **"***Owner" as "Operator" - sole permittee.* The property owner designs the structures and control systems for the site, develops and implements the BMPP, and serves as general contractor (or has an on-site representative with full authority to direct day-to-day operations). Under the definition of operator, in this case, the "Owner" would be considered the "operator" and therefore the only party that needs permit coverage. Everyone else working on the site may be considered subcontractors and do not need to apply for permit coverage.

▸ *"Contractor" as "Operator" - sole permittee.* The property owner hires a company (e.g., a contractor) to design the project and oversee all aspects, including preparation and implementation of the BMPP and compliance with the permit (e.g., a "turnkey" project). Here, the contractor would likely be the only party needing a permit. Similarly, EPA expects that property owners hiring a contractor or consultant to perform groundwater remediation work (e.g., due to a leaking fuel oil tank) would come under this type of scenario. EPA believes that the contractor, being a professional in the industry, should be the responsible entity rather than the individual. The contractor is better equipped to meet the requirements of both applying for permit coverage and developing and properly implementing the plans needed to comply with the permit. However, property owners would also meet the definition of "operator" and require permit coverage in instances where they perform any of the required tasks on their personal properties.

▸ "*Owner" and "Contractor" as "Operators" - co-permittees.* The owner retains control over any changes to site plans, BMPPs, or wastewater conveyance or control designs, but the contractor is responsible for conducting and overseeing the actual activities (e.g., excavation, installation and operation of treatment train, etc.) and daily implementation of BMPP and other permit conditions. In this case, both parties need to apply for coverage.

Generally, a person would not be considered an "operator," and subsequently would not need permit coverage, if: 1) that person is a subcontractor hired by, and under the supervision of, the owner or a general contractor (e.g., if the contractor directs the

subcontractor's activities on-site, it is probably not an operator); or 2) the person's activities would otherwise result in the need for coverage under the RGP but another operator has legally assumed responsibility for the impacts of project activities.

A. Instructions for the Suggested Notice of Intent (NOI) - At a minimum, the Notice of Intent must include the following for each individual facility or site. Additional information may be attached as needed.

1. General facility/site information.

a) Provide the facility/site name, mailing address, and telephone and fax numbers. Provide the facility Standard Industrial Classification (SIC) code(s), which can be found online at http://www.osha.gov/pls/imis/sic_manual.html. Provide the site location, including longitude and latitude.

b) Provide the facility/site owner's name, address, email address, telephone and fax numbers, if different from the site information. Indicate whether the owner is a Federal, State/Tribal, private, or other entity.

c) Provide the site operator's (e.g., contractor's) name, mailing address, telephone and fax numbers, and email address if different from the owner's information.

d) For the site for which the application is being submitted, indicate whether:

1) a prior NPDES permit exclusion has been granted for the discharge (if so, provide the tracking number of the exclusion letter);

2) a prior NPDES application (Form 1 & 2C – for reference, please visit http://www.epa.gov/region1/npdes/epa_attach.html) has ever been filed for the discharge (if so, provide the tracking number and date that the application was submitted to EPA);

3) the discharge is a "new discharge" as defined by 40 CFR 122.2; and

4) for sites in Massachusetts, is the discharge covered under the Massachusetts Contingency Plan (MCP) 310 CMR 40.0000 and exempt from state permitting.

e) Indicate whether there is any ongoing state permitting, licensing, or other action regarding the facility or site which is generating the discharge. If "yes," provide any site identification number assigned by the state of NH or MA, any permit or license number assigned, and the state agency contact information (e.g. name, location, telephone no.).

f) Indicate whether or not the facility is covered by other EPA permits including:

1) the Multi-Sector General Permit (MSGP) http://cfpub.epa.gov/npdes/stormwater/msgp.cfm;
2) the Final NPDES General Permit for Dewatering Activity Discharges in Massachusetts and New Hampshire http://www.epa.gov/region1/npdes/dewatering.html;
3) the EPA Construction General Permit http://cfpub.epa.gov/npdes/stormwater/cgp.cfm;
4) an individual NPDES permit; or
5) any other water quality-related individual or general permit.

If so, provide permit tracking number(s).

g) Indicate if the site/facility discharge(s) to an Area of Critical Environmental Concern (ACEC), as shown on the tables and maps in Appendix I.

h) Based on the nature of the facility/site and any historical sampling data, the applicant must indicate which of the sub-categories within which the potential discharge falls.

2. Discharge information.

a) Describe the discharge activities to be covered by the permit. Attach additional sheets as needed.

b) Provide the following information about each discharge:

1) the number of discharge points;
2) the maximum and average flow rate of the discharge in cubic feet per second. For the average flow magnitude, include the units and appropriate notation if this value is a calculated design value or estimate if technical/design information is not available;
3) the latitude and longitude of each discharge with an accuracy of 100 feet (see EPA's siting tool at: http://www.epa.gov/tri/report/siting_tool);
4) the total volume of potential discharge (gal), only if hydrostatic testing;
5) whether the discharge(s) is intermittent or seasonal and if ongoing.

c) Provide the expected start and end dates of discharge (month/day/year).

d) Attach a line drawing or flow schematic showing water flow through the facility including:

1) sources of intake water;
2) contributing flow from the operation;
3) treatment units; and
4) discharge points and receiving waters(s).

3. Contaminant information.

In order to complete the NOI, the applicant will need to take a minimum of one sample of the untreated water and have it analyzed for the parameters applicable to the sub-category into which the discharge falls, as listed in Appendix III of the permit and selected in Part 1 of the NOI form, except as noted below.

Permittees shall provide additional sampling results with the NOI if such sampling already exists, or if the permittee has reason to believe the site contains additional contaminants not listed in Appendix III for that sub-category or contains additional contaminants not included in Appendix III.

The applicant may use historical data as a substitute for the new sample if the data was collected no more than 2 years prior to the "Submittal of the NOI" and if collected pursuant to:

i. for sites in Massachusetts, 310 CMR 40.0000, the Massachusetts Contingency Plan ("Chapter 21E");

ii. for sites in New Hampshire, New Hampshire's Title 50 RSA 485-A: Water Pollution and Waste Disposal or Title 50 RSA 485-C: Groundwater Protection Act;

a) Based on the analysis of the untreated influent, the applicant must indicate whether each listed chemical is believed present or believed absent in the potential discharge.

Based on the required sampling and analysis, the applicant must fill in the table, or provide a narrative description, with the following additional information for each chemical that is believed present (chemical that violate EPA's criteria limitations):

1) the number of samples taken (minimum of one sample for applicable parameters per Appendix III);
2) the type of sample (e.g. grab, composite, etc.);
3) the analytical method used, including the method number;
4) the minimum level (ML) of the method used (based on Appendix VI);
5) the maximum daily amount (concentration (ug/l) and mass (kg)) of each pollutant, based on the sampling data

lb/day (pounds per day) equals flow (in million gallons per day, MGD) times concentration in milligrams per liter (mg/l) times 8.34.
Example: 2.5 MGD x 30 mg/l TSS x 8.34 = 625.5 lb TSS/day
MGD = gallons per minute (gpm) x 0.00144
1 kg = 2.2 lbs

And;
6) the average daily amount (concentration and mass) of each pollutant, based on the sampling data.

