Ms. Alexis Strauss, Director
U.S. Environmental Protection Agency
Region IX, Water Division
75 Hawthorne Street
San Francisco, California 94105

Gentlemen:

Subject: Updated Permit Reapplication for the Honouliuli Wastewater Treatment Plant
NPDES No. HI 0020877

Please find attached, the subject updated Permit Reapplication. The update is based upon the permit reapplication submitted in December 1995, and the update submitted in January 2000.

The current update includes descriptions of the newest plant components and operations. Also, the update reflects issues from current monitoring results, such as the Water Quality Monitoring and the Whole Effluent Toxicity Tests.

We are still in the process of obtaining laboratory analyses of various wastestreams, including the primary treatment effluent. Since we normally analyze the outfall discharge (which has been a combination of primary, secondary and tertiary streams for many years), we do not have current primary effluent-only data. We will submit the updated analysis in the near future.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

If there are any questions, please contact Ross Tanimoto from our Division of Environmental Quality at (808) 692-5371.

Sincerely,

Frank J. Doyle

FRANK J. DOYLE, P.E.
Director

HONOULIULI WASTEWATER TREATMENT PLANT

301 (h) NPDES WAIVER PERMIT REAPPLICATION

VOLUME 2 OF 2

Prepared For

U.S. Environmental Protection Agency

State of Hawaii Department of Health

Prepared by

City and County of Honolulu
Department of Environmental Services

August 30, 2004

TABLE OF CONTENTS

VOLUME 1

CONTENTS (continued)

APPENDIXES

FACILITY NAME AND PERMIT NUMBER:
Honouliuli WWTP Permit #Hi0020877

This permit application form was elctronically generated by P.A.S.S.

Form Approved 1/14/99
OMB Number 2040-0086

Form 2A NPDES

NPDES FORM 2A APPLICATION OVERVIEW

APPLICATION OVERVIEW

Form 2A has been developed in a modular format and consists of a "Basic Application Information" packet and a "Supplemental Application Information" packet. The Basic Application Information packet is divided into two parts. All applicants must complete Parts A and C. Applicants with a design flow greater than or equal to 0.1 mgd must also complete Part B. Some applicants must also complete the Supplemental Application Information packet. The following items explain which parts of Form 2A you must complete.

BASIC APPLICATION INFORMATION:

A. **Basic Application Information for all Applicants.** All applicants must complete questions A.1 through A.8. A treatment works that discharges effluent to surface waters of the United States must also answer questions A.9 through A.12.

B. **Additional Application Information for Applicants with a Design Flow > or = 0.1 mgd.** All treatment works that have design flows greater than or equal to 0.1 million gallons per day must complete questions B.1 through B.6.

C. **Certification.** All applicants must complete Part C (Certification).

SUPPLEMENTAL APPLICATION INFORMATION:

D. **Expanded Effluent Testing Data.** A treamtent works that discharges effluent to surface waters of the United States and meets one or more of the following criteria must complete Part D (Expanded Effluent Testing Data):

1. Has a design flow rate greater than or equal to 1 mgd,
2. Is required to have a pretreatment program (or has one in place), or
3. Is otherwise required by the permitting authority to provide the information.

E. **Toxicity Testing Data.** A treatment works that meets one or more of the following criteria must complete Part E (Toxicity Testing Data):

1. Has a design flow rate greater than or equal to 1 mgd,
2. Is required to have a pretreatment program (or has one in place), or
3. Is otherwise required by the permitting authority to provide the information.

F. **Industrial User Discharges and RCRA/CERCLA Wastes.** A treatment works that accepts process wastewater from any significant industrial users (SIUs) or receives RCRA or CERCLA wastes must complete Part F (Industrial User Discharges and RCRA/CERCLA Wastes). SIUs are defined as:

1. All industrial users subject to Categorical Pretreatment Standards under 40 Code of Federal Regulations (CFR) 403.6 and 40 CFR Chapter I, Subchapter N (see instructions); and
2. Any other industrial user that:
   a. Discharges an average of 25,000 gallons per day or more of process wastewater to the treatment works (with certain exclusions); or
   b. Contributes a process wastestream that makes up 5 percent or more of the average dry weather hydraulic or organic capacity of the treatment plant; or
   c. Is designated as an SIU by the control authority.

G. **Combined Sewer Systems.** A treatment works that has a combined sewer system must complete Part G (Combined Sewer Systems).

ALL APPLICANTS MUST COMPLETE PART C (CERTIFICATION)

BASIC APPLICATION INFORMATION

PART A. BASIC APPLICATION INFORMATION FOR ALL APPLICANTS:

All treatment works must complete questions A.1 through A.8 of this Basic Application Information packet.

A.1 Facility Information.

Facility name	Honouliuli Wastewater Treatment Plant
Mailing Address	1000 Uluohia Street, Suite 308 Kapolei, HI 96707
Contact Person	Frank J. Doyle, P.E.
Title	Director
Telephone Number	(808) 692-5159
Facility Address (not P.O. Box)	91-1501 Geiger Road Ewa Beach, HI 96706

A.2 Applicant Information. If the applicant is different from the above, provide the following:

Applicant name	City and County of Honolulu
Mailing Address	1000 Uluohia Street, Suite 308 Kapolei, HI 96707
Contact Person	Frank J. Doyle, P.E.
Title	Director
Telephone Number	(808) 692-5159

Is the applicant the owner or operator (or both) of the treatment works

X owner X operator

Indicate whether correspondence regarding this permit should be directed to the facility or the applicant

____ facility X applicant

A.3 Existing Environmental Permits. Provide the permit number of any existing environmental permits that have been issued to the treatment works (include state-issued permits).

Permit Type	Permit Number	Permit Type	Permit Number
NPDES	HI0020877 (permit to discharge through an outfall)	NPDES	GPC No. HI R90A409 (permit to discharge industr storm water)
Other	CSP No. 0215-01-C (covered source air permit)		

A.4. Collection System Information. Provide information on municipalities and areas served by the facility. Provide the name and population of each entity and, if known, provide information on the type of collection system (combined vs. separate) and its ownership (municipal, private, etc.).

Name	Population Served	Type of Collection System	Ownership
West Mamala Bay	336,448*	Separate	Municipal

* West Mamala Bay Facilities Plan (December 2001)

Total Population Served 336,448

A.5. Indian Country.

a. Is the treatment works located in Indian Country?

___ Yes _X_ No

b. Does the treatment works discharge to a receiving water that is either in Indian Country or that is upstream from (and eventually flows through) Indian Country?

___ Yes _X_ No

A.6. Flow. Indicate the design flow rate of the treatment plant (i.e., the wastewater flow rate that the plant was built to handle). Also provide the average daily flow rate and maximum daily flow rate for each of the last three years. Each year's data must be based on a 12-month time period with the 12th month of "this year" occurring no more than three months prior to this application submittal.

a. Design flow rate 38.000 mgd

	Two Years Ago	Last Year	This Year	
b. Annual average daily flow rate	26.100	26.800	27.600	mgd
c. Maximum daily flow rate	30.900	32.400	54.300	mgd

A.7. Collection System. Indicate the type(s) of collection system(s) used by the treatment plant. Check all that apply. Also estimate the percent contribution (by miles) of each.

X	Separate sanitary sewer	100 %
	Combined storm and sanitary sewer	%

A.8. Discharges and Other Disposal Methods.

a. Does the treatment works discharge effluent to waters of the U.S.? X Yes ___ No

If yes, list how many of each of the following types of discharge points the treatment works uses:

i.	Discharges of treated effluent	1
ii.	Discharges of untreated or partially treated effluent	0
iii.	Combined sewer overflow points	0
iv.	Constructed emergency overflows (prior to the headworks)	0
v.	Other: Reclamation Facility with discharges on-site (plant processes and recharge trench) and off-site (industrial uses and irrigation).	1

b. Does the treatment works discharge effluent to basins, ponds, or other surface impoundments that do not have outlets for discharge to waters of the U.S.? ___ Yes _X_ No

If yes, provide the following for each surface impoundment:

Location: _____

Annual average daily volume discharged to surface impoundment(s _____ mgd

Is discharge _____ continuous or _____ intermittent

c. Does the treatment works land-apply treated wastewater? ___ Yes _X_ No

If yes, provide the following for each land application site:

Location: _____

Number of acres: _____

Annual average daily volume applied to site: _____ mgd

Is discharge _____ continuous or _____ intermittent

d. Does the treatment works discharge or transport treated or untreated wastewater to another treatment works? X Yes _____ No

If yes, describe the mean(s) by which the wastewater from the treatment works is discharged or transported to the other treatment works (e.g., tank truck, pipe).

