Part II. Self-Assessment

The Town of Plymouth has completed the required self-assessment and has determined that our municipality is in compliance with all permit conditions, except for the following provisions:

- | | |
|----------------------------|--|
| Part 1.B.2 (e) (Vi) | The Town of Plymouth's permit eligibility with regard to the Endangered Species Act is still pending at the time of our NOI submission. Our MS4 discharges will have the potential to impact the existence of specific species protected under the Endangered Species Act. We will investigate more on this issue of concern. |
| Part 1.B.2 (k) | Some discharges have been determined (through DMF Sanitary Survey) to be contributing to exceedance of water quality standards in Plymouth Harbor. These discharges have been made priorities in our NPS Pollution Grant Program. |
| Part 11.B.8 | Have not yet evaluated physical conditions, site design considerations, and BMPs to promote groundwater recharge through the implementation of our stormwater management program. The Engineering Department will be completing such an evaluation and developing recharge practices and guidelines. This information will be incorporated into education materials, our Drain Use Regulations, and standard practice for municipal road and drainage projects. |