If the results of any sampling indicate that pollutants exist in addition to those listed in Appendix III of the RGP of the permit, the applicant must also describe those contaminants on the NOI in boxes in section I.3.c.)on the line marked "Other," or use additional sheets as needed. Subsequently, EPA may require monitoring for such parameters or will decide if an individual permit is necessary.

c) Determination of Reasonable Potential and Allowable Dilution for Discharges of Metals:

If any *metals* are believed present in the potential discharge to freshwater[1], the applicant must follow the procedures below to determine the dilution factor for each metal.

Step 1: Initial Evaluation

1) The applicant must evaluate all metals believed present in the discharge subject to this permit, including "naturally occurring" metals such as dissolved and/or total Iron. Applicants must enter the highest detected concentration of the metal at zero dilution in the "Maximum value" column of the NOI.

2) Based on the maximum concentration of each metal, the applicant must perform an initial evaluation assuming zero dilution in the receiving water. The applicant must compare the metals concentrations in the untreated (intake) waters to the effluent limits contained in Appendix III.

[1]Dilution factors may be available for discharges to saline waters but only with approval of the flow modeling information from the State prior to the submission of the NOI.

i. If potential discharges (untreated influent) with metals contain concentrations above the concentration limits listed in Appendix III, applicant must proceed to step 2.
ii. If potential discharges (untreated influent) with metals contain concentrations below the concentrations listed in Appendix III, the applicant may skip step 2 and those metals will **not** be subject to permit limitations or monitoring requirements.

Step 2: Calculation of Dilution Factor

1) **For applicants in NH**: If a metal concentration in a potential discharge (untreated influent) to **freshwater** exceeds the limits in Appendix III with zero dilution, the applicant shall evaluate the potential concentration considering a dilution factor (DF) using the formula below. **For sites in New Hampshire, the applicant must contact NH DES to determine the 7Q10 and dilution factor.**

DF = [(Qd + Qs)/Qd] x 0.9

Where:

DF	=	**Dilution Factor**
Qd	=	**Maximum flow rate of the discharge in cubic feet per second (cfs) (1.0 gpm = .00223 cfs)**
Qs	=	**Receiving water 7Q10 flow, in cfs, where 7Q10 is the annual minimum flow for 7 consecutive days with a recurrence interval of 10 years**
0.9	=	**Allowance for reserving 10% of the assets in the receiving stream as per Chapter ENV-Wq 1700, Surface Water Quality Regulations**

i. Using the DF calculated from the formula above, the applicant must refer to the corresponding dilution range column in Appendix IV. The applicant then compares the maximum concentration of the metal entered on the NOI to the corresponding total recoverable metals limits listed in Appendix IV. Please note that for this reissuance the applicant will be permitted to determine a limit using any fraction within the 1-5 dilution factor range times the metal limit (for all regulated metals). For example: if the DF is 1.5, the Iron limit is 1,500 ug/L; if the DF is 1.5, the antimony limit is 8.4, etc. All limits above a dilution factor of 5 are maintained.

1. If a metal concentration in the potential discharge (untreated influent) is less than the corresponding limit in Appendix IV, the metal will **not** be subject to permit limitations or monitoring requirements.
2. If a metal concentration in the potential discharge (untreated influent) is equal to or exceeds the corresponding limit in Appendix IV, the applicant must reduce it in the effluent to a concentration below the applicable total recoverable metals limit in Appendix IV prior to discharge.

ii. In either case, the applicant must submit the results of this calculation as part of the NOI. EPA and NH DES will review the proposed effluent limitations for each metal and approve or disapprove the limits in the notification of coverage letter to the applicant.

2) **For applicants in MA**: If a metal concentration in a potential discharge (untreated influent) to **freshwater** exceeds the limits in Appendix III with zero dilution, the applicant must evaluate the potential concentration considering a dilution factor (DF) using the formula below.

DF = (Qd + Qs)/Qd

Where:
DF = Dilution Factor
Qd = Maximum flow rate of the discharge in cubic feet per second (cfs) (1.0 gpm = .00223 cfs)
Qs = Receiving water 7Q10 flow (cfs) where 7Q10 is the minimum flow (cfs) for 7 consecutive days with a recurrence interval of 10 years

i. The applicant may estimate the 7Q10 for receiving water by using available information such as nearby USGS stream gauging stations directly or by application of certain "flow factors," using historic streamflow publication information, calculations based on drainage area, information from state water quality offices, or other means. In many cases Massachusetts has calculated 7Q10 information using "flow factors" for a number of streams in the state. The source of the low flow value(s) used by the applicant must be included on NOI application form. Flow data can also be obtained from web applications such as the one located at: http://ma.water.usgs.gov/streamstats/.

ii. Using the DF calculated from the formula above, the applicant must refer to the corresponding dilution range column in Appendix IV. The applicant then shall compare the maximum concentration of each metal entered on the NOI to the corresponding total recoverable metals limit listed in Appendix IV. Please note that for this reissuance the applicant will be permitted to determine a limit using any fraction of the 0-5 of DF times the metal limit (for all regulated metals). For example: if the DF is 1.5, the Iron limit is 1,500 ug/L; if the DF is 1.5, the antimony limit is 8.4, etc. Not to exceed DF of 5.

1. If a metal concentration in the potential discharge (untreated influent) is less than the corresponding limit in Appendix IV, the metal will **not** be subject to permit limitations or monitoring requirements.
2. If a metal concentration in a potential discharge (untreated influent) is equal to or exceeds the corresponding limit in Appendix IV, the applicant must reduce it in the effluent to a concentration below the applicable total recoverable metals limit in Appendix IV prior to discharge.

iii. The applicant must submit the results of this calculation as part of the NOI. EPA (and MassDEP where the discharge is not covered by 310 CMR 40.0000) will review the proposed effluent limitations for each metal and approve or disapprove the limits in the notification of coverage letter to the applicant.

4. Treatment system information.
a) Provide a written description of the treatment train and how the system will be set up for each discharge and attach a schematic of the proposed or existing treatment system(s).
b) Identify each major treatment unit (e.g. frac tanks, filters, air stripper, liquid phase/vapor phase activated carbon, oil/water separators, etc.) by checking all that apply and describing any additional equipment not listed. Attach additional sheets as needed.
c) Provide the proposed average and maximum flow rates (in gallons per minute, gpm) for the discharge and the design flow rates (in gpm) of the treatment system. Clearly identify the component of the treatment with the most limited flow, i.e., the part of the treatment train that establishes the design flow.
d) Describe any chemical additives being used, or planned to be used, and attach MSDS sheets for each. EPA may request further information regarding the chemical composition of the additive, potential toxic effects, or other information to insure that approval of the use of the additive will not cause or contribute to a violation of State water quality standards. Approval of coverage under the RGP will constitute approval of the use of the chemical additive(s). If coverage of the discharge under the RGP has already been granted and the use of a chemical additive becomes necessary, the permittee must submit a Notice of Change (NOC).