Pipeline discharge of effluent to an on-site water reclamation facility

If transport is by a party other than the applicant, provide:

Transporter name: _____

Mailing address: _____

_____

Contact person: _____

Title: _____

Telephone number: _____

_____

Name: Ewa Water Reclamation Facility

Mailing address: 630 South Beretania Street Honolulu, HI 96813

Contact person: Clifford Jamile

Title: Manager and Chief Engineer

Telephone number: (808) 748-5000

If known, provide the NPDES permit number of the treatment works that receives this discharge. _____

For each treatment works that receives this discharge, provide the following:
Provide the average daily flow rate from the treatment works into the receiving facility. 13.00 mgd

e. Does the treatment works discharge or dispose of its wastewater in a manner not included in A.8.a through A.8.d above (e.g., underground percolation, well injection) X Yes _____ No

If yes, provide the following <u>for each disposal method:</u>

Description of method (including location and size of site(s) if applicable):

A non-potable aquifer recharge trench, located on-site, is available as a R1 reclaimed water disposal site.

Annual daily volume disposed of by this method: Currently, no effluent flow has been discharged into the recharge trench.

Is disposal through this method _____ continuous or X intermittent

A request for discharge of a lower quality effluent has been submitted to the Hawaii Department of Health. Included in the request, are research documents from an on-site groundwater recharge study.

WASTEWATER DISCHARGES:
If you answered "yes" to quetion A.8.a, complete questions A.9 through A.12 **once for each outfall** (including bypass points) through which effluent is discharged. Do not include information on combined sewer overflows in this section. **If you answered "no" to question A.8.a.,** go to Part B, "Additional Application Information for Applicants with a Design Flow Greater than or Equal to 0.1 mgd."

A.9 Description of Outfall.

a. Outfall number SERIAL NO. 001

b. Location Ewa Beach (City of town, if applicable) 96706 (Zip Code)

Honolulu (County) HI (State)

21-17-00 N (Latitude) 158-01-50 W (Longitude)

c. Distance from shore (if applicable) 9,000 ft.

d. Depth below surface (if applicable) 200 ft.

e. Average daily flow rate 21.60 mgd

f. Does this outfall have either an intermittent or a periodic discharge? ____ yes X no (go to A.9.g)

If yes, provide the following information:

Number of times per year discharge occurs: ____

Average duration of each discharge: ____

Average flow per discharge: ____ mgd

Months in which discharge occurs:

g. Is outfall equipped with a diffuser? X yes ____ no

A.10 Description of Receiving Waters.

a. Name of receiving water West Mamala Bay

b. Name of watershed (if known) ____

United States Soil Conservation Service 14-digit watershed code (if known): ____

c. Name of State Management/River Basin (if known): ____

United States Geological Survey 8-digit hydrologic cataloging unit code (if known): ____

d. Critical low flow of receiving stream (if applicable):

acute ____ cfs chronic ____ cfs

e. Total hardness of receiving stream at critical low flow (if applicable): ____ mg/l of $CaCO_3$

A.11 Description of Treatment.

a. What levels of treatment are provided? Check all that apply.

X	Primary		Secondary	The City may intermittently discharge excess reclaimed effluent to the outfall. The discharge may include secondary effluent, R1 reclaimed water and/or brine.
	Advanced	X	Other. Describe:	

b. Indicated the following removal rates (as applicable):

Design BOD_5 removal or Design $CBOD_5$ removal	30.0 %
Design SS removal	30.0 %
Design P removal	%
Design N removal	%
Other	%

c. What type of disinfection is used for the effluent from this outfall? If disinfection varies by season, please describe.

Discharged effluent is not disinfected.

If disinfection is by chlorination, is dechlorination used for this outfall? ____ Yes X No

d. Does the treatment plan have post aeration? ____ Yes X No

A.12. Effluent Testing Information. All Applicants that discharge to waters of the US must provide effluent testing dta for the following parameters Provide the indicated effluent testing required by the permitting authority for each outfall through which effluent is discharged. Do not include information on combined sewer overflows in this section. All information reported must be based on data collected through analysis conducted using 40 CFR Part 136 methods. In addition, this data must comply with QA/QC requirements of 40 CFR Part 136 and other appropriate QA/QC requirements for standard methods for analytes not addressed by 40 CFR Part 136. At a minimum, effluent testing data must be based on at least three samples and must be no more than four and one-half years apart.

Outfall number: SERIAL NO. 001

PARAMETER	MAXIMUM DAILY VALUE		AVERAGE DAILY VALUE		
	Value	Units	Value	Units	Number of Samples
pH (Minimum)	6.89	s.u.			
pH (Maximum)	7.40	s.u.			
Flow Rate	42.60	MGD	21.60	MGD	121
Temperature (Winter)	28.5	°C	27.1	°C	62
Temperature (Summer)	30.5	°C	29.3	°C	84

*For pH please report a minimum and a maximum daily value

POLLUTANT		MAXIMUM DAILY DISCHARGE		AVERAGE DAILY DISCHARGE			ANALYTICAL METHOD	ML/MDL
		Conc.	Units	Conc.	Units	Number of Samples		
CONVENTIONAL AND NONCONVENTIONAL COMPOUNDS.								
BIOCHEMICAL OXYGEN DEMAND (Report one)	BOD-5	168.00	mg/l	129.00	mg/l	95	EPA 405.1	ML: 3 mg/l
	CBOD-5	0.00		0.00		0		
FECAL COLIFORM		13.00	M/100ml	5.40	M/100ml	121	SM 9222D	ML: 1 CFU/100 ml
TOTAL SUSPENDED SOLIDS (TSS)		81.00	mg/l	42.00	mg/l	96	EPA 160.2	ML: 1 mg/l

END OF PART A.
REFER TO THE APPLICATION OVERVIEW TO DETERMINE WHICH OTHER PARTS OF FORM 2A YOU MUST COMPLETE

BASIC APPLICATION INFORMATION

PART B. ADDITIONAL APPLICATION INFORMATION FOR APPLICANTS WITH A DESIGN FLOW GREATER THAN OR EQUAL TO 0.1 MGD (100,000 gallons per day).

All applicants with a design flow rate greater than or equal to 0.1 mgd must answer questions B.1 through B.6. All others go to Part C (Certification).

B.1. **Inflow and Infiltration.** Estimate the average number of gallons per day that flow into the treatment works from inflow and/or infiltration.

9,350,000 gpd

Briefly explain any steps underway or planned to minimize inflow and infiltration.

"Sewer Rehabilitation and Infiltration & Inflow Minimization Study" (December 1999) identifies collection/treatment system deficiencies. Selected West Mamala Bay projects are included in the City Capital Improvement Program.

B.2. **Topographic Map.** Attach to this application a topographic map of the area extending at least one mile beyond facility property boundaries. This map must show the outline of the facility and the following information. (You may submit more than one map if one map does not show the entire area.)

a. The area surrounding the treatment plan, including all unit processes.

b. The major pipes or other structures through which wastewater enters the treatment works and the pipes or other structures through which treated wastewater is discharged from the treatment plant. Include outfalls from bypass piping, if applicable.

c. Each well where wastewater from the treatment plant is injected underground.

d. Wells, springs, other surface water bodies, and drinking water wells that are: 1) within 1/4 mile of the property boundaries of the treatment works, and 2) listed in public record or otherwise known to the applicant.

e. Any areas where the sewage sludge produced by the treatment works is stored, treated, or disposed.

f. If the treatment works receives waste that is classified as hazardous under the Resource Conservation and Recovery Act (RCRA) by truck, rail or special pipe, show on the map where that hazardous waste enters the treatment works and where it is treated, stored and/or disposed.

B.3. **Process Flow Diagram or Schematic.** Provide a diagram showing the processes of the treatment plant, including all bypass piping and all backup power sources or redundancy in the system. Also provide a water balance showing all treatment units, including disinfection (e.g., chlorination and dechlorination). The water balance must show daily average flow rates at influent and discharge points and approximate daily flow rates between treatment units. Include a brief narrative description of the diagram.

B.4. **Operation/Maintenance performed by Contractor(s).**

Are any operational or maintenance aspects (related to wastewater treatment and effluent quality) of the treatment works the responsibility of a contractor. ____ Yes X No

If yes, list the name, address, telephone number, and status of each contractor and describe the contractor's responsibilities (attach additional pages if necessary.

Name: _____

Mailing Address: _____

_____

Telephone Number: _____

Responsibilites of Contractor: _____

B.5. Scheduled Improvements and Schedules of Implementation. Provide information on any uncompleted implementation schedule or uncompleted plans for improvements that will affect the wastewater treatment, effluent quality, or design capacity of the treatment works. If th treatment works has several different implementaiton schedules or is planning several improvements, submit separate response to question B. each. (If none, go to question B.6.)

a. List the outfall number (assigned in question A.9) for each outfall that is covered by this implementation schedule.

SERIAL NO. 001

b. Indicate whether the planned improvements or implementation schedule are required by local, State, or Federal agencies.

____ Yes __X__ No

c. If the answer to B.5.b is "Yes," briefly describe, including new maximum daily inflow rate (if applicable).

d. Provide dates imposed by any compliance schedule or any actual dates of completion for the implementation steps listed below, as applicable. For improvements planned independently of local, State, or Federal agencies, indicate planned or actual completion dates, as applicable. Indicate dates as accurately as possible.

Implementation Stage	Schedule MM / DD / YYYY	Actual Completion MM / DD / YYYY
- Begin construction	1/1/2007	
- End construction	1/1/2009	
- Begin discharge	1/1/2009	
- Attain operational level	1/1/2010	

e. Have appropriate permits/clearance concerning other Federa/State requirements been obtained?. ____ Yes __X__

Describe briefly:

Staff is developing a Scope of Work for the New Solids Handling Facilities (Anaerobic Digesters). Consultant to prepare project contract documents for bid. Consultant/Contractor to obtain permits/clearances during appropriate project phases.

A Design/Build concept for project implementation is being considered by the Administration.

The proposed anaerobic sludge digesters will discharge supernatant into the return flow, possibly affecting the plant influent quality. However, the proposed project return flow is expected to be similar to current solids stabilization process flows. The project schedule has been estimated from available preliminary data.

B.6. EFFLUENT TESTING DATA (GREATER THAN 0.1 MGD ONLY).

Applicants that discharge to waters of the US must provide effluent testing data for the following parameters. Provide the indicated effluent testing required by the permitting authority for each outfall through which effluent is discharged. Do not include information on combined sewer overflows in this section. All information reported must be based on data collected through analysis conducted using 40 CFR Part 136 methods. In addition, this data must comply with QA/QC requirements of 40 CFR Part 136 and other appropriate QA/QC requirements for standard methods for analytes not addressed by 40 CFR Part 136. At a minimum, effluent testing data must be based on at least three pollutant scans and must be no more than four and one-half years old.

Outfall Number SERIAL NO. 001

Total dissolved Solids (TDS)	0.00	N/A	0.00	N/A	0		

Note: N/A is Not Available. Data is not required by permit.

END OF PART B.
REFER TO THE APPLICATION OVERVIEW TO DETERMINE WHICH OTHER PARTS OF FORM 2A YOU MUST COMPLETE

BASIC APPLICATION INFORMATION

PART C. CERTIFICATION

All applicants must complete the Certification Section. Refer to instructions to determine who is an officer for the purposes of this certification. All applicants must complete all applicable sections of Form 2A, as explained in the Application Overview. Indicate below which parts of Form 2A you have completed and are submitting. By signing this certification statement, applicants confirm that they have reviewed Form 2A and have completed all sections that apply to the facility for which this application is submitted.

Indicate which parts of Form 2A you have completed and are submitting:

X Basic Application Information Packet

Supplemental Application Information packet:

X Part D (Expanded Effluent Testing Data)

X Part E (Toxicity Testing: Biomonitoring Data)

X Part F (Industrial User Discharges and RCRA/CERCLA Wastes)

_____ Part G (Combined Sewer Systems)

ALL APPLICANTS MUST COMPLETE THE FOLLOWING CERTIFICATION.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Name and official title: Frank J. Doyle, P.E., Director

Signature: Frank J. Doyle

Telephone number: (808) 692-5159

Date signed: _____

Upon request of the permitting authority you must submit any other information necessary to assess wastewater treatment practices at the treatment works or identify appropriate permitting requirements.

SEND COMPLETE FORMS TO:

SUPPLEMENTAL APPLICATION INFORMATION

PART D. EXPANDED EFFLUENT TESTING DATA

Refer to the directions on the cover page to determine whether this section applies to the treatment works.

Effluent Testing: 1.0 mgd and Pretreatment Treatment Works. If the has a design flow greater than or equal to 1.0 mgd or it has (or is required to have) a pretreatment program, or is otherwise required by the permitting authority to provide the data, then provide effluent testing data for the following pollutants. Provide the indicated effluent testing information and any other information required by the permitting authority for each outfall through which effluent is discharged. Do not include information on combined sewer overflows in this section. All information reported must be based on data collected through analyses conducted using 40 CFR Part 136 methods. In addition, these data must comply with QA/QC requirements of 40 CFR Part 136 and other appropriate QA/QC requirements for standard methods for analytes not addressed by 40 CFR Part 136. Indicate in the blank rows provided below any data you may have on pollutants not specifically listed in this form. At a minimum, effluent testing data must be based on at least three pollutant scans and must be no more than four and one-half years old.

(Complete once for each outfall discharging effluent to waters of the United States.)

Outfall Number SERIAL NO. 001 Effluent sampled on 12/2/2003; Effluent flow on 12/2/2003: 24.354 MGD.

END OF PART D.
REFER TO THE APPLICATION OVERVIEW TO DETERMINE WHICH OTHER PARTS OF FORM YOU MUST COMPLETE

Honouliuli Regional Wastewater Treatment Plant - Permit NO. HI 0020877

PART E. TOXICITY TESTING DATA

Individual test data : *Tripneustes gratilla* Fertilization Test

HONOULIULI WASTEWATER TREATMENT FACILITY
NPDES PERMIT NO. HI0020877

FORM 2A
SUPPLEMENTAL APPLICATION INFORMATION:
PART E. TOXICITY TESTING DATA.

E.1. REQUIRED TESTS.
See following attached sheets.

E.2. INDIVIDUAL TEST DATA.
See following attached sheets.

E.3. TOXICITY REDUCTION EVALUATION.
See following attached sheets.

E.4. SUMMARY OF SUBMITTED BIOMONITORING TEST INFORMATION.
As required by the Honouliuli WWTP NPDES permit, biomonitoring testing information is submitted to the U.S. Environmental Protection Agency and Hawaii Department of Health as a part of the monthly Discharge Monitoring Report (28th of each following month) and the Annual Assessment Report (30th of each June). Whole Effluent Test (WET) and Toxicity Identification Evaluation (TIE) submittals, for the past four and one-half years, are summarized by each year as follows:

1 month
1/12

36 = 14

2004: May 7, 2004 WET (*Tripneustes gratilla*) testing indicated the presence of toxicity exceeding the NPDES permit compliance value. A series of following weekly tests did not show any further toxicity that was persistent in the effluent.

July
Jan
7 months
7/12

2003: September 6, 2002 WET (*Tripneustes gratilla*) testing indicated the presence of toxicity exceeding the NPDES permit compliance value. Intermittent toxicity was observed in the following weekly samples. TIE manipulations indicated that the toxicants were associated with particulate material and were partly organic in nature. The weekly testing on effluent sampled from July 3, 2003 through August 3, 2003 showed no continuing toxicity. Monthly monitoring was subsequently resumed.

4 months
+ 2 months
6 months

2002: March 2, 2002 WET (*Tripneustes gratilla*) testing indicated the presence of toxicity exceeding NPDES permit compliance value. The following accelerated testing showed intermittent toxic events. Toxicity was not detected in the weekly samples collected from May 9, 2002 to June 13, 2002. Subsequently, monthly WET monitoring was resumed.

check for near misses

2001 and 2000: During these years, WET (*Tripneustes gratilla* and *Ceriodaphnia dubia*) testings were in compliance with the permit value.