5. Receiving surface water(s) information.
a) Identify the discharge pathway by checking whether it is discharged: directly to the receiving water (river, stream, or brook), within the facility (e.g., through a sewer drain), to a storm drain, to a wetland, or other receiving body.
b) Provide a narrative description of the discharge pathway, including the name(s) of the receiving waters into which discharge will occur.
c) Provide a detailed map(s) indicating the location of the site and outfall(s) to the receiving water(s):

1) For multiple discharges, the discharges should be numbered sequentially.
2) In the case of indirect dischargers (to municipal storm sewer, etc) the map(s) must be sufficient to indicate the location of the discharge to the indirect conveyance and the discharge to the state classified surface water. The map should also include the location and distance to the nearest sanitary sewer as well as the locus of nearby sensitive receptors (based on USGS topographical mapping), such as surface waters, drinking water supplies, and wetland areas.

d) Provide the state water quality classification of the receiving water and the basin (for Massachusetts, the Surface Water Quality Standards (314 CMR 4.00) are available at http://www.mass.gov/dep/water/laws/regulati.htm#wqual) (for New Hampshire, contact the NH DES at (603) 271-2984).
e) Specify the reported seven day-ten year low flow (7Q10) of the receiving water (see Section I.A.3) c. above). In New Hampshire, the 7Q10 must be provided by to the applicant by the New Hampshire Department of Environmental Services**.**

f) Indicate whether the receiving water is a listed 303(d) water quality impaired or limited water and if so, for which pollutants (see Section IX of the Fact Sheet for additional information).
For MA, the most updated integrated list of waters (CWA 303(d) and 305(b)) is available at http://www.mass.gov/dep/water/resources/tmdls.htm#info.
For NH, the most updated integrated list of waters (CWA 303(d) and 305(b)) is available at http://des.nh.gov/organization/divisions/water/wmb/swqa/index.htm.
Also, indicate if there is a final TMDL for any of the listed pollutants. For MA, final TMDLs can be found at: http://www.mass.gov/dep/water/resources/tmdls.htm and for NH, final TMDLs can be found at http://des.nh.gov/organization/divisions/water/wmb/tmdl/index.htm. For more information, contact the states at: New Hampshire Department of Environmental Services, Watershed Management Bureau at 603-271-3503 or the Massachusetts Department of Environmental Protection at 508-767-2796 or 508-767-2873.

6. ESA and NHPA Eligibility.
As required in Parts I.A.4 and Appendix VII the operator of a site/facility must ensure that the potential discharge will not adversely affect endangered species, designated critical habitat, or national historic places that are in proximity to the potential discharge. If the potential discharge is to certain water bodies, the applicant must also submit a formal certification with the NOI that indicates the consultation, with the U.S. Fish and Wildlife Service and National Marine Fisheries Service (the Services), resulted in either a no jeopardy opinion or a written concurrence on a finding that the discharge is not likely to adversely affect any endangered species or critical habitat. Facilities should begin the consultation as early in the process as possible.
a) Using the instructions in Appendix VII and information in Appendix II, indicate under which criterion listed you are eligible for coverage under this general permit.
b) If you selected criterion D or F, indicate if consultation with the federal services has been completed or if it is underway.
c) If consultation with the U.S. Fish and Wildlife Service and/or NOAA Fisheries Service was completed, indicate if a written concurrence finding that the discharge is "not likely to adversely affect" listed species or critical habitat was received.
d) Attach documentation of ESA eligibility as described below and required in Appendix VII, Part I.C, Step 4.

Criterion A - No federally-listed threatened or endangered species or federally-designated critical habitat are present: A copy of the most current county species list pages for the county(ies) where your site or facility and discharges are located. You must also include a statement on how you determined that no listed species or critical habitat are in proximity to your site or facility or discharge locations.

Criterion B – Section 7 consultation completed with the Service(s) on a prior project: A copy of the USFWS and/or NOAA Fisheries, as appropriate, biological opinion or concurrence on a finding of "unlikely to adversely effect" regarding the ESA Section 7 consultation.

Criterion C – Activities are covered by a Section 10 Permit: A copy of the USFWS and/or the NOAA Fisheries, as appropriate, letter transmitting the ESA Section 10 authorization.

Criterion D - Concurrence from the Service(s) that the discharge is "not likely to adversely affect" federally-listed species or federally-designated critical habitat (not including the four species of concern identified in Section I of Appendix I): A copy of the USFWS and/or the NOAA Fisheries, as appropriate, letter or memorandum concluding that the discharge is consistent with the general permit's "not likely to adversely affect" determination.

Criterion E – Activities are covered by certification of eligibility: A copy of the documents originally used by the other operator of your site or facility (or area including your site) to satisfy the documentation requirement of Criteria A, B, C or D.

Criterion F - Concurrence from the Service(s) that the discharge is "not likely to adversely affect" species of concern, as identified in Section I of Appendix I: A copy of the USFWS and/or the NOAA Fisheries, as appropriate, concurrence with the applicant's determination that the discharge is "not likely to adversely affect" listed species.

e) Using the instructions in Appendix VII, identify which criterion listed in Part C makes you eligible for coverage under this general permit.

f) If Criterion 3 was selected, attach all written correspondence with the State or Tribal historic preservation officers, including any terms and conditions that outline measures the applicant must follow to mitigate or prevent adverse effects due to activities regulated by the RGP.

7. Supplemental information. Applicants should provide any supplemental information needed to meet the requirements of the permit, including any analytical data used to support the application, and any certification(s) required.

8. Signature Requirements - The Notice of Intent must be signed by the operator in accordance with the signatory requirements of 40 CFR Section 122.22, including the following certification:

> *I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, I certify that the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I certify that I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.*

B. Suggested Form for Notice of Intent (NOI) for the Remediation General Permit

1. General facility/site information. Please provide the following information about the site:

a) Name of **facility/site**: ExxonMobil Everett Terminal		**Facility/site** mailing address:		
Location of **facility/site**: longitude: 71deg 03' 38" latitude: 42deg 23' 48"	Facility SIC code(s): 5171	Street: 52 Beacham Street		
b) Name of **facility/site owner:** ExxonMobil Contact: Arthur Powers		Town: Everett		
Email address of facility/site owner: arthur.f.powers@exxonmobil.com		State: MA	Zip: 02149	County: Middlesex
Telephone no. of facility/site **owner**: 617-381-2802				
Fax no. of facility/site **owner**: 671-381-2954		**Owner** is (check one): 1. Federal ○ 2. State/Tribal ○ 3. Private ◉ 4. Other ○ if so, describe:		
Address of **owner** (if different from site):				
Street: 800 Bell Street				
Town: Houston	State: TX	Zip: 77002	County: Harris County	
c) Legal name of **operator**:		**Operator** telephone no: 781-270-6600		
Roux Associates, Inc.		**Operator** fax no.: 781-270-9066	**Operator** email: jlacroix@rouxinc.com	
Operator contact name and title: Jeffrey LaCroix, Senior Geologist/Project Manager				
Address of **operator** (if different from owner):		Street: 67 South Bedford Street, Suite 101W		
Town: Burlington	State: MA	Zip: 01803	County: Middlesex	

d) Check Y for "yes" or N for "no" for the following:
1. Has a prior NPDES permit exclusion been granted for the discharge? Y ○ N ◉, if Y, number:
2. Has a prior NPDES application (Form 1 & 2C) ever been filed for the discharge?
Y ○ N ◉, if Y, date and tracking #:
3. Is the discharge a "new discharge" as defined by 40 CFR 122.2? Y ○ N ◉
4. For sites in Massachusetts, is the discharge covered under the Massachusetts Contingency Plan (MCP) and exempt from state permitting? Y ◉ N ○

e) Is site/facility subject to any State permitting, license, or other action which is causing the generation of discharge? Y ◉ N ○
If Y, please list:
1. site identification # assigned by the state of NH or MA: MassDEP RTN 3-0310
2. permit or license # assigned: 83095
3. state agency contact information: name, location, and telephone number:
MassDEP, Northeast Region, 205B Lowell Street, Wilmington, MA (978)694-3200

f) Is the site/facility covered by any other EPA permit, including:
1. Multi-Sector General Permit? Y ◉ N ○,
if Y, number: MAG910464
2. Final Dewatering General Permit? Y ○ N ◉,
if Y, number:
3. EPA Construction General Permit? Y ○ N ◉,
if Y, number:
4. Individual NPDES permit? Y ◉ N ○,
if Y, number: MA0000833
5. any other water quality related individual or general permit? Y ○ N ◉, if Y, number:

g) Is the site/facility located within or does it discharge to an Area of Critical Environmental Concern (ACEC)? Y ○ N ◉

h) Based on the facility/site information and any historical sampling data, identify the sub-category into which the potential discharge falls.

Activity Category	**Activity Sub-Category**
I - Petroleum Related Site Remediation	A. Gasoline Only Sites ☐ B. Fuel Oils and Other Oil Sites (including Residential Non-Business Remediation Discharges) ☐ C. Petroleum Sites with Additional Contamination ☒
II - Non Petroleum Site Remediation	A. Volatile Organic Compound (VOC) Only Sites ☐ B. VOC Sites with Additional Contamination ☐ C. Primarily Heavy Metal Sites ☐
III - Contaminated Construction Dewatering	A. General Urban Fill Sites ☐ B. Known Contaminated Sites ☐

IV - Miscellaneous Related Discharges	A. Aquifer Pump Testing to Evaluate Formerly Contaminated Sites ☐ B. Well Development/Rehabilitation at Contaminated/Formerly Contaminated Sites ☐ C. Hydrostatic Testing of Pipelines and Tanks ☐ D. Long-Term Remediation of Contaminated Sumps and Dikes ☐ E. Short-term Contaminated Dredging Drain Back Waters (if not covered by 401/404 permit) ☐

2. Discharge information. Please provide information about the discharge, (attaching additional sheets as necessary) including:

a) Describe the discharge activities for which the owner/applicant is seeking coverage:

Treated groundwater generated by remedial activities at 3 areas located in the North Tank Farm including: Area 1) area around the existing OWS; Area 2) waste storage area; and Area 3) northern portion of North Tank Farm (Plate 1). Discharges will be to the facility's stormwater treatment system.

b) Provide the following information about each discharge:

1) Number of discharge points: 1

2) What is the **maximum** and **average flow rate** of discharge (in cubic feet per second, ft^3/s)?
Max. flow 401 (50 gal/min) Is maximum flow a **design value**? Y ◉ N ○
Average flow (include units) 201 (25 gal/min) Is average flow a design value or estimate?

3) Latitude and longitude of each discharge within 100 feet:

pt.1: lat.	40deg23'40"	long.	70deg02'59"	pt.2: lat.		long.	;
pt.3: lat.		long.		pt.4: lat.		long.	;

4) If hydrostatic testing, total volume of the discharge (gals): NA

5) Is the discharge intermittent ◉ or seasonal ○ ?
Is discharge ongoing? Y ○ N ◉

c) Expected dates of discharge (mm/dd/yy): start Jul 1, 2010 end Dec 31, 2013

d) Please attach a line drawing or flow schematic showing water flow through the facility including:
1. sources of intake water, 2. contributing flow from the operation, 3. treatment units, and 4. discharge points and receiving waters(s). See Figures 1 and 2 and Plate 1

3. Contaminant information.

a) Based on the sub-category selected (see Appendix III), indicate whether each listed chemical is **believed present** or **believed absent** in the potential discharge. Attach additional sheets as needed.

b) For discharges where **metals** are believed present, please fill out the following (attach results of any calculations):

Step 1: Do any of the metals in the influent exceed the effluent limits in Appendix III (i.e., the limits set at zero dilution)? Y ◉ N ○	If yes, which metals? Arsenic, Cadmium, Copper, Iron, Lead
Step 2: For any metals which exceed the **Appendix III** limits, calculate the **dilution factor (DF)** using the formula in Part I.A.3.c (step 2) of the NOI instructions or as determined by the State prior to the submission of this NOI. What is the dilution factor for applicable metals? Metal: no dilution factor for salt water DF: NA Metal: DF: Metal: DF: Metal: DF: Etc.	Look up the limit calculated at the corresponding dilution factor in **Appendix IV.** Do any of the metals in the **influent** have the potential to exceed the corresponding **effluent** limits in Appendix IV (i.e., is the influent concentration above the limit set at the calculated dilution factor)? Y ○ N ○ If Y, list which metals: NA - No dilution factor

4. Treatment system information. Please describe the treatment system using separate sheets as necessary, including:

a) A description of the treatment system, including a schematic of the proposed or existing treatment system:						
See attached Figure 2						
b) Identify each applicable treatment unit (check all that apply):	Frac. tank ☒	Air stripper ☐	Oil/water separator ☒	Equalization tanks ☐	Bag filter ☒	GAC filter ☒
	Chlorination ☐	De-chlorination ☐	Other (please describe):	Oil/water separator will only be used on an as needed basis		

c) Proposed **average** and **maximum flow rates** (gallons per minute) for the discharge and the **design flow rate**(s) (gallons per minute) of the treatment system:
Average flow rate of discharge 25 gpm Maximum flow rate of treatment system 50 gpm
Design flow rate of treatment system 50 gpm

d) A description of chemical additives being used or planned to be used (attach MSDS sheets):

No Additives Proposed

5. Receiving surface water(s). Please provide information about the receiving water(s), using separate sheets as necessary:

a) Identify the discharge pathway:	Direct to receiving water ☐	Within facility (sewer) ☐	Storm drain ☒	Wetlands ☐	Other (describe):

b) Provide a narrative description of the discharge pathway, including the name(s) of the receiving waters:

After treatment, water will be pumped to the on-site stormwater system, an oil/water separator, a large stilling tank and ultimately to the Island End River.

c) Attach a detailed map(s) indicating the site location and location of the outfall to the receiving water:
1. For multiple discharges, number the discharges sequentially.
2. For indirect dischargers, indicate the location of the discharge to the indirect conveyance and the discharge to surface water
The map should also include the location and distance to the nearest sanitary sewer as well as the locus of nearby sensitive receptors (based on USGS topographical mapping), such as surface waters, drinking water supplies, and wetland areas.

d) Provide the state water quality classification of the receiving water SB

e) Provide the reported or calculated seven day-ten year low flow (7Q10) of the receiving water NA - Tidally influenced cfs
Please attach any calculation sheets used to support stream flow and dilution calculations.

f) Is the receiving water a listed 303(d) water quality impaired or limited water? Y ◉ N ○ If yes, for which pollutant(s)? Pathogens

Is there a final TMDL? Y ◉ N ○ If yes, for which pollutant(s)? priority organics, unionized ammonia, other inorganics, organic enrichment/Low DO, pathogens, oil and grease, taste, odor and color

6. ESA and NHPA Eligibility.

Please provide the following information according to requirements of Permit Parts I.A.4 and I.A.5 Appendices II and VII.

a) Using the instructions in Appendix VII and information on Appendix II, under which criterion listed in Part I.C are you eligible for coverage under this general permit?