1999 4 near misses : 158.7 or 159 → 159.7 is limit
2001 2 near misses

FACILITY NAME AND PERMIT NUMBER:
Honouliuli Regional Wastewater Treatment Plant - Permit No. HI 0020877

Form Approved 1/14/99
OMB Number 2040-0086

SUPPLEMENTAL APPLICATION INFORMATION

PART E. TOXICITY TESTING DATA

POTWs meeting one or more of the following criteria must provide the results of whole effluent toxicity tests for acute or chronic toxicity for each of the facility's discharge points: 1) POTWs with a design flow rate greater than or equal to 1.0 mgd; 2) POTWs with a pretreatment program (or those that are required to have one under 40 CFR Part 403); or 3) POTWs required by the permitting authority to submit data for these parameters.

- At a minimum, these results must include quarterly testing for a 12-month period within the past 1 year using multiple species (minimum of two species), or the results from four tests performed at least annually in the four and one-half years prior to the application, provided the results show no appreciable toxicity, and testing for acute and/or chronic toxicity, depending on the range of receiving water dilution. Do not include information on combined sewer overflows in this section. All information reported must be based on data collected through analysis conducted using 40 CFR Part 136 methods. In addition, this data must comply with QA/QC requirements of 40 CFR Part 136 and other appropriate
- QA/QC requirements for standard methods for analytes not addressed by 40 CFR Part 136.
  In addition, submit the results of any other whole effluent toxicity tests from the past four and one-half years. If a whole effluent toxicity test conducted during the past four and one-half years revealed toxicity, provide any information on the cause of the toxicity or any results of a toxicity reduction evaluation, if one was conducted.
- If you have already submitted any of the information requested in Part E, you need not submit it again. Rather, provide the information requested in question E.4 for previously submitted information. If EPA methods were not used, report the reasons for using alternate methods.
  If test summaries are available that contain all of the information requested below, they may be submitted in place of Part E.

If no biomonitoring data is required, do not complete Part E. Refer to the Application Overview for directions on which other sections of the form to complete.

E.1. Required Tests.

Indicate the number of whole effluent toxicity tests conducted in the past four and one-half years.

105 chronic _____ acute

E.2. Individual Test Data. Complete the following chart for each whole effluent toxicity test conducted in the last four and one-half years. Allow one column per test (where each species constitutes a test). Copy this page if more than three tests are being reported.

Test number: HO012300 Test number: HO021200 Test number: HO031200

✓ Yes ____ No If yes, describe:
Results from WET testing on 09/06/02 showed presence of toxicity in the effluent that exceeded NPDES permit compliance value. The first three of the series of accelerated tests showed toxicity to *T. gratilla* gametes. TIE studies indicated that toxicity was organic in nature, associated with particulates, not associated with oxidants and cations like Pb or Cu. and not due to ammonia.

E.3. Toxicity Reduction Evaluation . Is the treatment works involved in a Toxicity Reduction Evaluation?

✓ Yes ____ No If yes, describe:

Results from WET testing on 09/06/02 showed presence of toxicity in the effluent that exceeded NPDES permit compliance value. Intermittent toxicity was observed in the subsequent weekly samples. TIE manipulations indicated that toxicants were associated with particulate material and partly organic in nature.

E.3. Toxicity Reduction Evaluation. Is the treatment works involved in a Toxicity Reduction Evaluation?

✓ Yes ___ No If yes, describe:

Results from WET testing on 09/06/02 showed presence of toxicity in the effluent that exceeded NPDES permit compliance value. Intermittent toxicity was observed in the subsequent weekly samples. TIE manipulations indicated that toxicants were associated with particulate material and partly organic in nature.

E.3. Toxicity Reduction Evaluation . Is the treatment works involved in a Toxicity Reduction Evaluation?

✔ Yes ____ No If yes, describe:

Results from WET testing on 05/07/04 indicated presence of toxicity that exceeded NPDES permit compliance value. A series of accelerated tests showed the absence of persistent toxicity in the effluent.

E.4. Summary of Submitted Biomonitoring Test Information If you have submitted biomonitoring test information, or information regarding the cause of toxicity, within the past four and one-half years, provide the dates the information was submitted to the permitting authority and a summary of the results.

Date submitted: _____ (MM/DD/YYYY)

Summary of results: (see instructions)

_____

_____

_____

END OF PART E.

REFER TO THE APPLICATION OVERVIEW TO DETERMINE WHICH OTHER PARTS OF FORM 2A YOU MUST COMPLETE.

Honouliuli Regional Wastewater Treatment Plant
Permit No. HI 0020877

PART E. TOXICITY TESTING DATA

Individual test data : Method 1002.0 *Ceriodaphnia dubia*

PART E. TOXICITY TESTING DATA

Individual test data : Method 1002.0 *Ceriodaphnia dubia*

FACILITY NAME AND PERMIT NUMBER:
Honouliuli Regional Wastewater Treatment Plant - Permit No. HI 0020877

Form Approved 1/14/99
OMB Number 2040-0086

SUPPLEMENTAL APPLICATION INFORMATION

PART E. TOXICITY TESTING DATA

POTWs meeting one or more of the following criteria must provide the results of whole effluent toxicity tests for acute or chronic toxicity for each of the facility's discharge points: 1) POTWs with a design flow rate greater than or equal to 1.0 mgd; 2) POTWs with a pretreatment program (or those that are required to have one under 40 CFR Part 403); or 3) POTWs required by the permitting authority to submit data for these parameters.

- At a minimum, these results must include quarterly testing for a 12-month period within the past 1 year using multiple species (minimum of two species), or the results from four tests performed at least annually in the four and one-half years prior to the application, provided the results show no appreciable toxicity, and testing for acute and/or chronic toxicity, depending on the range of receiving water dilution. Do not include information on combined sewer overflows in this section. All information reported must be based on data collected through analysis conducted using 40 CFR Part 136 methods. In addition, this data must comply with QA/QC requirements of 40 CFR Part 136 and other appropriate
- QA/QC requirements for standard methods for analytes not addressed by 40 CFR Part 136.
  In addition, submit the results of any other whole effluent toxicity tests from the past four and one-half years. If a whole effluent toxicity test conducted during the past four and one-half years revealed toxicity, provide any information on the cause of the toxicity or any results of a toxicity reduction evaluation, if one was conducted.
- If you have already submitted any of the information requested in Part E, you need not submit it again. Rather, provide the information requested in question E.4 for previously submitted information. If EPA methods were not used, report the reasons for using alternate methods. If test summaries are available that contain all of the information requested below, they may be submitted in place of Part E.

If no biomonitoring data is required, do not complete Part E. Refer to the Application Overview for directions on which other sections of the form to complete.

E.1. Required Tests.

Indicate the number of whole effluent toxicity tests conducted in the past four and one-half years.

54 chronic _____ acute

E.2. Individual Test Data. Complete the following chart for each whole effluent toxicity test conducted in the last four and one-half years. Allow one column per test (where each species constitutes a test). Copy this page if more than three tests are being reported.

Manual title	Short-Term Methods For Estimating The Chronic Toxicity of Effluents and Receiving Water to Freshwater Organisms	Short-Term Methods For Estimating The Chronic Toxicity of Effluents and Receiving Water to Freshwater Organisms	Short-Term Methods For Estimating The Chronic Toxicity of Effluents and Receiving Water to Freshwater Organisms
Edition number and year of publication	Third Edition, July 1994	Third Edition, July 1994	Third Edition, July 1994
Page number(s)	144 - 189	144 - 189	144 - 189
c. Give the sample collection method(s) used. For multiple grab samples, indicate the number of grab samples used.			
24-Hour composite	Automatic Flow Composite	Automatic Flow Composite	Automatic Flow Composite
Grab			
d. Indicate where the sample was taken in relation to disinfection. (Check all that apply for each)			
Before disinfection			
After disinfection			
After dechlorination			
e. Describe the point in the treatment process at which the sample was collected.			
Sample was collected:	Downstream from all plant additions	Downstream from all plant additions	Downstream from all plant additions
f. For each test, include whether the test was intended to assess chronic toxicity, acute toxicity, or both.			
Chronic toxicity	✓	✓	✓
Acute toxicity			
g. Provide the type of test performed.			
Static			
Static-renewal	✓	✓	✓
Flow-through			
h. Source of dilution water. If laboratory water, specify type; if receiving water, specify source.			
Laboratory water	Synthetic Moderate Hard Water	Synthetic Moderate Hard Water	Synthetic Moderate Hard Water
Receiving water			
i. Type of dilution water. If salt water, specify "natural" or type of artificial sea salts or brine used.			
Fresh water	✓	✓	✓
Salt water			
j. Give the percentage effluent used for all concentrations in the test series.			
	0.00 0.16	0.00 0.16	0.00 0.16
	0.32 0.63	0.32 0.63	0.32 0.63
	1.26 2.52	1.26 2.52	1.26 2.52

Is reference toxicant data available?	Yes	Yes	Yes
Was reference toxicant test within acceptable bounds?	Yes	Yes	Yes
What date was reference toxicant test run (MM/DD/YYYY)?	04/02/04	05/03/04	06/02/04
Other (describe)			

E.3. Toxicity Reduction Evaluation. Is the treatment works involved in a Toxicity Reduction Evaluation?