A ◉ B ○ C ○ D ○ E ○ F ○

b) If you selected Criterion D or F, has consultation with the federal services been completed? Y ○ N ○ Underway ○

c) If consultation with U.S. Fish and Wildlife Service and/or NOAA Fisheries Service was completed, was a written concurrence finding that the discharge is "not likely to adversely affect" listed species or critical habitat received? Y ○ N ○

d) Attach documentation of ESA eligibility as described in the NOI instructions and required by Appendix VII, Part I.C, Step 4.

e) Using the instructions in Appendix VII, under which criterion listed in Part II.C are you eligible for coverage under this general permit?

1 ○ 2 ◉ 3 ○

f) If Criterion 3 was selected, attach all written correspondence with the State or Tribal historic preservation officers, including any terms and conditions that outline measures the applicant must follow to mitigate or prevent adverse effects due to activities regulated by the RGP.

7. Supplemental information.

Please provide any supplemental information. Attach any analytical data used to support the application. Attach any certification(s) required by the general permit.

See Attached

8. Signature Requirements: The Notice of Intent must be signed by the operator in accordance with the signatory requirements of 40 CFR Section 122.22, including the following certification:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, I certify that the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I certify that I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Facility/Site Name:	ExxonMobil Everett Terminal
Operator signature:	
Printed Name &Title:	Jeffrey LaCroix, Senior Geologist/Project Manager
Date:	

B. Submission of NOI to EPA - All operators applying for coverage under this General Permit must submit a completed Notice of Intent (NOI) to EPA. Signed and completed NOI forms and attachments must be submitted to EPA-NE at:

U.S. Environmental Protection Agency
5 Post Office Square, Suite 100
Mail Code OEP06-4
Boston, MA 02109-3912
ATTN: Remediation General Permit NOI Processing

or electronically mailed to NPDES.Generalpermits@epa.gov

or faxed to the EPA Office at 617-918-0505

If filling out the suggested NOI form electronically on EPA's website, the signature page must be signed and faxed or mailed to EPA at the fax number and/or address listed above.

1. Filing with the states - A copy of any NOI form filed with EPA-NE must also be filed with state agencies. The state agency may elect to develop a state specific form or other information requirements.

a) Discharges in Massachusetts - In addition to the NOI, permit applicants must submit copies of the State Application Form BRPWM 12, Request for General Permit coverage for the RGP. The application form and the Transmittal Form for Permit Application and Payment may be obtained from the Massachusetts Department of Environmental Protection (MassDEP) website at www.state.ma.us/dep. Municipalities are fee-exempt, but should send a copy of the transmittal form to that address for project tracking purposes. All applicants should keep a copy of the transmittal form and a copy of the application package for their records.

1) A copy of the NOI, the transmittal form, a copy of the check, and Form BRPWM 12 should be sent to:

Massachusetts Department of Environmental Protection
Division of Watershed Management
627 Main Street, 2nd floor
Worcester, MA 01608

2) A copy of the transmittal form and the appropriate fee should be sent to:

Massachusetts Department of Environmental Protection
P.O. Box 4062
Boston, MA 02111

Please note: Applicants for discharges in Massachusetts should note that under 310 CMR 40.000, *as a matter of state law*, the general permit only applies to discharges that are **not** subject to the

Massachusetts Contingency Plan (MCP) and 310 CMR 40.000. Therefore, discharges subject to the MCP are **not** required to fill out and submit the State Application Form BRPWM 12 or pay the state fees. However, they must submit a NOI to EPA.

b) Discharges in New Hampshire - applicants must provide a copy of the Notice of Intent to:

New Hampshire Department of Environmental Services
Water Division
Wastewater Engineering Bureau
P.O. Box 95
Concord, New Hampshire 03302-0095.

2. Filing with Municipalities - A copy of the NOI must be submitted to the municipality in which the proposed discharge would be located.

Notes:

Only detected parameters are displayed in this table

Effluent Limits are from the EPA General Remediation Permit, Appendix III - Effluent Limitations

ug/L = micrograms per liter

mg/L = milligrams per liter

S.U. = standard units

J = concentration is an approximate value

B = compound was found in the blank and sample

< indicates the result is less than the laboratory reporting limit

* indicates LCS or LCSN exceeds the control limits

Bold indicates the parameter was detected above the laboratory limit

Highlighted cells indicate an exceedance of the applicable effluent limit

Non-detected compounds are assumed to be 1 for average concentration calculation

Ground Water Analytical Laboratory Reports

TestAmerica
THE LEADER IN ENVIRONMENTAL TESTING

ANALYTICAL REPORT

Job Number: 360-27565-1

Job Description: Everett Terminal/MA

For:
Roux Associates, Inc.
67 South Bedford St
Suite 101W
Burlington, MA 01803

Attention: Mr. Jeff Lacroix

Approved for release.
Joe Chimi
Report Production Representative
4/19/10 2:25 PM

Designee for
Becky C Mason
Project Manager II
becky.mason@testamericainc.com
04/19/2010

Results relate only to the items tested and the sample(s) as received by the laboratory. The test results in this report meet all NELAC requirements for accredited parameters, exceptions are noted in this report. Pursuant to NELAC, this report may not be reproduced except in full, and with written approval from the laboratory. TestAmerica Westfield Certifications and Approvals: MADEP MA014, RIDOH57, CTDPH 0494, VT DECWSD, NH DES 2539, NELAP FL E87912 TOX, NELAP NJ MA008 TOX, NELAP NY 10843, NY ELAP 10843, North Carolina 647, NELAP PA 68-04386. Field sampling is performed under SOPs WE-FLD-001 and WE-FLD-002.

CASE NARRATIVE

Client: Roux Associates, Inc.

Project: Everett Terminal/MA

Report Number: 360-27565-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 04/05/2010; the samples arrived in good condition, properly preserved and on ice. The temperatures of the coolers at receipt were 5.6 and 6.0 C.

VOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples 360-27565-1 through 360-27565-3 were analyzed for volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260B. The samples were analyzed on 04/13/2010 and 04/15/2010.

Sample 360-27565-2(20X) required dilution prior to analysis due to high target concentration. The reporting limits have been adjusted accordingly.

No difficulties were encountered during the volatiles analyses.

All quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples 360-27565-1 and 360-27565-2 were analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 8270C LL. The samples were prepared on 04/12/2010 and analyzed on 04/15/2010.

Di-n-butyl phthalate was detected in method blank MB 360-56946/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged. Refer to the QC report for details.

Phenol-d5 failed the surrogate recovery criteria low for LCSD 360-56946/3-A. Refer to the QC report for details. Per method SOP, re-extraction is only required if two or more surrogates from any one fraction fail or any single surrogate falls below 10%.