___Yes ✓ No If yes, describe: _____

E.4. Summary of Submitted Biomonitoring Test Information. If you have submitted biomonitoring test information, or information regarding the cause of toxicity, within the past four and one-half years, provide the dates the information was submitted to the permitting authority and a summary of the results.

Date submitted: _____ (MM/DD/YYYY)

Summary of results: (see instructions)

In the past four and one-half years, no toxicity was detected in the effluent samples using the 7-day *Ceriodaphnia dubia* Survival and Reproduction method.

END OF PART E.

REFER TO THE APPLICATION OVERVIEW TO DETERMINE WHICH OTHER PARTS OF FORM 2A YOU MUST COMPLETE.

SUPPLEMENTAL APPLICATION INFORMATION

PART F. INDUSTRIAL USER DISCHARGES AND RCRA/CERCLA WASTES

All treatment works receiving discharges from significant industrial users or which receive RCRA, CERCLA, or other remedial wastes must complete Part F.

GENERAL INFORMATION:

F.1. **Pretreatment Program.** Does the treatment works have, or is it subject to, an approved pretreatment program?

__X__ Yes _____ No

F.2. **Significant Industrial Users (SIUs) and Categorical Industrial Users (CIUs).** Provide the number of each of the following types of industrial users that discharge to the treatment works.

a. Number of non-categorical SIUs. 3

b. Number of CIUs. 0

SIGNIFICANT INDUSTRIAL USER INFORMATION:

Supply the following information for each SIU. If more than one SIU discharges to the treatment woks, copy question F.3 through F.8 and provide the information requested for each SIU.

F.3. **Significant Industrial User Information.** Provide the name and address of each SIU discharging to the treatment works. Submit additional pages as necessary.

Name: Frito-Lay of Hawaii, Inc.

Mailing Address: 99-1260 Iwaena Street Aiea, HI 96701

F.4. **Industrial Processes.** Describe all the industrial processes that affect or contribute to the SIU's discharge.

Processes snack foods for commercial sales.

F.5. **Principal Product(s) and Raw Material(s).** Describe all of the principal processes and raw materials that affect or contribute to the SIU's discharge.

Principal product(s) Snack foods.

Raw material(s) Grain meal, flour, and oil.

F.6. **Flow Rate.**

a. Process wastewater flow rate. Indicate the average daily volume of process wastewater discharged into the collection system in gallons per day (gpd) and whether the discharge is continuous or intermittent.

58,000.00 gpd (X continuous or ___ intermittent)

b. Non-process wastewater flow rate. Indicate the average daily volume of non-process wastewater flow discharged into the collection system in gallons per day (gpd) and whether the discharge is continuous or intermittent.

9,000.00 gpd (X continuous or ___ intermittent)

F.7. **Pretreatment Standards.** Indicate whether the SIU is subject to the following:

a. Local limits __X__ Yes _____ No

b. Categorical pretreatment standards _____ Yes X No

If subject to categorical pretreatment standards, which category and subcategory?

F.8. **Problems at the Treatment Works Attributed to Waste Discharged by the SIU.** has the SIU caused or contributed to any problems (e.g., upsets, interference) at the treatment works in the past three years?

_____ Yes X No

If yes, describe each episode.

F.3. Significant Industrial User Information. Provide the name and address of each SIU discharging to the treatment works. Submit additional pages as necessary.

Name: Honolulu Advertiser

Mailing Address: 4545 Kapolei Parkway Kapolei, HI 96707

F.4. Industrial Processes. Describe all the industrial processes that affect or contribute to the SIU's discharge.

Prints daily newspaper. New facility begins production in August 2004. Flows are estimated by discharger.

F.5. Principal Product(s) and Raw Material(s). Describe all of the principal processes and raw materials that affect or contribute to the SIU's discharge.

Principal product(s) Daily newspaper.

Raw material(s) Paper, printing ink and cleaners.

F.6. Flow Rate.

a. Process wastewater flow rate. Indicate the average daily volume of process wastewater discharged into the collection system in gallons per day (gpd) and whether the discharge is continuous or intermittent.

15,300.00 gpd (X continuous or ___ intermittent)

Estimated Flows.

b. Non-process wastewater flow rate. Indicate the average daily volume of non-process wastewater flow discharged into the collection system in gallons per day (gpd) and whether the discharge is continuous or intermittent.

1,700.00 gpd (X continuous or ___ intermittent)

Estimated Flows.

F.7. Pretreatment Standards. Indicate whether the SIU is subject to the following:

a. Local limits	X	Yes		No
b. Categorical pretreatment standards		Yes	X	No

If subject to categorical pretreatment standards, which category and subcategory?

F.8. Problems at the Treatment Works Attributed to Waste Discharged by the SIU. has the SIU caused or contributed to any problems (e.g., upsets, interference) at the treatment works in the past three years?

	Yes	X	No

If yes, describe each episode.

F.3. Significant Industrial User Information. Provide the name and address of each SIU discharging to the treatment works. Submit additional pages as necessary.

Name: Pepsi Cola Company

Mailing Address: 99-1325 Halawa Valley Street Halawa, HI 96701

F.4. Industrial Processes. Describe all the industrial processes that affect or contribute to the SIU's discharge.

Processes soft drinks for commercial sales.

F.5. Principal Product(s) and Raw Material(s). Describe all of the principal processes and raw materials that affect or contribute to the SIU's discharge.

Principal product(s) Soft drinks.

Raw material(s) Syrup concentrate and carbonated water.

F.6. Flow Rate.

a. Process wastewater flow rate. Indicate the average daily volume of process wastewater discharged into the collection system in gallons per day (gpd) and whether the discharge is continuous or intermittent.

15,000.00 gpd (X continuous or ___ intermittent)

b. Non-process wastewater flow rate. Indicate the average daily volume of non-process wastewater flow discharged into the collection system in gallons per day (gpd) and whether the discharge is continuous or intermittent.

4,000.00 gpd (X continuous or ___ intermittent)

F.7. Pretreatment Standards. Indicate whether the SIU is subject to the following:

a. Local limits X Yes ___ No

b. Categorical pretreatment standards ___ Yes X No

If subject to categorical pretreatment standards, which category and subcategory?

F.8. Problems at the Treatment Works Attributed to Waste Discharged by the SIU. has the SIU caused or contributed to any problems (e.g., upsets, interference) at the treatment works in the past three years?

___ Yes X No

If yes, describe each episode.

RCRA HAZARDOUS WASTE RECEIVED BY TRUCK, RAIL, OR DEDICATED PIPELINE:

F.9. **RCRA Waste.** Does the treatment works receive or has it in the past three years received RCRA hazardous waste by truck, rail, or dedicated pipe?

_____ Yes __X__ No (go to F.12.)

F.10. **Waste Transport.** Method by which RCRA waste is received (check all that apply):

_____ Truck _____ Rail _____ Dedicated Pipe

F.11. **Waste Description.** Give EPA hazardous waste number and amount (volume or mass, specify units).

EPA Hazardous Waste Number	Amount	Units

CERCLA (SUPERFUND) WASTEWATER, RCRA REMEDIATION/CORRECTIVE ACTION WASTEWATER, AND OTHER REMEDIAL ACTIVITY WASTEWATER:

F.12. **Remediation Waste.** Does the treatment works currently (or has it been notified that it will) receive waste from remedial activities?

_____ Yes (complete F.13 through F.15. X_____ No

Provide a list of sites and the requested information (F.13. - F.15.) for each current and future site.

END OF PART F.
REFER TO THE APPLICATION OVERVIEW TO DETERMINE WHICH OTHER PARTS OF FORM 2A YOU MUST COMPLETE

FACILITY NAME AND PERMIT NUMBER:

Honouliuli Wastewater Treatment Plant HI0020877

Form Approved 1/14/99
OMB Number 2040-0086

PART 2: PERMIT APPLICATION INFORMATION

Complete this part if you have an effective NPDES permit or have been directed by the permitting authority to submit a full permit application at this time. In other words, complete this part if your facility has, or is applying for, an NPDES permit.

For purposes of this form, the term "you" refers to the applicant. "This facility" and "your facility" refer to the facility for which application information is submitted.

APPLICATION OVERVIEW - SEWAGE SLUDGE USE OR DISPOSAL INFORMATION

Part 2 is divided into five sections (A-E). Section A pertains to all applicants. The applicability of Sections B, C, D, and E depends on your facility's sewage sludge use or disposal practices. The information provided on this page indicates which sections of Part 2 to fill out.

1. SECTION A: GENERAL INFORMATION

Section A must be completed by all

2. SECTION B: GENERATION OF SEWAGE SLUDGE OR PREPARATION OF A MATERIAL DERIVED FROM SEWAGE SLUDGE

Section B must be completed by applicants who either:

1) Generate sewage sludge, or
2) Derive a material from sewage sludge

3. SECTION C: LAND APPLICATION OF BULK SEWAGE SLUDGE

Section C must be completed by applicants who either:

1) Apply sewage to the land, or
2) Generate sewage sludge which is applied to the land by others

NOTE: Applicants who meet either or both of the two above criteria are exempted from this requirement if all sewage sludge from their facility falls into one of the following three categories:

1) The sewage sludge from this facility meets the ceiling and pollutant concentrations, Class A pathogen reduction requirements, and one of vector attraction reduction options 1-8, as identified in the instructions, or
2) The sewage sludge from this facility is placed in a bag or other container for sale or give-away for application to the land, or
3) The sewage sludge from this facility is sent to another facility for treatment or blending.

4. SECTION D: SURFACE DISPOSAL

Section D must be completed by applicants who own or operate a surface disposal site.

5. SECTION E: INCINERATION

Section E must be completed by applicants who own or operate a sewage sludge incinerator.

A. GENERAL INFORMATION

All applicants must complete this section.

A.1. Facility Information

a. Facility Name: Honouliuli Wastewater Treatment Plant

b. Mailing Address: 1000 Uluohia Street, Suite 308
Kapolei, HI 96707

c. Contact Person: Frank J. Doyle, P.E.
Title: Director
Telephone Number: (808) 692-5159

d. Facility Address (not PO Box): 91-1501 Geiger Road
Ewa Beach, HI 96706

e. Is this facility a Class I sludge management facility? ____ Yes X No

f. Facility design flow rate: 38 mgd

g. Total population served: 336,448

e. Indicate the type of facility

X	Publicly owned treatment works (POTW)	____	Privately owned treatment works
____	Federally owned treatment works	____	Blending or treatment operation
____	Surface disposal site	____	Sewage sludge incinerator
____	Other (describe)		

A.2. Applicant Information If the applicant is different from above, provide the following:

a. Applicant Name: City and County of Honolulu

b. Mailing Address: 1000 Uluohia Street, Suite 308
Kapolei, HI 96707

c. Contact Person: Frank J. Doyle, P.E.
Title: Director
Telephone Number: (808) 692-5159

d. Is the applicant the owner and operator (or both) of this facility?

X Owner X Operator

e. Should correspondence regarding this permit be directed to the facility or the applicant?

____ Facility X Applicant

A.3. Permit Information

a. Facility's NPDES permit number (if applicable): HI0020877

b. List, on this form or an attachment, all other Federal, State, and local permits or construction approvals received or applied for that regulate this facility's sewage sludge management practices:

Permit Number	Type of Permit

A.4. Indian Country. Does any generation, treatment storage, application to the land, or disposal of sewage sludge from this facility occur in Indian Country?

_____ Yes __X__ No

If yes, describe:

A.5. Topographic Map. Provide a topographic map or maps (or other appropriate map(s) if a topographic map is unavailable) that show the following information. Map(s) should include the area one mile beyond all property boundaries of the facility: (Map and Drawings are attached.)

a. Location of all sewage sludge management facilities, including locations where sewage sludge is stored, treated, or disposed.

b. Location of all wells, springs, and other surface water bodies, listed in public records or otherwise known to the applicant within 1/4 mile of the facility property boundaries.

A.6. Line Drawing. Provide a line drawing and/or a narrative description that identifies all sewage sludge processes that will be employed during the term of the permit, including all processes used for collecting, dewatering, storing, or treating sewage sludge, the destination(s) of all liquids and solids leaving each unit, and all methods used for pathogen reduction and vector attraction reduction.

A.7. Contractor Information. Are any operational or maintenance aspects of this facility related to sewage sludge generation, treatment, use or disposal the responsibility of a contractor?

_____ Yes __X__ No

A.8. Pollution Concentrations: Using the table below or a separate attachment, provide sewage sludge monitoring data for the pollutants for which limits in sewage sludge have been established in 40 CFR Part 503 for this facility's expected use or disposal practices. All data must be based on three or more samples taken at least one month apart and must be no more than four and one-half years old.

POLLUTANT	CONCENTRATION (mg/kg dry weight)	ANALYTICAL METHOD	DETECTION LEVEL FOR ANALYSIS
ARSENIC	0.64	ICP/AES	PQL: 0.22 mg/Kg
CADMIUM	0.94	ICP/AES	PQL: 0.02 mg/Kg
CHROMIUM	28	ICP/AES	PQL: 0.05 mg/Kg
COPPER	304	ICP/AES	PQL: 0.11 mg/Kg
LEAD	14.5	ICP/AES	PQL: 0.07 mg/Kg
MERCURY	1.6	ICP/AES	PQL: 0.04 mg/Kg
MOLYBDENUM	4.8	ICP/AES	PQL: 0.07 mg/Kg
NICKEL	14.3	ICP/AES	PQL: 0.12 mg/Kg
SELENIUM	4.4	ICP/AES	PQL: 0.18 mg/Kg
ZINC	526	ICP/AES	PQL: 1.16 mg/Kg

FACILITY NAME AND PERMIT NUMBER:

Honouliuli Wastewater Treatment Plant HI0020877

Form Approved 1/14/99
OMB Number 2040-0086

A.9. Certification. Read and submit the following certification statement with this application. Refer to the instructions to determine who is an officer for purposes of this certification. Indicate which parts of Form 2S you have completed and are submitting:

_____ Part 1 Limited Background Information Packet	X Section A (General Information)
	X Section B (Generation of Sewage Sludge or Preparation of a Material Derived from Sewage Sludge)
	_____ Section C (Land Application of Bulk Sewage Sludge)
	_____ Section D (Surface Disposal)
	_____ Section E (Incineration)

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with the system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Name and official title Frank J. Doyle, P.E. (Director)

Signature Frank J. Doyle Date Signed 8/30/04

Telephone number (808) 692-5159

Upon request of the permitting authority, you must submit any other information necessary to assess sewage sludge use or disposal practices at your facility or identify appropriate permitting requirements.

HONOULIULI WASTEWATER TREATMENT FACILITY
NPDES PERMIT NO. HI0020877

FORM 2S
PART 2: PERMIT APPLICATION INFORMATION
SECTION A: GENERAL INFORMATION.

A Topographic Map, including area one mile beyond all property boundaries, and Line Drawing, including plant processing units, are provided.

B. GENERATION OF SEWAGE SLUDGE OR PREPARATION OF A MATERIAL DERIVED FROM SEWAGE SLUDGE

Complete this section if your facility generates sewage sludge or derives a material from sewage sludge.