4-Nitrophenol and Phenol failed the recovery criteria low for LCS 360-56946/2-A and LCSD 360-56946/3-A. Refer to the QC report for details.

Sample 360-27565-2(10X) required dilution prior to analysis due to the sample’s oily extract. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the semivolatiles analyses.

All other quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS (PCBS)

Samples 360-27565-1 and 360-27565-2 were analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA Method 608. The samples were prepared on 04/09/2010 and 04/13/2010 and analyzed on 04/12/2010 and 04/14/2010.

DCB Decachlorobiphenyl failed the surrogate recovery criteria low for 360-27565-2. Refer to the QC report for details. The sample was re-extracted with surrogate recoveries within control limits. The re-extraction was performed outside of holding time. Both sets of results are reported herein.

No other difficulties were encountered during the PCBs analyses.

All other quality control parameters were within the acceptance limits.

1,2-DIBROMOETHANE AND 1,2-DIBROMO-3-CHLOROPROPANE BY MICROEXTRACTION AND GAS CHROMATOGRAPHY
Samples 360-27565-1 and 360-27565-2 were analyzed for 1,2-dibromoethane and 1,2-dibromo-3-chloropropane by microextraction and gas chromatography in accordance with EPA SW-846 Method 8011. The samples were prepared and analyzed on 04/16/2010.

No difficulties were encountered during the EDB and DBCP analyses.

All quality control parameters were within the acceptance limits.

TOTAL METALS
Samples 360-27565-1 and 360-27565-2 were analyzed for total metals in accordance with EPA Method 200.7. The samples were prepared and analyzed on 04/06/2010.

Chromium was detected in method blank MB 360-56661/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged. Refer to the QC report for details.

No other difficulties were encountered during the total metals analyses.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY
Samples 360-27565-1 and 360-27565-2 were analyzed for total mercury in accordance with EPA Method 245.1. The samples were prepared on 04/07/2010 and analyzed on 04/08/2010.

No difficulties were encountered during the mercury analyses.

All quality control parameters were within the acceptance limits.

HEM AND SGT-HEM
Samples 360-27565-1 and 360-27565-2 were analyzed for HEM and SGT-HEM in accordance with EPA Method 1664A. The samples were prepared on 04/12/2010 and analyzed on 04/12/2010 and 04/14/2010.

This analysis was performed at TestAmerica Chicago, 2417 Bond Street, University Park, IL 60484.

Sample 360-27565-1 prep batch 500-83716, analytical batch 500-83717
(analyzed as HEM, since sample 360-27565-1 was non-detect for HEM and did not require silica gel treatment)
MB 0.8 mg/L 5.0 mg/L RL
LCS Observed 34.5 mg/L True value 40 mg/L 86% recovery limits 78-114%
LCSD Observed 34.7 mg/L True value 40 mg/L 87% recovery limits 78-114%

SGT-HEM was detected in method blank MB 500-83716/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged. Refer to the QC report for details.

No other difficulties were encountered during the HEM and SGT-HEM analyses.

All other quality control parameters were within the acceptance limits.

HEXAVALENT CHROMIUM
Samples 360-27565-1 and 360-27565-2 were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 7196A. The samples were analyzed on 04/06/2010.

No difficulties were encountered during the hexavalent chromium analyses.

All quality control parameters were within the acceptance limits.

TOTAL CYANIDE
Samples 360-27565-1 and 360-27565-2 were analyzed for total cyanide in accordance with LACHAT 210-00-1-A. The samples were prepared and analyzed on 04/08/2010.

No difficulties were encountered during the total cyanide analyses.

All quality control parameters were within the acceptance limits.

TOTAL PHENOLS
Samples 360-27565-1 and 360-27565-2 were analyzed for total phenols in accordance with LACHAT 210-00-1-A. The samples were prepared and analyzed on 04/14/2010.

Phenols, Total failed the recovery criteria high for the MS of sample 360-27565-2 in batch 360-27060. The associated LCS recovered within control limits. Refer to the QC report for details.

No other difficulties were encountered during the total phenols analyses.

All other quality control parameters were within the acceptance limits.

TOTAL SUSPENDED SOLIDS
Samples 360-27565-1 and 360-27565-2 were analyzed for total suspended solids in accordance with SM 2540D. The samples were analyzed on 04/06/2010.

No difficulties were encountered during the TSS analyses.

All quality control parameters were within the acceptance limits.

CHLORINE RESIDUAL
Samples 360-27565-1 and 360-27565-2 were analyzed for Chlorine Residual in accordance with SM 4500Cl F. The samples were analyzed on 04/06/2010.

No difficulties were encountered during the Res. Chlorine analyses.

All quality control parameters were within the acceptance limits.

PH
Samples 360-27565-1 and 360-27565-2 were analyzed for pH in accordance with SM 4500 H+. The samples were analyzed on 04/06/2010.

No difficulties were encountered during the pH analyses.

All quality control parameters were within the acceptance limits.

DATA REPORTING QUALIFIERS

Client: Roux Associates, Inc. Job Number: 360-27565-1

Lab Section	Qualifier	Description
GC/MS VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC/MS Semi VOA		
	B	Compound was found in the blank and sample.
	*	LCS or LCSD exceeds the control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC Semi VOA		
	H	Sample was prepped or analyzed beyond the specified holding time
	X	Surrogate is outside control limits
Metals		
	B	Compound was found in the blank and sample.
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
General Chemistry		
	B	Compound was found in the blank and sample.
	HF	Field parameter with a holding time of 15 minutes
	F	MS or MSD exceeds the control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Not all organic compounds are accreditied under NELAC
For methods with multiple compounds all compounds may not meet NELAC criteria, listing should be obtained from the laboratory
The lab carries additional accreditations with several states. This is listing is subject to change based on the laboratories current certification standing.

Question	T / F/ NA	Comment
Radioactivity either was not measured or, if measured, is at or below background	N/A	
The cooler's custody seal, if present, is intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	5.6 C / 6.0 C
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Is the Field Sampler's name present on COC?	True	
Sample Preservation Verified	True

ANALYTICAL REPORT

Job Number: 360-27593-1

Job Description: Everett Terminal/MA

For:
Roux Associates, Inc.
67 South Bedford St
Suite 101W
Burlington, MA 01803

Attention: Mr. Jeff Lacroix

Approved for release.
Joe Chimi
Report Production Representative
4/20/10 9:25 AM

Designee for
Becky C Mason
Project Manager II
becky.mason@testamericainc.com
04/20/2010

Results relate only to the items tested and the sample(s) as received by the laboratory. The test results in this report meet all NELAC requirements for accredited parameters, exceptions are noted in this report. Pursuant to NELAC, this report may not be reproduced except in full, and with written approval from the laboratory. TestAmerica Westfield Certifications and Approvals: MADEP MA014, RIDOH57, CTDPH 0494, VT DECWSD, NH DES 2539, NELAP FL E87912 TOX, NELAP NJ MA008 TOX, NELAP NY 10843, NY ELAP 10843, North Carolina 647, NELAP PA 68-04386. Field sampling is performed under SOPs WE-FLD-001 and WE-FLD-002.

Table of Contents

CASE NARRATIVE

Client: Roux Associates, Inc.

Project: Everett Terminal/MA

Report Number: 360-27593-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 04/06/2010; the samples arrived in good condition, properly preserved and on ice. The temperatures of the coolers at receipt were 5.8, 4.6 and 5.6 C.

VOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples 360-27593-1 through 360-27593-5 were analyzed for volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260B. The samples were analyzed on 04/15/2010.

4-Bromofluorobenzene failed the surrogate recovery criteria high for 360-27593-2 and 360-27593-4. Refer to the QC report for details. The samples were re-analyzed with similar results. The original results are reported herein.

For batch 360-57172, Acetone failed the CCV criteria high.

1,4-Dichlorobenzene-d4 failed the internal standard criteria low for the following samples: 360-27593-5, MB 360-57074/6 and MB 360-57172/6. No associated target analytes were detected in these samples. Results would be biased high.

Samples 360-27593-2(10X) and 360-27593-4(20X) required dilution prior to analysis due to high target concentration. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the volatiles analyses.

All other quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples 360-27593-2 through 360-27593-4 were analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 8270C LL. The samples were prepared on 04/12/2010 and analyzed on 04/15/2010.

Di-n-butyl phthalate was detected in method blank MB 360-56946/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged. Refer to the QC report for details.

Phenol-d5 failed the surrogate recovery criteria low for 360-27593-4 and LCSD 360-56946/3-A. Refer to the QC report for details. Per method SOP, re-extraction is only required if two or more surrogates from any one fraction fail or any single surrogate falls below 10%.

4-Nitrophenol and Phenol failed the recovery criteria low for LCS 360-56946/2-A and LCSD 360-56946/3-A. Refer to the QC report for details.

Sample 360-27593-2(10X) required dilution prior to analysis due to the sample’s oily extract. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the semivolatiles analyses.

All other quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS (PCBS)
Samples 360-27593-2 through 360-27593-4 were analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA Method 608. The samples were prepared on 04/09/2010 and 04/13/2010 and analyzed on 04/12/2010 and 04/14/2010.

DCB Decachlorobiphenyl failed the surrogate recovery criteria low for 360-27593-4. Refer to the QC report for details. The sample was re-extracted and re-analyzed with similar results. The original extraction is reported herein.

No other difficulties were encountered during the PCBs analyses.

All other quality control parameters were within the acceptance limits.

1,2-DIBROMOETHANE AND 1,2-DIBROMO-3-CHLOROPROPANE BY MICROEXTRACTION AND GAS CHROMATOGRAPHY
Samples 360-27593-1 through 360-27593-4 were analyzed for 1,2-dibromoethane and 1,2-dibromo-3-chloropropane by microextraction and gas chromatography in accordance with EPA SW-846 Method 8011. The samples were prepared and analyzed on 04/16/2010.

No difficulties were encountered during the EDB and DBCP analyses.

All quality control parameters were within the acceptance limits.

TOTAL METALS
Samples 360-27593-1 through 360-27593-4 were analyzed for total metals in accordance with EPA Method 200.7. The samples were prepared and analyzed on 04/07/2010.

No difficulties were encountered during the total metals analyses.

All quality control parameters were within the acceptance limits.

TOTAL MERCURY
Samples 360-27593-1 through 360-27593-4 were analyzed for total mercury in accordance with EPA Method 245.1. The samples were prepared on 04/07/2010 and analyzed on 04/08/2010.

No difficulties were encountered during the mercury analyses.

All quality control parameters were within the acceptance limits.

HEM AND SGT-HEM
Samples 360-27593-2 through 360-27593-4 were analyzed for HEM and SGT-HEM in accordance with EPA Method 1664A. The samples were prepared on 04/12/2010 and analyzed on 04/12/2010 and 04/14/2010.

This analysis was performed at TestAmerica Chicago, 2417 Bond Street, University Park, IL 60484.

Sample 360-27593-(3-4) prep batch 500-83716, analytical batch 500-83882
(analyzed as HEM, since samples 360-27593-3 and 360-27593-4 were non-detect for HEM and did not require silica gel treatment)
MB 0.8 mg/L 5.0 mg/L RL
LCS Observed 34.5 mg/L True value 40 mg/L 86% recovery limits 78-114%
LCSD Observed 34.7 mg/L True value 40 mg/L 87% recovery limits 78-114%

SGT-HEM was detected in method blank MB 500-83716/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged. Refer to the QC report for details.

No other difficulties were encountered during the HEM and SGT-HEM analyses.

All other quality control parameters were within the acceptance limits.

HEXAVALENT CHROMIUM
Samples 360-27593-1 through 360-27593-4 were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 7196A. The samples were analyzed on 04/07/2010.

No difficulties were encountered during the hexavalent chromium analyses.

All quality control parameters were within the acceptance limits.

TOTAL CYANIDE
Samples 360-27593-1 through 360-27593-4 were analyzed for total cyanide in accordance with LACHAT 210-00-1-A. The samples were prepared and analyzed on 04/15/2010.

No difficulties were encountered during the total cyanide analyses.

All quality control parameters were within the acceptance limits.

TOTAL PHENOLS
Samples 360-27593-2 through 360-27593-4 were analyzed for total phenols in accordance with LACHAT 210-00-1-A. The samples were prepared and analyzed on 04/14/2010.

Sample 360-27593-4(5X) required dilution prior to analysis due to high concentration. The reporting limits have been adjusted accordingly.

No difficulties were encountered during the total phenols analyses.

All quality control parameters were within the acceptance limits.

TOTAL SUSPENDED SOLIDS
Samples 360-27593-1 through 360-27593-4 were analyzed for total suspended solids in accordance with SM 2540D. The samples were analyzed on 04/09/2010.

No difficulties were encountered during the TSS analyses.

All quality control parameters were within the acceptance limits.

CHLORINE RESIDUAL
Samples 360-27593-1 through 360-27593-4 were analyzed for Chlorine Residual in accordance with SM 4500Cl F. The samples were analyzed on 04/07/2010.

No difficulties were encountered during the Res. Chlorine analyses.

All quality control parameters were within the acceptance limits.

PH
Samples 360-27593-1 through 360-27593-4 were analyzed for pH in accordance with SM 4500 H+. The samples were analyzed on 04/07/2010.

No difficulties were encountered during the pH analyses.

All quality control parameters were within the acceptance limits.

DATA REPORTING QUALIFIERS

Client: Roux Associates, Inc. Job Number: 360-27593-1

Lab Section	Qualifier	Description
GC/MS VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC/MS Semi VOA		
	B	Compound was found in the blank and sample.
	*	LCS or LCSD exceeds the control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
GC Semi VOA		
	X	Surrogate is outside control limits
Metals		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
General Chemistry		
	B	Compound was found in the blank and sample.
	HF	Field parameter with a holding time of 15 minutes
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Not all organic compounds are accreditied under NELAC
For methods with multiple compounds all compounds may not meet NELAC criteria, listing should be obtained from the laboratory
The lab carries additional accreditations with several states. This is the laboratories typcial listing but is subject to change based on the laboratories current certification standing.