B.1. Amount Generated on Site

Total dry metric tons per 365-day period generated at your facility: 4,070 dry metric tons

B.2. Amount Received from Off Site. If your facility receives sewage sludge from another facility for treatment, use, or disposal, provide the following information for each facility from which sewage sludge is received. If you receive sewage sludge from more than one facility, attach additional pages as necessary.

a. Facility name: Wahiawa Wastewater Treatment Plant
b. Mailing address: 1000 Uluohia Street, Suite 308
Kapolei, HI 96707
c. Contact person: Frank J. Doyle, P.E.
Title: Director
Telephone number: (808) 692-5159
d. Facility address (not P.O. Box): 111 California Avenue
Wahiawa, HI 96786
e. Total dry metric tons per 365-day period received from this facility: 905.00 dry metric tons
f. Describe, on this form or on another sheet of paper, any treatment processes known to occur at the off-site facility, including blending activities and treatment to reduce pathogens or vector attraction characteristics.

a. Facility name: Paalaa Kai Wastewater Treatment Plant
b. Mailing address: 1000 Uluohia Street, Suite 308
Kapolei, HI 96707
c. Contact person: Frank J. Doyle, P.E.
Title: Director
Telephone number: (808) 692-5159
d. Facility address (not P.O. Box): 66-1012 Oliana Street
Waialua, HI 96791
e. Total dry metric tons per 365-day period received from this facility: 34.00 dry metric tons
f. Describe, on this form or on another sheet of paper, any treatment processes known to occur at the off-site facility, including blending activities and treatment to reduce pathogens or vector attraction characteristics.

B.3. Treatment Provided At Your Facility

a. Which class of pathogen reduction does the sewage sludge meet at your facility?

_____ Class A _____ Class B __X__ Neither or unknown

b. Describe, on this form or another sheet of paper, any treatment processes used at your facility to reduce pathogens in sewage sludge:

Zimpro thermal conditioning is used to process the sludge and reduce the pathogens. A sludge incinerator is available but will not be used as an alternative for sludge disposal.

c. Which vector attraction reduction option is met for the sewage sludge at your facility?

_____ Option 1 (Minimum 38 percent reduction in volatile solids)
_____ Option 2 (Anaerobic process, with bench-scale demonstration)
_____ Option 3 (Aerobic process, with bench-scale demonstration)
_____ Option 4 (Specific oxygen uptake rate for aerobically digested sludge)
_____ Option 5 (Aerobic processes plus raised temperature)
_____ Option 6 (Raise pH to 12 and retain at 11.5)
_____ Option 7 (75 percent solids with no unstabilized solids)
_____ Option 8 (90 percent solids with unstabilized solids)
__X__ None or unknown

d. Describe, on this form or another sheet of paper, any treatment processes used at your facility to reduce vector attraction properties of sewage sludge:

Thermal conditioning and centrifugal dewatering are used to reduce the attraction of sludge to vectors.

e. Describe, on this form or another sheet of paper, any other sewage sludge treatment or blending activities not identified in (a) - (d) above:

Complete Section B.4 if sewage sludge from your facility meets the ceiling concentrations in Table 1 of 40 CFR 503.13, the pollutant concentrations in Table 3 of §503.13, the Class A pathogen reduction requirements in §503.32(a), and one of the vector attraction reduction requirements in § 503.33(b)(1)-(8) and is land applied. Skip this section if sewage sludge from your facility does not meet all of these criteria.

B.4. Preparation of Sewage Sludge Meeting Ceiling and Pollutant Concentrations, Class A Pathogen Requirements, and One of Vector Attraction Reduction Options 1-8.

a. Total dry metric tons per 365-day period of sewage sludge subject to this section that is applied to the land:

__0__ dry metric tons

b. Is sewage sludge subject to this section placed in bags or other containers for sale or give-away for application to the land?

_____ Yes __X__ No

Complete Section B.5. if you place sewage sludge in a bag or other container for sale or give-away for land application. Skip this section if the sewage sludge is covered in Section B.4.

B.5. Sale or Give-Away in a Bag or Other Container for Application to the Land.

a. Total dry metric tons per 365-day period of sewage sludge placed in a bag or other container at your facility for sale or give-away for application to the land:

0 dry metric tons

b. Attach, with this application, a copy of all labels or notices that accompany the sewage sludge being sold or given away in a bag or other container for application to the land.

Complete Section B.6. if sewage sludge from your facility is provided to another facility that provides treatment or blending. This section does not apply to sewage sludge sent directly to a land application or surface disposal site. Skip this section if the sewage sludge is covered in Sections B.4 or B.5. If you provide sewage sludge to more than one facility, attach additional pages as necessary.

B.6. Shipment for Treatment or Blending.

a. Receiving facility name: Navy Public Works Center, Pearl Harbor - Biosolids Treatment Facility

b. Mailing address: Commanding Officer, Navy Public Works Center Pearl Harbor, Attn: Code 346
400 Marshall Road, Pearl Harbor, Hawaii 96860-3139 (Tax Map Key:9-1-13:60)

c. Contact person: Terrie Yamamoto
Title: Environmental Engineer Telephone number: (808) 471-1171

d. Total dry metric tons per 365-day period of sewage sludge provided to receiving facility: 3,900
City figure, based on sludge truckloads, as reported to EPA/DOH on 2/19/2004 (EMC 04-086).

e. Does the receiving facility provide additional treatment to reduce pathogens in sewage sludge from your facility?

X Yes ____ No

Which class of pathogen reduction is achieved for the sewage sludge at the receiving facility?

X Class A ____ Class B ____ Neither or Unknown

Describe, on this form or another sheet of paper, any treatment processes used at the receiving facility to reduce pathogens in sewage sludge:

Sludge mixed with City green waste (3 to 1 ratio) and composted in static aerated piles in accordance with 40 CFR 503 requirements.

f. Does the receiving facility provide additional treatment to reduce vector attraction characteristics of the sewage sludge?

X Yes ____ No

Which vector attraction reduction option is met for the sewage sludge at your facility?

____ Option 1 (Minimum 38 percent reduction in volatile solids)
____ Option 2 (Anaerobic process, with bench-scale demonstration)
____ Option 3 (Aerobic process, with bench-scale demonstration)
____ Option 4 (Specific oxygen uptake rate for aerobically digested
X Option 5 (Aerobic processes plus raised temperature)
____ Option 6 (Raise pH to 12 and retain at 11.5)
____ Option 7 (75 percent solids with no unstabilized solids)
____ Option 8 (90 percent solids with unstabilized solids)
____ None or unknown

Describe, on this form or another sheet of paper, any treatment processes used at the receiving facility to reduce vector attraction properties of sewage sludge.

Sludge composted in static aerated piles, as previously described.

g. Does the receiving facility provide any additional treatment or blending activities not identified in (c) or (d) above?

X Yes ____ No

If yes, describe, on this form or another sheet of paper, the treatment or blending activities not identified in (c) or (d) above:

The facility blends green waste with the sludge received from the Honouliuli WWTP at ratio of 3 to 1.

h. If you answered yes to (e), (f), or (g), attach a copy of any information you provide the receiving facility to comply with the "notice and necessary information" requirement of 40 CFR 503.12(g).
(Documents and information are attached.)

i. Does the receiving facility place sewage sludge from your facility in a bag or other container for sale or give-away for application to the land?

X Yes _____ No

Complete Section B.7 if sewage sludge from your facility is applied to the land, unless the sewage sludge is covered in:

- **Section B.4 (it meets Table 1 ceiling concentrations, Table 3 pollutant concentrations, Class A pathogen requirements, and one of vector attraction reduction options 1-8); or**
- **Section B.5 (you place it in a bag or other container for sale or give-away for application to the land); or**
- **Section B.6 (you send it to another facility for treatment or blending).**

B.7. Land Application of Bulk Sewage Sludge.

a. Total dry metric tons per 365-day period of sewage sludge applied to all land application sites: N/A dry metric tons

b. Do you identify all land application sites in Section C of this application? _____ Yes _____ No
If no, submit a copy of the land application plan with application (see instructions).

c. Are any land application sites located in States other than the State where you generate sewage sludge or derive a material from sewage sludge?

_____ Yes _____ No

If yes, describe, on this form or another sheet of paper, how you notify the permitting authority for the States where the land application sites are located. Provide a copy of the notification.

Complete Section B.8 if sewage sludge from your facility is placed on a surface disposal site.

B.8. Surface Disposal.

a. Total dry metric tons of sewage sludge from your facility placed on all surface disposal sites per 365-day period:
N/A dry metric tons

b. Do you own or operate all surface disposal sites to which you send sewage sludge for disposal?

_____ Yes _____ No

If no, answer B.8.c through B.8.f for each surface disposal site that you do not own or operate. If you send sewage sludge to more than one such surface disposal site, attach additional pages as necessary.