ANALYTICAL REPORT

Job Number: 360-27623-1

Job Description: Everett Terminal MA

For:
Roux Associates, Inc.
67 South Bedford St
Suite 101W
Burlington, MA 01803

Attention: Mr. Jeff Lacroix

Approved for release.
Joe Chimi
Report Production Representative
4/21/10 2:36 PM

Designee for
Becky C Mason
Project Manager II
becky.mason@testamericainc.com
04/21/2010

Results relate only to the items tested and the sample(s) as received by the laboratory. The test results in this report meet all NELAC requirements for accredited parameters, exceptions are noted in this report. Pursuant to NELAC, this report may not be reproduced except in full, and with written approval from the laboratory. TestAmerica Westfield Certifications and Approvals: MADEP MA014, RIDOH57, CTDPH 0494, VT DECWSD, NH DES 2539, NELAP FL E87912 TOX, NELAP NJ MA008 TOX, NELAP NY 10843, NY ELAP 10843, North Carolina 647, NELAP PA 68-04386. Field sampling is performed under SOPs WE-FLD-001 and WE-FLD-002.

Table of Contents

CASE NARRATIVE

Client: Roux Associates, Inc.

Project: Everett Terminal MA

Report Number: 360-27623-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
The samples were received on 04/07/2010; the samples arrived in good condition, properly preserved and on ice. The temperatures of the coolers at receipt were 5.8 and 8.8 C.

VOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples 360-27623-1 and 360-27623-3 were analyzed for volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260B. The samples were analyzed on 04/17/2010.

Acetone failed the CCV criteria high.

No other difficulties were encountered during the volatiles analyses.

All other quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples 360-27623-1 and 360-27623-2 were analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 8270C LL. The samples were prepared on 04/12/2010 and analyzed on 04/15/2010.

Di-n-butyl phthalate was detected in method blank MB 360-56946/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged. Refer to the QC report for details.

Phenol-d5 failed the surrogate recovery criteria low for 360-27623-1 and LCSD 360-56946/3-A. Refer to the QC report for details. Per method SOP, re-extraction is only required if two or more surrogates from any one fraction fail or any single surrogate falls below 10%.

4-Nitrophenol and Phenol failed the recovery criteria low for LCS 360-56946/2-A and LCSD 360-56946/3-A. Refer to the QC report for details.

No other difficulties were encountered during the semivolatiles analyses.

All other quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS (PCBS)
Samples 360-27623-1 and 360-27623-2 were analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA Method 608. The samples were prepared on 04/09/2010 and analyzed on 04/12/2010.

No difficulties were encountered during the PCBs analyses.

All quality control parameters were within the acceptance limits.

1,2-DIBROMOETHANE AND 1,2-DIBROMO-3-CHLOROPROPANE BY MICROEXTRACTION AND GAS CHROMATOGRAPHY
Sample 360-27623-1 was analyzed for 1,2-dibromoethane and 1,2-dibromo-3-chloropropane by microextraction and gas chromatography in accordance with EPA SW-846 Method 8011. The sample was prepared and analyzed on 04/19/2010.

No difficulties were encountered during the EDB and DBCP analysis.

All quality control parameters were within the acceptance limits.

TOTAL METALS
Sample 360-27623-1 was analyzed for total metals in accordance with EPA Method 200.7. The sample was prepared on 04/08/2010 and analyzed on 04/09/2010.

No difficulties were encountered during the total metals analysis.

All quality control parameters were within the acceptance limits.

TOTAL MERCURY
Sample 360-27623-1 was analyzed for total mercury in accordance with EPA Method 245.1. The sample was prepared and analyzed on 04/08/2010.

No difficulties were encountered during the mercury analysis.

All quality control parameters were within the acceptance limits.

HEM AND SGT-HEM
Samples 360-27623-1 and 360-27623-2 were analyzed for HEM and SGT-HEM in accordance with EPA Method 1664A. The samples were prepared and analyzed on 04/12/2010.

This analysis was performed at TestAmerica Chicago, 2417 Bond Street, University Park, IL 60484.

Samples 360-27623-1 and 360-27623-2 prep batch 500-83716, analytical batch 500-83717
(analyzed as HEM, since the samples were non-detect for HEM and did not require silica gel treatment)
MB 0.8 mg/L 5.0 mg/L RL
LCS Observed 34.5 mg/L True value 40 mg/L 86% recovery limits 78-114%
LCSD Observed 34.7 mg/L True value 40 mg/L 87% recovery limits 78-114%

HEXAVALENT CHROMIUM
Sample 360-27623-1 was analyzed for hexavalent chromium in accordance with EPA SW-846 Method 7196A. The sample was analyzed on 04/08/2010.

Cr (VI) failed the recovery criteria low for the MS and MSD of sample 360-27623-1 in batch 360-56797. The associated LCS and LCSD recovered within control limits. Refer to the QC report for details.

No other difficulties were encountered during the hexavalent chromium analysis.

All other quality control parameters were within the acceptance limits.

TOTAL CYANIDE
Sample 360-27623-1 was analyzed for total cyanide in accordance with LACHAT 210-00-1-A. The sample was prepared and analyzed on 04/15/2010.

No difficulties were encountered during the total cyanide analysis.

All quality control parameters were within the acceptance limits.

TOTAL PHENOLS
Samples 360-27623-1 and 360-27623-2 were analyzed for total phenols in accordance with LACHAT 210-00-1-A. The samples were prepared and analyzed on 04/14/2010.

No difficulties were encountered during the total phenols analyses.

All quality control parameters were within the acceptance limits.

TOTAL SUSPENDED SOLIDS
Sample 360-27623-1 was analyzed for total suspended solids in accordance with SM 2540D. The sample was analyzed on 04/09/2010.

No difficulties were encountered during the TSS analysis.

All quality control parameters were within the acceptance limits.

CHLORINE RESIDUAL

Sample 360-27623-1 was analyzed for Chlorine Residual in accordance with SM 4500Cl F. The sample was analyzed on 04/08/2010.

No difficulties were encountered during the Res. Chlorine analysis.

All quality control parameters were within the acceptance limits.

PH

Sample 360-27623-1 was analyzed for pH in accordance with SM 4500 H+. The sample was analyzed on 04/08/2010.

No difficulties were encountered during the pH analysis.

All quality control parameters were within the acceptance limits.

DATA REPORTING QUALIFIERS

Client: Roux Associates, Inc. Job Number: 360-27623-1

Lab Section	Qualifier	Description
GC/MS VOA		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
GC/MS Semi VOA		
	B	Compound was found in the blank and sample.
	*	LCS or LCSD exceeds the control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
	X	Surrogate is outside control limits
Metals		
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
General Chemistry		
	HF	Field parameter with a holding time of 15 minutes
	F	MS or MSD exceeds the control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Not all organic compounds are accreditied under NELAC
For methods with multiple compounds all compounds may not meet NELAC criteria, listing should be obtained from the laboratory
The lab carries additional accreditations with several states. This is the laboratories typcial listing but is subject to change based on the laboratories current certification standing.

Question	T / F/ NA	Comment
Radioactivity either was not measured or, if measured, is at or below background	N/A	
The cooler's custody seal, if present, is intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	False	5.8 C / 8.8 C
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Is the Field Sampler's name present on COC?	True	
Sample Preservation Verified	True