Complete Section B.9 if sewage sludge from your facility is fired in a sewage sludge incinerator.

B.9. Incineration. (A sewage sludge incinerator is available in the plant, but will not be used as a sludge disposal alternative. Therefore, incinerator data is not provided in this reapplication.)

a. Total dry metric tons of sewage sludge from your facility fired in all sewage sludge incinerators per 365-day period:

N/A dry metric tons

b. Do you own or operate all sewage sludge incinerators in which sewage sludge from your facility is fired?

____ Yes X No

If no, complete B.9.c through B.9.f for each sewage sludge incinerator that you do not own or operate. If you send sewage sludge to more than one such sewage sludge incinerator, attach additional pages as necessary.

Complete Section B.10 if sewage sludge from this facility is placed on a municipal solid waste landfill.

B.10. Disposal in a Municipal Solid Waste Landfill. Provide the following information for each municipal solid waste landfill on which sewage sludge from your facility is placed. If sewage sludge is placed on more than one municipal solid waste landfill, attach additional pages as necessary.

a. Name of landfill: Waimanalo Gulch Sanitary Landfill

b. Contact person: Joe Hernandez

Title: District Manager, Waste Management of Hawaii

Telephone number: (808) 668-2985

Contact is ____ Landfill owner X Landfill operator

c. Mailing address: 92-460 Farrington Highway

Kapolei, HI 96707

d. Location of municipal solid waste landfill:

Street or route #: 92-460 Farrington Highway

County: Honolulu

City or Town: Kapolei State: HI Zip: 96707

e. Total dry metric tons of sewage sludge from your facility placed in this municipal solid waste landfill per 365-day period:

170.00 dry metric tons

f. List, on this form or an attachment, the numbers of all other Federal, State, and local permits that regulate the operation of this municipal solid waste landfill.

Permit Number	Type of Permit
LF-0058-02	Landfill Permit

g. Submit, with this application, information to determine whether the sewage sludge meets applicable requirements for disposal of sewage sludge in a municipal solid waste landfill (e.g., results of paint filter liquids test and TCLP test) See note below)

h. Does the municipal solid waste landfill comply with applicable criteria set forth in 40 CFR Part 258?

X Yes ____ No

Paint filter and TCLP test results are attached. Note that not all parameters were not tested in 2003 under the TCLP test. The City plans to redo the test for all parameters as required by the regulations on sludge disposal to a municipal landfill.

HONOULIULI WASTEWATER TREATMENT FACILITY
NPDES PERMIT NO. HI0020877

FORM 2S
PART 2: PERMIT APPLICATION INFORMATION
SECTION B. GENERATION OF SEWAGE SLUDGE OR PREPARATION OF A MATERIAL DERIVED FROM SEWAGE SLUDGE

B.6. Shipment for Treatment or Blending.

The Honouliuli WWTP transports most of the wastewater sludge to the Barbers Point Composting Center for reclamation. The sludge is mixed with City green waste and composted in static aerated piles in accordance with 40 CFR 503 requirements. Upon completion of composting, the recorded date, temperature and pathogen laboratory data are reported to the Hawaii Department of Health for review and approval. As a Class A and Exceptional Quality Biosolid, the product is sold by request forms to available customers. Appropriate records and documents are attached.

SUBJECT:	City and County of Honolulu Biosolids Compost		

TOTAL NUMBER OF PAGES TRANSMITTED (including cover sheet): 2

Aloha John,

Thank you for your interest in the City & County of Honolulu's biosolids compost. The process to obtain the biosolids compost is as follows:

1. Fill out the top (portion surrounded by the box) of the attached request form.
2. Mail request form with original signature to me at the address on this letterhead or hand deliver if we show you the product.
3. After approval, I will contact you to schedule a pick-up date and time.
4. At the time of biosolids compost pick-up, we will require a check made out to the City & County of Honolulu. Please indicate Biosolids Compost, Sewer Fund on the comment portion of the check. The advertised price of the compost is $15 per cubic yard.

We appreciate your interest and thank you for helping us in our recycling efforts. Should you have any questions, please call me.

Pearl Harbor, Hawaii 96860-4884

Dear Mr. Wakumoto:

Subject: Navy Biosolids Treatment Facility
Barbers Point, Oahu

We have reviewed data submitted for compost material from the subject treatment facility. The following compost windrows met the requirements of 40 CFR 503:

1. [redacted]3-010903 (C041202, C041502, C041702, C042202, C042602, and C042902)
2. [redacted]3-011603 (C52402, C52802, C52902, C53002, C60302, C60602, and C60502)
3. [redacted]0-120602 (C032602, C032802, C040102, C040302, C040502, C040802, and C041002)
4. [redacted]3-012703 (C61002, C61102, C61302, C61402, C617602, C61902, and C42402)

Should you have any questions, please contact the Wastewater Branch at 586-4294.

Sincerely,

HAROLD K. YEE, P.E., CHIEF
Wastewater Branch

Ms. Gayle Takasaki
Hawaii State Department of Health
Environmental Management Division
Wastewater Branch
919 Ala Moana Boulevard
Honolulu HI 96814

Dear Ms. Takasaki:

SUBJECT: SOLID WASTE MANAGEMENT PERMIT NO. CO-0018-99 NAVY BIOSOLIDS TREATMENT FACILITY LOCATED AT BARBERS POINT, OAHU

As required by Solid Waste Management Permit No. CO-0018-99, Special Condition Number 22, we are submitting to your office the temperature and pathogen laboratory data for compost produced from the City and County of Honolulu biosolids for your review and approval prior to releasing the compost to the City and County of Honolulu.

Enclosed are the temperature logs for seven static aerated piles (C52402, C52802, C52902, C53002, C60302, C60502 and C60602). All of the piles met the time and temperature requirements of 40 CFR 503. These seven piles were combined to form windrow C0023-011603. Also enclosed are the Fecal Coliform Results and Metal Results for windrow C0023-011603. The results show that each of the seven samples had a Fecal Coliform value of less than 1000 MPN and that the compost meets the metal concentration limits for Exceptional Quality Biosolids.

The approximate quantity of compost in windrow C0023-011603 is 350 cubic yards.

Should you have any questions, please contact Ms. Terrie Yamamoto at 471-1171 extension 204.

Sincerely,

R. M. WAKUMOTO
Director
Regional Environmental Department
By direction of
Commander, Navy Region Hawaii

Enclosures: 1. Temperature data
2. Pathogen laboratory data
3. Metal laboratory data

HONOULIULI WASTEWATER TREATMENT FACILITY
NPDES PERMIT NO. HI0020877

FORM 2S
PART 2: PERMIT APPLICATION INFORMATION
SECTION B. GENERATION OF SEWAGE SLUDGE OR PREPARATION OF A MATERIAL DERIVED FROM SEWAGE SLUDGE
B.10. Disposal in a Municipal Solid Waste Landfill.

The Honouliuli WWTP transports a minor portion of the wastewater plant sludge to the Waimanalo Gulch Sanitary Landfill for disposal. Information to determine whether the sewage sludge meets applicable requirements for disposal in a municipal solid waste landfill, paint filter liquids test and TCLP records for 2003, are attached.

TO: MR. SILVESTRE ULEP, CHIEF
DIVISION OF ENVIRONMENTAL QUALITY

FROM: EARL W. M. NG, ACTING CHIEF JAN 28 2004

SUBJECT: PAINT FILTER TEST RESULTS FOR HONOULIULI WASTEWATER TREATMENT PLANT FOR 2003

Please find attached the Paint Filter Test results for the year. I certify that our Division has implemented a program under my direction and supervision this past year that was designed to insure that the paint filter test requirements are being met.

If you have any questions, please call Mr. Marcelino Armas at 681-3138, extension 100.

Paint Filter Test

Form 1
Monthly Testing

Plant/Source: HWWTP Year: 2003

Part 1: Monthly Check

For each sample type, do a paint filter test a minimum of once a month. Indicate whether the test passed (circle for Yes or No). If the test didn't pass, record the remedial actions and follow-up test results in Part 2.

Enter Date checked -->	Jan 1/3/03	Feb 2/25/03	Mar 3/30/03	Apr 4/28/03	May 5/20/03	Jun 6/10/03	Jul 7/20/03	Aug 8/26/03	Sep 9/28/03	Oct 10/24/03	Nov 11/30/03	Dec 12/28/03
